RUST REPORTS ARE CONFLICTING Recent Rains in Corn Belt Improve the Situation and Conditions on the Whole Are Now More

Encouraging. OMAHA, July 31, 1911. Crop news from the northwest is the feature new agitating the wheat trade the world over. Recause of the conflicting reports of losses from black rust traders are slow in conflicting

clow in making large commitment on either side of the market.

Frimary receipts of new wheat are failing off and good export business is being done from day to day and a great deal more wheat has been sold aboard than is gen-

wheat has been sold aboard than is gentraily known.

Primary wheat receipts were 1,73,000
bushels and shipments were \$84,000 bushels.

Sold aboard than is gentels, against receipts last year of 2,522,000
bushels and shipments of 57,000 bushels.

Frimary corn receipts were \$22,000 bushels.

And shipments were \$22,000 bushels.

And shipments were \$22,000 bushels.

Alverpool closed unchanged to 4d higher on corn.

The situation in the corn belt shows some improvement since recent rains and cooler temperatures have been received, conditions on the whole are more favorable. Receipts continue light and interior points are paying good prices for their needed supplies.

The strange of the strange of their needed supplies.

The strange of the strange

Wheat Market Holds Up Well, While

Corn Remains Strong. Corn Remains Strong.

CHICAGO, July 31.—Nearly 7,000,000 bushels increase today in the adjustable supply of wheat burdened the market. Closing figures were at a shade to %c net decime. Latest trading left corn a sixteenth to %c easier, outs off 1/40/4c to %c and hog products varying from 12/40/15c lower

and low points touched by the September delivery turned out to be 41@41\(\frac{1}{2}\) c and 40\(\frac{1}{2}\) c. with the close at 40\(\frac{1}{2}\) c, a decline of \(\frac{1}{2}\) c. under Saturday night's windup.

In provisions there were signs that the shorts on near months had covered. Pork closed down 5c to 12\(\frac{1}{2}\) closed for ribs the outcome, as chalked on the boards, wobbled from a nickel off to haif that sum additional cost.

The sending futures ranged as follows:

to a rise of 2½c.

The decided enlargement of the visible supply made the total amount of wheat immediately available 41,316,000 bushels, an aggregate more than three times as much as there was on hand at the corresponding time a year ago. However, primary receipts today showed a large failing off. Interest seemed to lag when the seaboard announced no response to cable offers of exports, a condition which acted as an offset to estimates that the yield in Kansas would be surprisingly smail. During the session September fluctuated between 89%c and 90%c, closing firm but %c net lower at 89%c83%c.

Fine weather weakened the corn market. September ranged from 63%c83%c to the corn market. September ranged from 63%c83%c a net loss of %c. Cash grades were easier.

Heavy arrivals pulled oats lower. High and low points touched by the September delivery turned out to be 410%like and 40%c.

AT REGISTRATION PO AT REGISTRATION POINTS

Local Officials Notified that State Will Act If They Fail to Do Their Duty.

PIERRE, S. D., July 31 .- (Special.)-At former land registrations at different places in this state, the gambling element has thrived at the expense of those who gathered to register. J. W. Witten, the government representative in charge of the work, is determined that this shall not be the case in the registrations for Mellette and Bennett county lands, and has called upon the state authorities to assist In the work. After a conference on the part of Governor Vessey and Attorney General Johnson, they have decided to call upon the local authorities to use every means to prevent gambling at registration points, and have further notified such local authorities that any complaints in regard to gambling at that time will mean the sending of a special prosecutor from the attorney general's department to take up the matter of law enforcement, and that the local authorities will be held responsible for any failures on their part which will require action on the part of the state legal department, which may be caused by their failure or neglect to enforce gambling laws. In other words all the power of the state executive and legal departments will be turned loose on the situation where the local authorities are either unable or unwilling to cope with the situation.

STEEL CARS AND STEEL TRAINS Recollections of Changes in the Passenger-Carrying Equipment

of Railroads. In a recent isue of The Northwestern, the little employes' journal published by the railroad whose colloquial name it bears, there is printed a reproduction of a copperetched poster gotten out in 1877 to advertise the introduction of the "Hotel Car" on ioned Pullman interior, with the starting upper berths, the engrossed ceiling, the ornamental iron braces and the general evidences of our first reachings-out into the realms of the heavily ornate. At the dining-car tables is a remarkable row of notables, including among others Dom Pedro. Collis P. Huntington, John A. Logan, Samuel J. Tilden, "Lucky" Baldwin, Jim Flood and General Pleasanton. They serve to make illustrious the "Hotel Car"-which is a diner, a day coach and a sleeper combined-and also to emphasize the advertisement of the fact that it is run over "steel

ralls." The old poster is interesting because it illustrates the rapidity of passenger service development. Steel rails were worth advertising in the day of the "Hotel Car." In 1881, according to Poor's Manual, there were 81,471 miles of iron ralls to but 48,894

sright were 81.471 inner the street were 331,935 miles of 1975 of steel. In 1909 there were 331,935 miles of 1975 steel to a dwindling of 8,862 of iron.

And as the "Hotel Car" and the steel rail were the wonders of their day, so, for the moment, is the steel passenger car the wonder of today. The public hears of this latest and highest development in transportation equipment only when some road puts on an "all steel train" and adver-

ers in the use of solid steel trains, seem spurred on to further steel construction by their splendid new depots in New York.

their splendid new depots in New York.
The Great Western prefers steel for making up its best train to the north. The Northwestern is turning out steel day coaches and the Illinois Central steel sleepers, and so on.

By leaps and strides the railroads are advances and the Illinois Central steel sleepers, and so on.

By leaps and strides the railroads are advances are not through a smash-up almost free of the terrible danger of telescoping. It is equally clear that the fire perlithe worst accompaniment of a railroad wreckles is practically abolished. In daily use, too, a steel car will move with a swingang smoothness noticeably better than the ratting instability of a wooden coach.

All this costs. Take, for example, the "Olympian" and "Columbian." They seem to the public merely two trains. But, as a matter of fact, the seventy-two hour schedule to the coast requires equipment for ten complete trains. So for the daily operation of this lordly pair the road had to be up eighty-four coaches, forty twelve-section sleepers, twenty-eight baggage cars, eighteen tourist sleepers, two chair cars and nine buffet-observations cars—just 24s price of all-steel cars at from \$8.83 to \$18.90 to \$1.00 to \$1

tion. The cars are at least one-third heavier than the old style coach. This means that more fuel is needed to haul them. Whether these costs are to be compensated for by economy in repairs and length of life" remains to be seen. The average unenlightened layman may identify a steel car by the rivets that show siong the sides. Some of them have a new elliptical roof-like that on an English car-in place of the familiar American clerestory roof. But the rivet is the only unfailing mark of identification.-Chicago

abled cruiser was the United States revenue cattle, hogs and sheep at South Omaha for cutter Androscoggin, which was cruising in the vicinity. The Niobe's wireless call for help was picked up by the Androscoggin attle 565,118 545,37 20,521 for help was picked up by the Androscoggin by

delay in opening the trade and it was well along toward noon before much business had been done. Even at midday it was rather difficult to draw price distinctions as the market was plainly an all-day affair. Buyers fully appreciated the advantage a heavy run afforded, and after offerings had been properly sorted into fat and feeder strings, started out to purchase all classes of stock on a lower hasis. Chicago supply had size enough to encourage bearish efforts and early trade settled at 10520c declines.

Wethers had to be good to land around \$3.50, and the best article growers are able to produce would hardly get a bid better than \$3.75. Ewes sold at limited margins under wethers. Yearlings moved around and under \$4.50, indicating a quotable top of \$4.75. Lambs were decidedly uneven, good ones selling at \$6.50 and less. Extreme limit was placed at \$6.75 by most of the talent.

Receipts and disposition of live stock a Country buyers were in good attendance and the demand from speculators and through commission men was also fairly broad. Thrifty feeders moved readily -fter trade once started, prices ruling steady to the Union Stock lards, South Omana, for twenty-four hours ending at 3 o clock yea-terday:

7,636 5,063 CATTLE-There was a very fair run of

CATTLE—There was a very fair run of cattle this morning, but still receipts were short of the run last Monday by 1,000 head, and smaller than a year ago by 3,500 head. Receipts this morning consisted very largely of range cattle, there being several good choice strings of that kind on sale.

Buyers were all out in the yards in good season in the morning, looking for beef steers and anything at all suitable to kill sold very readily at good steady to strong prices. The trade might be summed us a good steady and active market. As high as \$5.75 was paid for cornfed steers, but the supply of cattle of that description was very light, most of the beeves on sale being western grassers.

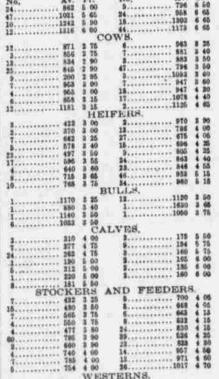

Cows and heifers were also in very good demand this morning and they, too, changed hands in good season in the morning! Spayed heifers from the range sold at \$5.25.

Stock cattle and feeders were in moderate supply as packers were inclined to buy

Stock cattle and feeders were in moderate supply as packers were inclined to buy pretty much everything that had any kill on it. The feeling in the feeder trade was fully steady and as high as \$4.85 was paid for range feeders.

Quotations on cattle: Good to choice beef steers, \$6.4006.80; fair to good beef steers, \$6.4006.40; common to fair beef steers, \$4.4036.00; good to choice heifers, \$5.0005.60; good to choice cows, \$4.6036.25; fair to good cows and heifers, \$3.7524.60; common to fair cows and heifers, \$2.250 3.75; good to choice stockers and feeders, \$4.6000.29; fair to good stockers and feeders. 14.00go.20; fair to good stockers and feed ors. \$4.00gd.60; common to fair stockers and feeders. \$3.2524.00; stock heifers. \$2.7523.70 veal calves. \$3.5047.00; bulls, stags, etc.

Representative sales:

Choice lights brought usual premiums, tops reaching \$7.00. Representative sales: struction there are added costs of opera-

Visible Supply of Cottom.

NEW YORK, July 21.—The visible supply
of grain in the United States Baturday,
July 29, as compiled by the New York
Produce Exchange, was as follows:
Wheat, 41,316,000 bu; increase, 6,922,000 bu.
Corn, 8,001,000 bu; decrease, 516,000 bu. Oats,
11,203,000 bu; increase, 1000 bu. Barley, 714,000
bu; decrease, 26,000 bu.
The visible supply of wheat in Canada
last Saturday was 6,018,000 bu., an increase
of 146,000 bu. symbols.—In the lift big run of sheep and lambs of the season arrived, about eighty-four loads showing up in all. Practically everything came from ranges and right around 80 per cent of the 20,000 estimate had plenty of flesh to qualify as killers, idaho and Wyoming furnished the big end of the supply and sheep arrivals outnumbered lambs by a ratio of about five to three. Classified, receipts consisted of something like thirty loads of lambs, thirty loads of wethers, ten loads of yearlings, and an odd dozen loads of ewes.

Several conditions caused considerable delay in opening the trade and it was well along toward noon before much business Cotton Market. NEW YORK, July 31.—COTTON—Spot, closed steady, 15 points lower; middling uplands, 12.50c; middling gulf, 12.75c; sales, 9,300 bales.

Visible Supply of Cotton.

Crop Conditions in the Black Hills

Drouth Completely Broken and Grazing Lands Are Again Available-

at this time, the result of heavy rains grazing lands which could not before be the usual quota of feed.

In the last two weeks rains have been frequent, and where other crops have been planted earlier the farmers are getting ready to sow corn, cane and millet, with the idea of getting plenty of fall feed. It is the general opinion that the drouth is now over.

While the grazing country up to this time country. The clip of wool was very heavy this part of the state.

Sowing for Fall Feed Begins.

BELLE FOURCHE, S. D., July 21 .- (Speal.)-The Bellefourche river, which has been dry for the last month owing to the continued drouth, is running full of water which have occurred in this part of the country, and west of here. The rains have filled all of the stock watering holes in this section of the state, and have made used again available. While the western country has suffered to some extent from the dry weather, there are thousands of acres which are irrigated and will yield

The stock situation is not at all bad

has been very short of grass, the herds have been moved, and if there is late pasture, which now seems certain, it will be in good condition to go through the winter. The usual shipments of grass fattened cattle will be light, and the shipments of stock cattle and feeders will be heavier, but most of the herds will be kept in the this spring, shipments from this city alone being nearly 2,000,000 pounds, and it was nearly 1,000,000 pounds from other points are in good condition and now that they can be moved again, the water holes being filled, the situation will be much better

CHARLOTTE, N. C., July 31.-With the big ponds which have furnished Charlotte's

water supply for many years mere stretches of sun-baked mud and the

regulations have been adopted. Special sanitary guards are being aworn in every day to patrol the city, along with squads of extra firemen, for the city would be absolutely at the mercy of the flames should a blaze start.

Hundreds are leaving Charlotte, flocking to the seashore and mountain resorts.

WOOD SCRAPS TURNED TO USE High-Priced Lumber Causes Un-Usual Economies in the

In these days of high priced lumber the utilization of the small pieces of wood formerly considered of little or no value assumes considerable importance. The Woodworker gives a number of uses for these scraps.

Millin.

Some furniture makers glue together small, clear pieces down to one inch wide and one foot long and find that they serve very well for the interior framework of bureaus, chiffoniers, sideboards and similar articles. Wheelwrights save the ends cut from

spokes and shape them in lathes for chisel gimlet, auger and other small tool handles. Wagon builders occasionally make use of scraps of hardwoods for lining brake blocks. Sash and blind makers save their scraps for match factories, on, if the pieces are large enough they are worked into corner blocks, rose blocks and balusters. Coopers recut broken or defective staves of the larger sizes and make kegs

or smaller vessels of them. Small headings are economically manufactured in that way. Occasionally defective staves and headings are made into dowels. Basket makers save the cores from which veneer has been cut and saw them into thin slats for baskets and crate covers. Brush manufacturers have made some headway in using waste from furniture *

factories, but the pieces are of so many sizes and of such irregular shapes that porch chair shop has been able to draw a considerable part of its raw material from the waste of hoat factories. Some of the makers on interior finish work their odds and ends of softwoods into small boxes and the hardwood scraps

are made into parquet floorings. Planing mills work scraps and broken pieces, unsalable in that form, into boxes for apples, medicines and other articles and into brackets, balusters, rose blocks and small quarter round moulding.—New York Sun

HOYT WILL SUCCEED CARTER

WASHINGTON, July 3L-Brigadier Gen eral Ralph Hoyt will succeed Major General W. H. Carter in command of the maneuver brigade in Texas when the latter is relieved August 15. General Carter with come to Washington to resume his duties as assistant chief of staff, relieving General Arthur Murray, who will take command of the Department of the West, with headquarters at San Francisco.

The large reduction in the number of troops in Texas has caused the abandonment of the original plan to rotate the various major generals in tours of duty

Bigger, Better, Busier-That is what consistent and persistent advertising will do for legitimate business.
