CHICAGO GRAIN AND PROVISIONS Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, July 21.—The black rust bugaboo was banished from the wheat pit this afternoon and so was the fear of Canadian frost. The market fell back and there was a weak closing, ac to 460 %c, under last night. Final sales left corn he to he down, oats off %c to 110c, and nog products varying from the level of twenty-four bours before to 20c decline.

It was explained by a leading expert that the velvet chaff variety of wheat in which the black rust had been at work had matured probably enough to be exempt from much actual damage. The real danger would occur if the rust were to spread to blue-stem wheat, the kind that ripens later.

Standard of the last was a specified that the rust were to spread to blue-stem wheat, the kind that ripens later. Further north advices were received that Omaha, Neb.

Further north advices were received that the weather in the Canadian northwest had become ideal and that the largely increased acreage meant a big harvest. Cradual buying power, which earlier in the day had pushed prices higher, seemed to give out and the market sagged.

Foreigners were still largely bidders, but were ic to 2c out of line. The fact was recarded as having bearish significance that world shipments were estimated at nearly 4.000,000 bushels in excess of the corresponding time a year ago. During the serial September ranged from Sec to 30% colosing 146% ent lower at 88788% c.

Refusal of eastern buyers to follow an advance in corn, pulled down that cereal. September fluctuated between 61% c and 55% c, with the close weak at 65% c, a net loss of %c. Cash grades were firm. No. 2 vellow finished 65765% c.

Threshing returns on oats proved increasingly favorable. High and low points for September were 42% and 41% c.

A considerable shortage in September pork resulted in that onton being sharply advanced. At the end of the day 20c of the gain was still held and on the rest of the first the market kept an even keel.

The leading futures ranged as follows:

Advances.

OMAHA, July 7, 1911.

From the reports in the northwest it looks as if the spreading of black rust may not to the damage already done the spring wheat crop by extreme heat and drouth, justifying the lowering of estimates being given out by crop experts. The action of the market indicates the trade to be free from fear of further liquidation. Winter wheat movement is falling off and foreign news is less favorable on crop prospects.

Weather in the corn belt continues fair with no rains forecasted temperatures remain normal. The general feeling amons the trade is that liquidation has been trade is that liquidation has been trade is the trade to be trade to be trade to be tra NEW YORK, July at-After a day of

Canadian racific's advance attracted at tention, since only yesterday the stock was under pressure because of sening from abroad. The stock is so closely near and has so little following that its continued advance exercises slight speculative influence, alinneapons, St. Paul and Sautt Ste. Marie and Wisconsin Central alited lines ross with Canadian Pacific. The Hill issue made a further advance, being well absorbed on moderate offerings. Expectations of adoption of the Canadian reciprocity treaty were set forth as a cause of the strength of the rallway stocks of the Canadian and the northwestern groups. DUN'S REVIEW OF TRADE Trade Continues Quiet, but Condition

Are Sound.

BETTER WEATHER IS HELPFUL

Present Progress in Iron and Steel Business Augura Well for Puture

-Mill Operations Reported Brondening.

NEW YORK, July 21.-Dun's Review of rade tomorrow will say: Trade continues quiet, but conditions are essentially sound. Hetter weather through out the crop area has largely relieved the apprehension about the staple crops, and lower temperatures in the large cities have elped general business, especially retail

lines.

Progress in iron and steel argues well for the future. While improvement is not pronounced consumers are more disposed to cover requirements, and mill operators are broadening. Evidence of the increasing demand is furnished by the placing of orders for 100,000 tons of steel products for carly shipments with a western subsidiary of the leading interest, the greater portion of these bookings comprising rails and track fastenings. track fastenings.

BRADSTREET'S REVIEW OF TRADE

Sentiment More Cheerful, but Actual Business Still Quiet. NEW YORK, July 21.-Bradstreet's to morrow will say:

While sentiment is more cheerful, based upon the improvement in crop respects, actual business at wholesale has been and actual business at wholesale has been and is still slow to expand. For this, conservatism as to the fail outlook, some price uncertainties, as in cotton goods, where sharp declines in raw materials have brought about revisions in the goods markets; turiff uncertainties and the desire to obtain a clearer view of crop out-turn, are all held contributory.

Retail trade largely has been confined to clearance sales of summer goods, but the results here have not been uniformly satisfactory.

atisfactory.

Perhaps the most uniformly favorable reports as to trade comes from the south where bumper crop prospects stimulate a fair degree of confidence, and from points of the southwest, where the passing of the season's long drouth has improved sentiment

sentiment.

Collections ranged from slow to fair.

LOOKED LIKE A SEA SERPENT

Monster Two Hundred Feet Long. with the Beard of a Prophet. Mocks a Ship's Crew.

Captain A. E. S. Hambleton of the White

Star liner Celtic denied that he had "limped into port"-the recognized ship news formula-under one propeller because a sea serpent had bitten off the other while he was nearing Fire Island, N. Y., in the shadowy light of the dawn of yesterday. It was true there had been a report of a sea serpent appearing about that time. It was dark brown like the taste in the mouths of those who had sat up looking for strange sea changes and serpents and other zoological things. The purser denied the story, declaring that the Celtic had helfers, \$3.0006.50, canners, \$1.0002.75; bulls, \$2.7565.25; calves, \$3.0007.75; Texas and Indian steers, \$3.2506.00; cows and helfers, \$3.0004.50, HOGS, Parallel of the company of the story, declaring that the Celtic had not been chartered as a seeing-the-season linear parallel of the company had been an unusually large Sunday school HOGS—Receipts. 13.700 head: market of whales noted off the starboard bow, or steady; pigs and lights, \$4.0036.80; packers, \$6.556.90; butchers and best heavy, \$5.70 day morning before anyone who had rone. day morning before anyone who had gone to bed was up. He could not account for the visions of those who had not gone to hed and who might have been holding royal flushes made up of marine monsters before the lights in the smoking room work extinguished.

Robert Hilliard was among those who went to bed. He says that he had never seen a sea serpent before. This one that is under consideration was pointed out to him as the first gray streaks of dawn appeared far off on the ocean's misty brim. (These are Mr. Hilliard's own words.) He was in his berth when he was aroused by a pounding on the door. He had left word to the steward to call him if anything unusual occurred on shipboard or out in the illimitable ocean (Mr. Hilliard). He asked sleepily, "What's the mazzer?" and the faithful steward answered. "Whales. schools of 'em?" Mr. Hilliard drew on his pajamas and went out on deck. There has met the purser and asked where the whales were, "Whales?" said the purser. "You mean sea serpents!"
