were in fair demand. No. 2 yellow finished at 545,5642.

The oats market responded somewhat to the reports that the crop had been benefited by moisture in the nick of time. High and low points for September were 204c and 33%c, with the close at 29%c, a net lose of 4,20%c.

Trade in provisions nearly vanished. A nickel either way measured the extent to which the market would budge.

Frices in Chicago, turnished by the Updike Grain company, telephone Douglas 2473, 708 Brandels building, Omaha:

WINTER REPORTS CONFLICTING

Crop Reports Are Uniformly Favorable Over Corn Belt—Temperasures Are Lower and Good

Rains Have Fallen.

OMAHA, June II, 1911.

Wheat had a weaker tone today, rains in
the spring wheat belt have been sufficient
to end the dry weather talk from that
quarter for some time to come. Reports
on the whole a big drop is being conceded. Free Camadian wheat in the near
future is another reasonable bearish featurn and hedging sales of new wheat will
be heavy. Natural influences are on the
side of the short sellers.

Temperatures over the corn belt are
lower and fairly good rains have been reported and crop reports are uniformly
favorable. The country movements conmore favorable conditions being the feature.

Cash wheat ruled unchanged to ½c lower.

Corn followed wheat and cased off in
face of some good support on the break

NEW YORK STOCKS AND BONDS Market is Lowest for Week Because of Adverse Crop News,

JUNE EXPORTS BREAK RECORD

Balance of Trade in Favor of United States for Nine Months is More Than One-Half Billion

NEW YORK, June 17.—(Special Telegram.)—Crop considerations bulked largest in Wall street discussions this week and the receipt of reassuring advices from the drouth-covered portions of the west and southwest resulted in or was followed by sufficient as ling of stocks to put the market down substantially toward the weekend. This might have been taken to signify nothing more than the way in which professional markets act on good news, for the professionalism of the bulk of the dealings in stocks for the last few months can hardly be disputed.

There has been recently an all-around increase of margin trading, the natural consequence of a long campaign of optimistic advance conducted from Wall street, emphasied by the insistent and persistent lift of quoted values; but the general public response from men engaged in business and professional lines has been relatively small. This is something which is also a normal feature of the more or less exclusively manipulative stage of bull movements.

Next in order among the more influential incidents of Wall street has been the broadening scope and continued hopefulness of the investment situation. It has been for some time the belief of the more confident optimists that the bidding today for the Panama canal issue for \$50,000,000 would demonstrate impressively that convincing reasons existed for expecting a new era of prosperity.

June Exports Break Record.

June Exports Break Record. It is rarely that the turning of the economic tide is marked by any conspicuous event, but such an event often advertises a fact that the tide has turned. Forcign trade statements for the first nine months of the fiscal year show an excess of exports over imports of \$500,000,000, the export total for June breaking all records. To the credits arising from this merchandise balance are to be administered to the still larger credits resulting from new American security flotations abroad, and it is testimony among influential bankers that not even excepting the famous year 1836 our claims against the European banking community are right now the largest ever known. That under the circumstances there should be no pause in the pressure of idle capital for investment is not surprising. So far from decreasing, the evidences are that the movement is on the increase. Nothing approaching such a market for new flotations has been experienced since the great Wall street boom of 1902.

Capital is Plentiful.

In recent years no argument has been more potent for the stock exchange bear than that our railway and industrial corporations could not obtain capital for betterment needs because they could not sell new securities except on very generous terms. We not only do not have this situation any longer, but we have its opposite and it is doubtful whether in the average view of the current financial prospect this change is reckoned at its proper value. It means that the railroads, when they choose, can go on with schemes for value. It means that the railroads, when they choose, can go on with schemes for extension work which have been held up through years of credit stringency. And it is difficult to resist the conclusion that given good crops and a consequent new year of heavy traffic in promise, the time when the railroads will decide to embark upon these enterprises is not so very far off.

St. Louis General Market.

Showed practically no change from two weeks ago. The number of idle cars is now 168,802.

Bank clearings for the entire country made an increase of nearly 6 per cent; this week. For the first time in many months all of the central reserve cities gained. Here this amounted to about 6 per cent; in Boston to 14½ per cent; in Enders.

one week ago.

Cornfed helfers and oows have also remained practically stationary with a week ago, but common grass cows have been slow and dull, with the tendency lower, and they are at the close of the week around 25c lower than last week. Veal a week ago, have been in 2. mewhat larger supply and prices have declined rapidly, being at the close of the week 50c lower than one week ago. Good bulls have been very scarce, and they are not over 15625c lower than last week, but common grass bulls have been very hard to move, and they are safely 50c lower than a week ago. Stockers and feeders have been very limited, so that there has been a great plenty to supply the requirements of the market. Owing the requirements of the market of the season.

Cotto futures closed steady. Closing the current year. The exact total, as points below flast likely and \$8.69 per bale of the current year. The respective of the season.

Nearly 1,000,000,000 new securities have been as great plenty to supply the requirem

to the lack of buying support prices have steadily worked downward and are now around 26 lower at least than a week ago. Quotations on cattle: Good to choice beef steers, \$5.5066.10; fair to good beef steers, \$5.5065.00; fair to good beef steers, \$5.5065.00; fair to good to choice eows, \$4.5065.00; fair to good to choice eows, \$4.5065.00; fair to good to choice eows, \$4.5065.00; fair to good to choice stockers and feeders, \$4.5065.20; fair to good to choice stockers and feeders, \$4.5065.20; common to fair stockers and feeders, \$4.5065.20; common to fair stockers and feeders, \$4.5065.20; cant to good stockers and feeders, \$4.5065.20; cant good stockers and feeders, \$4.5065.20; common to fair stockers and feeders, \$4.5065.20; down the f

be expected at this season of the year and with the kind of stock coming. As a matter of course trade was a little dult on some days, owing to the scarcity of really destrable killers, but still the most of it was worked off to preity good advantage, although prices are lower than at the close of last week. It will be remembered that last week shorn lambs sold very high at this point, while at others they were sharply lower. To even up matters prices here have eased off and are around 250500 lower than last week. Prices are still high compared to those prevailing at other points and the market as a whole is in a good, healthy condition.

Quotations on sheep and lambs: Spring lambs, good to choice, \$5.006.00; spring lambs, fair to good, \$5.206.00; shorn lambs, good to choice, \$5.006.00; shorn, \$1.006.00; feeding lambs, shorn, \$5.006.00; culled ewes, \$1.5062.50.

FRENCH PER CAPITA GREATES Great Britain Comes Second, with

United States Third. FINANCIERS EXPRESS VIEWS

While Fortunes Are Quickly Made Sometimes in United States, Every Man Who Invests Doca Not Get Rich.

BL PRESTON C. ADAMS.

NEW YORK, June 17.—(Special to The Rec.)—There is a general sort of an idea that the United States is the richest of all courtries. In the asgregate this le correct, but when it comes to per capita of wealth we are a bad third. L'Americain Financier, a French publication which is recognized as an authority on such matters has just issued figures on this subject which are interesting. These show that while the wealth of the United States in the aggregate is \$125,000,000,000, as against RS. 200,000,000 for Great Britain and \$3,000,000,000 for France when the per capita of wealth is considered, however, France is easily in the lead with Great Britain, a rather closs second and the United States a poor third. The per capita of wealth for France is \$2,575 for Great Britain \$1.975 and for the United States \$1,259.

It would be interesting to know how this wealth is distributed, but unfortunately no such statistics are available. If they were it is not improbable that the showing for the United States would be even less favorable, for there is probably a greater concentration of wealth in this country than in any other in the world. In a recent speech Lloyd George, the British chancellor of the exchequer, made the statement that there were only about 10,000 or so men in Great Britain who would be liable for the sur-tax on incomes, having an income of \$2,000 or more. It is probable that New York City alone would greatly exceed this total. BL PRESTON C. ADAMS.

Many a Time, While fortunes are sometimes quickly made in American mines it is a melancholy fact that not every man who invests in mining stock quickly gets on easy street thereby thereby.

One of the financial papers the other day had a rather grim jest on this point in its advertising columns in the shape of the following advertisement:

"WILL EXCHANGE-I have 5.00) shares of a once well known mining and leasing

of a once well known mining and leasing company. Will exchange same for one setting hen and thirteen fresh laid eggs, Leghorned preferred. Only permanent investors need apply. GET RICH QUICK." Chances to Invest.

Chances to Invest.

Last July \$205,000,000 was distributed in dividends and interests, and as an even surger sum will be paid out next month our principal underwriters and investment houses are making active preparations to a tract the reinvestment of this money. The journal's records show that just over \$1,000,000,000 new securities nave been issued since January 1, yet investigation reveals that much new financing is contemplated. The June offerings of new bonds and notes are likely to exceed last month's total of \$155,000,000. The response to recent applications for capital has in nearly every case been highly satisfactory abroad and at home. The present is a peculiarly propitious moment for covering requirements; indeed it is questionable if conditions can long remain as favorable as they are now.

Money everywhere is abnormally cheap. In London discounts are only a shade above 2 per cent, in Paris the quotation is 2 per cent, in Berlin it is under 3 per cent, in Amsterdam 2% per cent, while in New York call money has been in superabundant supply at 2% and 2% per cent, in Amsterdam 2% per cent, for short in the basis of 2% per cent for short of the basis of 2% per cent for skort of the basis of 2% per cent for skort of the basis of 2% per cent for skort of the cent of the certain house banks have been carrying reserves far in excess of legal requirements, and the plethoric state of out-of-town markets has been reflected by receipts on balance from the interior to the extent of well above \$100,000,000 since the opening of the year.

Billion is New Securities.
