Dr. Bigelow said that there are many cedents for the Rusby appointment. The embers of the referee board, forty-five charwomen of the department and many scientists are thus employed on annual ealaries to work part time.

#### American Band Opens at Courtland Beach

Forty Able Musicians in Organization Attracts Many Lovers of

Music.

The American band of Providence, R. I. opened an eight-day engagement at Courtland Beach last night. The weather was threatening and a large part of the crowd had been drawn away by the Nebraska Telephone company employes' picnic, but the audience that gathered to hear the opening concert of the music festival remained until the last number had been played, two light showers having no apparent effect.

Features of the concert were a cornet solo by Signor Taglialavore, both of whom were forced to respond to vigorous encores. The well known and ever popular Cavilleri Rusticanna, selections from "The Balkan Princess" and from "Tanhauser" and an arrangement of popular songs were other numbers that were especially well received.

Further Evidence of Confidence in Autumn Business.

STEEL TRADE GROWS GRADUALLY

In Cotton Goods Adjustment of Clothe to Raw Cotton Prices Continue to Be the Most Difficult

Problem.

The expansion in the demand for steel products continues very gradual. Strons competition is noted in finished lines whenever important business is in prespect and concessions in prices are reported. Rail-road buying is restricted, but conditions in the structural division are more promising, contracts for 15,000 tons of steel for local subway extension having been closed. Pig iron production demand feil largely below the output for June. A marked tandency toward firmness prevails east and an advance of 25 cents has been made in some markets at the south in deliveries extending through the year.

In cotton goods the adjustment of cloths to raw cotton prices continues the most difficult problem and is complicated by the greater curtailment at the mills.
