GRAIN AND PRODUCE MARKET

Black Rust News Still Continues to Come from Northwest.

HIGHER VALUES ARE IN SIGHT

Rains Are Scattered Over Western Corn Belt and Indications Are for Unsettled Weather Further East.

OMAHA, July 28, 1911.

Foreign news came more builtsh again this morning, the Moroccan situation being considered serious. In addition to this crop news from the northwest was on the sensational order, reports advising the spreading of the black rust.

Export demand continues good and liberal sales are being made on all setbacks, giving an outlet for the heavy primary stocks. General market sentiment is working strongly in favor of higher values.

Hains were scattered over the western corn belt and indications are for unsettled weather further east. Crop reports, however, are taking a builtsh view of the crop situation and the next government crop report is expected to show deterioration. Shipping and cash demand is picking up and prices are better.

Market Recedes Slowly and by Noon All of the Early Gains Are Wiped Out, with Some New Low

Records.

NEW YORK, July 28.—The reactionary tendency which has characterized operations in the stock market the greater part of the week was again displayed today, though to a lesser degree than on the preceding two days. The list moved irregularly in the carly session, during which time there were several inciplent bear raids.

opening prices were generally higher, grains in many cases being a point or more over yesterday's close. This was a natural sequence to the higher range for American securities in London, where less alarm seemed to be felt as to the outcome of the Moroccan negotiations. This better feeling was cinfirmed by international bankers, whose advices from various con-tinental sources were mostly of a reassur-

ing character.
The market receded slowly and by noor The market receded slowly and by noon nearly all early gains were eliminated, with a few new low records for the present movement. During the remainder of the day the market was slow and dragging, with no changes of importance.

News of first steps toward reorganization of the American Tobacco company in conformity with the supreme court's interpretation of the anti-trust law roused only moderate interest, for the reason that no intimation was given as to what plan of readjustment would be finally adopted. The preferred stock gained two points and the

preferred stock gained two points and the bonds improved slightly. Bonds were steady. Total sales par value, \$1,880,000. United States bonds were unchanged on call.

on desirable beef steers than at the close of last week. In some cases the gain has been even more than that.

The few cows and heifers in the yards this morning changed hands very readily at good strong prices. The market was more active than usual on Friday and very satisfactory to the selling interests. Prices

more active than usual on Friday and very satisfactory to the selling interests. Prices are 10@15c higher at least than last week. There were no stockers or feeders of any consequence in sight, but what few there were commanded good firm prices. The desirable kinds of stock and feeding cattle have shown a little improvement this week under the influence of a better outlook for pastures and a better fat cattle market. Prepares to Comply With Court Decision

Notice Given of Taking of Steps to Re-create American Tobacco Company.

NEW YORK, July 28 .- Steps toward "recreating" the American Tobacco company, out of the elements now composing it, in harmony with the decision of the supreme court of the United States, were taken today when announcement was made of the holders of the 6 per cent bonds, the 4 per cent bonds and the preferred stock. The chairman of the 6 per cent bondholders committee is Alexander J. Hemphill, president of the Guar-

active, becoming quiet and even dull toward the close.

Supply consisted of about 116 loads, an estimate that afforded some little argument for strength. Shippers were in the trade with heavy orders for smooth animals of all weights, buying in all about tharty-five loads. Outside purchases amounting to one-third of a moderate run indicate a general shortening of receipts, of course, and augur well for a healthy demand during the balance of the summer and early fall.

Clearance of yards was delayed until well cent bonds, of which Charles H. Sebin, vice president of the Guaranty Trust company, is chairman, and preferred stock-holders' committee, of which J. N. Wallace, president of the Central Trust company, is chairman. The three committees join in requesting that certificates of bonds and stocks be deposited not later than August 28, next.
