Voters Want to Know

Secretary of State Wall has received a letter from Louis Country asking him whether or not County Clerk George Higbee exceeded his authority when he placed his own name on three tickets at the primary election. Mr. Higbee was a candidate for re-election and he placed his name on three tickets on his own personal request, there being no petition from twenty-five voters of any of the three parties asking that his name be placed on the tickets. Secretary Wall has always informed candidates that they can get their names on only one ticket by a personal request, if a candidate desires his name on two or more tickets he must get voters of the parties he desires to represent to file a petition asking that his name be placed on their party ticket. Mr. Higbee placed his name on the republican, democratic and populist tickets as a candidate for county clerk. The office of clerk of the district court is combined with that of county clerk in Logan county. Mr. Wall has turned the matter over to the attorney general.

MEADOW GROVE TELEPHONE COMPANY IS IN COURT

Officers File Suit Against Secretary Stanton, Asking for an Accounting.

(From a Staff Correspondent.) MADISON, Neb., Aug. 22.—(Special.)—George R. Muffey, president, John Bohison, vice president and Peter Michaelson, treasurer, and members of the Board of Directors of the Meadow Grove Telephone company have commenced suit in the district court of Madison county against Warren L. Stanton, secretary and manager of the company, requesting that an accounting be had of all money received and disbursed by him and that all moneys in his possession be paid over to the treasurer of the company, and that in the meantime a receiver for the property of the corporation be appointed by the court. The petition represents that Secretary Stanton is now delinquent to the company to the amount of \$1,000.22, for which he has made no accounting, although same has been frequently demanded by the board of directors, that he has unlawfully tampered with the by-laws, and other papers, books and records, and has on his own motion pretended to call special meetings for the revising of the by-laws, and when such special meetings were not attended by any person but himself and wife, they pretended to make and adopt new by-laws, one of which was that Secretary Stanton should be the full and unrestricted secretary and general manager of said telephone company with full authority to make any indebtedness, collect and disburse any funds at his own option and without authority from the board or without the knowledge and consent of the board. According to the petition Secretary Stanton and his wife own 20 per cent of the stock of the company.

Mr. Kelley represents in his petition that on February 22, 1911, while he was operating a steam shovel for the defendant at Houghton, S. Governor Aldrich Would Amend the State Election Laws

Chief Executive Concludes that Candidates for Office Spend Too Much Money Getting Into the Game.

(From a Staff Correspondent.) LINCOLN, Neb., Aug. 22.—(Special.)—Governor Aldrich confirms the rumor that he will seek to have a bill passed at the next session of the state legislature placing the candidate's expenditures entirely under the control of the state. He says: "I most certainly shall recommend to the next session of the legislature the passage of a bill providing for the expending of campaign allowances by the state instead of by the candidates themselves. Particularly do I refer to the advertising campaign expense which was greatly misused in some instances, I believe, during the late primary campaign. General abuses of campaign expenses have grown to such an extent that they threaten to destroy the spirit and strength of our present primary system. If this thing is allowed to continue it will mean nothing more nor less than that the direct primary will become a worse vehicle for the special interests to ride in than was the old convention system."

(From a Staff Correspondent.) LINCOLN, Aug. 22.—(Special.)—Dr. G. R. Brownfield of this city has invented a new form of biplane, and, by eastern mechanics who are constructing it for him, it is claimed to be a successful innovation in aerial navigation.
