Some Believe Corn Yield Will Exceed That of Last Year.

CROP EXPERTS OPTIMISTIC

UTT SAYS 190,000,000 BUSHELS Conrad E. Spens is More Hopeful, Venturing the Guesa that 200,000, 000 Bushels Will Be Total 1911 Nebraska Crop.

"How much corn will be harvested in Nebraska this fall?" is the burning question in business offices, railroad headquar ters and even on the street corners.

believe there will be between 175,000,000 and 190,000,000 bushels harvested." declares J. E. Utt. general agent for the Rock lines in Omaha. "With normal weather from now on the crop will be close to 175,000,000 bushels, but with good rains, better than we usually have here, it will easily raise to 190,000,000 bushels."

Mr. Utt has made predictions on the amount of corn harvested each year in the first week in August and he is considered one of the best informed men on corn crops in the state.

Conrad E. Spens, general freight agent of the lines west of the Missouri of the Burlington, is more optimistic than Mr. Utt and declares that the crop will total 200,-000,000 bushels. It is a matter of private record that Mr. Spens' guess in 1910 was within 4,000,000 bushels of being correct.

Other men in Omaha insist that the crop will with normal weather come up to 210,-000:000 bushels, while those who do not be lieve in the strength of Nebraska to grow corn in the late summer and early fall and make a crop state that the crop will be 260,000,000 bushels. But with all the guesses it is a significant

fact that no one considers that Nebraska's share of the golden ears will be small this season. The division of opinion induces the one on the side line to believe that it will come up to nearly that of last year 196,000,000 bushels.

That the rains of the last few weeks will more than counteract the effect of the early summer drouth so far as the crop situation is concerned, is the opinion of S. E. Hoover of Highmore, S. D. Mr. Hoover, who is stopping at the Merchants is building a foundation for a new residence while in the city on business, is schleip mill.

South Dakota," said he on Friday at work building a house and other build"Things were awfuly dry and we were lings at the farm of William Streltz. "We will have good crops in our part of worried about it, but during the last two weeks we have had rains that have helped things out. These haven't been big ones, but we have had several rainfalls of from his home at Omaha.

"The corn looks as good as ever," continued Mr. Hoover, "and I believe the average crop will be harvested. The Thursday morning with a good rain. sunny weather has given it a chance to with more than ordinary speed, and if we have an average rainfall from now fall. on it should be well developed and out of danger from frost much earlier than
