NORTHWEST CONDITION BETTER General Reports from Producing Area

Supports the Bears - Heavier Corn Movement is Now Expected.

OMAHA, May 29, 1911.

OMAHA, May 29, 19tl.

Showers and cooler temperatures over the middle states puts a check on the attempt to advance wheat on dry, hot weather for the time being.

The country trade does not appear to be in sympathy and liquidation was of a noticeable volume, Conditions in the northwest are much better than a week ago and European exporting countries are bearish. Everythings points to a heavier movement of corn from now on. The new crop is reported to be germinating quickly under warm weather, and as conditions are favorable, the seiling of reserves is expected hiquidation of long corn is quite thorough, the market showing a declining tendency. Wheat ruled weak and had a lower to dency, owing to light trace and more favorable crop news. Cash wheat was duil, values ruling its higher to its lower.

Better receipts and favorable crop news weakened corn, the market eased off on ateady liquidation. Cash corn was its to its lower.

Primary wheat receipts were 451,000 bushels and shipments were 432,000 bushels against receipts hat year of 277,000 bushels.

Primary wheat receipts were 451,000 bushtels and shipments were 459,000 bushels, against receipts last year of 237,000 bushels and shipments of 165,000 bushels.

Primary cosn receipts were 271,000 bushels and shipments were 247,000 bushels, against receipts last year of 259,000 bushels and shipments of 375,000 bushels and shipments of 375,000 bushels of corn, 2,000 bushels of oats and wheat and flour equal to 400,000 bushels.

Liverpool closed unchanged to 35d lower on wheat and 35d lower on corn.

The following cash sales were reported:

Corn and Wheat Region Sulletin. Record for the twenty-four hours ending at 8 a. m. Saturday, May 20, 1911: OMAHA DISTRICT. CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

the drouth and the hot spell the tendency toward a decline was aided by signs that world shipments would reach more than 15,000,000 bu. for the week. The early beginning of harvest in Texas did not escape notice, but was put in the background temporarily in consequence of damage reports from Nebraska. The final tone was easy. July ranged from SSc to SSAc, with last sales ac down at SSAc.

Corn became easier on account of an expected larger movement to market. July fluctuated between 514,501%c and 52%c, closing easy at 51%c, a net loss of account of the consequence of the conse

ate offerings. No. 2 yellow finished at 5597334c.
Coolness and rain let oats down a bit. July sold from 334c to 3ic as outside limits and closed 1604c off at 354,7334c.
Plenty of hogs in sight made the provision market sag. The outcome of the season was that there was a 5574c to 10c setback for pork and Philips decline on ribs, but lard was either unaltered or 24c off.
Prices in Chicago, furnished by the Updike Grain company, Telephone Douglas 2473, 70c Brandels building, Omaha:

ARKANSAS TOOTS RESTRICTED ONE Official Drunk Tolerated by Law, Two Starts the

Bouncer. The Arkansas house of representatives has passed a bill ordaining that any public officer who gets tipey more than once during his term shall, by the mere fact of his second toot, lose his place.
This means, of course, that his chair is

empty if he fills up twice. If he is not dissy continually he cannot reach his desk. It is a new recall—the recall of the bottle. Good judges of whisky and of constitutional law insist that the bill cannot become law; that there is a joker in it.

For it does not provide how long the officeholder's first spree may last, and it orders no penalty for the first spree. Before his dinner today a learned jurist "Give me a cocktail."

After the cocktail he studied the bill and remarked: "There seems to be a darky in this wood-

shorn lambs has been the longest, but the least remarkable for the reason that spreads between offerings with and without fleece were due for considerable adjust-

fleece were due for considerable adjustment.

Present prices for shorn lambs show net advances of 500 55c over quotations a week ago, while improvement in wooled lambs is measured by a 50c margin. It follows, of course, that sales reached the highest levels of the year. Wooled Mexican lambs sold largely around \$6.55g.85; one string topping at \$2.00 yesterday. Shorn lambs jumped from a \$5.0056.50 basis to a \$5.0056.55 spread, these figures calling for good to choice quality either at last week's close or at present. Bulk of the receipts arrived shorn on all days and the few Mexicans available were practically sione in the wooled branch of the trade.

Volume of business in old sheep has been too small to afford anything like an accurate idea of values. To all intents and purposes, matured muttons are new selling lagica above quotations a week ago, shorn owes of good quality ranging around \$1.55. Wethers and yearlings have been notably scarce.

St. Joseph Live Stock Market. ST. JOSEPH. May 20—CATTLE—Receipts, 100 head; market steady; steers, \$5.00%6 15; cows and helfers, \$3.2596.00; calves, \$4.00%7.50.
HOGS—Receipts, 3.000 head; market weak o 5c lower; top, \$6.15; bulk of sales, \$5.85

of cattle today and absolutely none on sale to make a market. For the week receipts show a gain over recent weeks, being the heaviest since four weeks ago and larger than a year ago by aimost 4,000 head. The arrivals have consisted very largely of corniced steers with a fair sprinking of butcher stock.

Considering the large receipts the market has not been in very bad condition this week. Good, light, and well-finished beef steers sold most freely, the same as they have for several weeks back and cattle of that description at the close of the week are steady to strong as compared with the close of last week. On the other hand, heavy cattle, even if pretty well finished, have been less active sellers and, on some days, have been positively slow, while the tendency of prices has been easier. At the close of the week they are possibly as much as loc lower than one week ago.

Good and well fattened helfers and light cows on the helfer order have been active sellers all the week and have commanded steady to strong prices every day. On the other hand, bain and heavy cows have Total receipts......2.500 30,500 OMAHA GENERAL MARKET.

cows on the helier order have been active sellers all the week and have commanded steady to strong prices every day. On the other hand, plain and heavy cows have been more or less neglected and at the close of the week they are logdic lower as compared with last week. It will be noted from this that the consuming demand calls for light beef, the heavy kinds being more or less neglecten. Yest calves have shown some atrength this week and are light here than one week ago. Bulis and stags have sold at about steady prices, in fact good bulls have been strong.

A somewhat better demand has prevailed this week for good stock cattle and feeders and the better grades could safely be quoted as a trife stronger than last week's close. Still it must be understood that the demand has not been very large, at least not so large but what the very moderate receipts coming have been sufficient to supply it. RUTTER treamers, No. 1 delivered to the retail trade in 1-lb. cartons, No. 2, in 50-lb, tubs, 200; No. 2, in 50-lb, cubs, 200; solid pack, 100; delry, in 60-lb, tubs, 149/160; market changes every CHERSE—Twins, 14%-205c; young Americas, 176174c; daisies, 16c; triplets, 154c; limberger, 18c; No. 1 brick, 15%; imported &wiss, 22c; don.estic bwiss, 22c; block Swiss,

SCHWAB FEELS CONFIDENT

Captain of Steel Industry Takes No Stock in Pessimism.

ROSY SPECTACLES FOR BUSINESS

Gaggenheim Finds England Now Enjoying a Good Trade and German Business Especially

Promising.

BY PRESTON C. ADAMS. NEW YORK, May 28.—(Special to The Dee.)—Leaders of Industry continue to look at conditions through rosy speciacies, and if they have any misgivings as to the outlook keep their forebodings to themselves. Not only is the situation to their minds satisfactory here, but abroad as well. For instance, tharles M. Schunb, before his departure for an European trip, had this to say: You will recall that there was consid-

'You will recall that there was considerable grumbling last year over poor steel conditions, but at the end of the year the report of the various steel companies showed in nearly every case the second best year in history. Some people are compliaining now, but production for the last several months has not been poor, an evidence of which is found in iron production, which has been running at the rate of close to 25,000,000 tons a year.

"For several weeks there was a failing off in new bueness, but intely the rall-roads and certain other consumers of steel have shown more of a disportition to enter the market. I believe the next turn will be for the better. Money is easy and there is plenty of it awalting investment. The demand for high-grade bonds is pronounced. The country is trying to forget politics and business interests in general seem to be more hopeful. There has been better buying of steel by the railroads of late. The railroads have been much of a factor in steel for a year or more past, and it would not surprise me in the least to find them in the market as farge buyers before a great while. There has been more or less pessimistic talk on the steel industry since the first of last year and I believe it is about time to become a little optimistic. A good foundation has already been laid for a business revival."

Guggenheim's Views.

Then Isaac Guggenheim, on his return from abroad, says: from abroad, says:

In angiana business is good and in Germany exceptionally good. I found that Germany is coying have copper when ever before. This is due to the great expansion of business that is taking place there.

And 2. Dewitt Cuyier, a director of the Pennsylvania rairond, who has been Pennsyluvania ralirond.

Pennsyluvania ratiroad, who has been away since January, says:
"Sentiment toward American securities seems to be good abroad and the general feeling excellent. The big supreme court decisions are anxiously awaited by the toreign financial interests, although I do not think they are having a very deterrent effect on purchases of our securities. Things here, I believe, are very sound and the ratiroads stronger than ever despite the decision of the Interstate Commerce commission. These are simply typical." Mining is Profitable.

Holders of stock in American mines and Holders of stock in American mines and metallurgical works found the first four months of this year unusually profitable ones, reports to the mining world showing that 110 mines and works distributed \$53,-134,786 among their shareholders.

While largely dependent upon the profits of some of the above companies for their dividends, the declarations of the seven securities holding corporations can be added to the total of the four months-\$5,048,720-making a grand total of \$35,-134,465.

104,465. In classifying the dividend payers of 1911 the gold silver, lead and sine producers, numbering eighty lead with \$12,504,500. Since incorporation, however, they rank a poor second to the coppers, having to their credit \$199,265,846, while the twenty-three coppers have disbursed \$374,814,731, equivalent to 118 per cent on the issued capital, as compared with \$7 per cent on the former.

Legislation for Investors.

Investors can find no asylum free from inglishative harassment. When Germany applied the screws to taxpayers loud complaints were heard that investors there would send their money out of the country. Then the French government passed measures not at all to the liking of capital and the same outery was raised. In the United States our financiers have stormed for several years against the attacks of the administration. But now comes the British government with the most paternalistic place of legislation ever essayed by any government. Liody George, the man who precipitated the last general election by his budget, has brought forward a scheme to budget, has brought forward a schem

ment is to be introduced into the engineering and building trades as an experiment. With a view of extending the plan to other industries. Not only so, but the government is to spend millions in wasting war against consumption. All this on top of old age pensions means that the taxpayer will have to bear very heavy burdens. Capital may fret and fume, but whither can it flee for protection?

Notwithstanding all their enormous surpluses, the largest financial institutions of New York are not conceding one jot in their demands for the highest grade of collateral, nor will they consider for a moment paper not of the very highest grade. Nine institutions out of ten would rather lend money on Stock exchange collateral at 5 per cent than release funds on inactive security at a much higher rate. Country banks are acting with similar conservatism. Every one has taken in a sail least a squall arise when the supreme court decisions are rendered. It is this very caution that tends to swell the surplus reserves carried by banks and trust companies.

Ironing Out "Kinks."

One of the secret grievances of shippers against railroads has been said to be that shippers are unable to bargain and haggie for their transportation as they did when their existed competition, and that passes and other favors have disappeared. A way has been found to overcome this feeling. It is notorious that when a man who had ridden on passes all his life is deprived of them he feels that he is deprived of something that belongs to him; he will pay to ride on another than the one on which he has been traveling free. It becomes the business of railroad managers to iron out these kinks in human nature. In the west the railroads are conducting what they call "Get Acquainted" trips. All

Bry Goods Market.

No Action on Paris Bourse.

There is more talk than action in Paris for function of the listing of American securities. Almost every week a report is gravely published that such and such stock is about to be elevated to the parquet, but so far these reports have seldom been followed by action, Atchison, according to statements widely published, is already to receive this honor, \$10.000,000 having been deposited in France against the necessary bankers receipts. Then it was said circumstantially that American Telephone shares are in line for similar promotion, but further developments are awaited Perhaps are in line for similar promotion, but further developments are awaited. Perhaps while he was abroad.
