

GRAIN AND PRODUCE MARKET

Wheat Opens Weak and Lower on Bear News.

CROP CONDITIONS ARE PERFECT

Prospect Favors Sellers—Corn Holding Its Own Stubbornly Against the Continued Heavy Selling.

OMAHA, May 17, 1911. Liverpool came decidedly weak again today and coupled with bearish crop news the wheat market was weak and lower. Weather conditions are the real factor in price making and dry weather complaints were more numerous. On the whole the crop conditions could hardly be better and aside from the position taken by the strong bull leaders the conditions favor sellers.

The corn market is stubborn and holding its own against heavy selling anticipating a heavy run of country deliveries later. There is every reason why the country market should be strong and prices are high, planting is nearly over and the shipping demand continues light. Wheat opened lower on weak news, but soon firmed on buying on dry weather news. The market was rather dull, trade light and cash sales were reported as lower.

Primary receipts were 27,000 bushels and shipments last year of 31,000 bushels and shipments were 30,000 bushels. Receipts were 27,000 bushels and shipments were 30,000 bushels. Receipts were 27,000 bushels and shipments were 30,000 bushels.
