WHY CORN IS A REAL KING

Some of the Uses to Which the World's Crop of Four Billion Bushels is Put.

Corn is the king of the grains in the number of bushels produced and in all around usefulness. It is the foundation for the livestock industry in the United States. especially hog raising.

Corn is used directly for food by thou sands of people, in the form of corn bread, hominy and many excellent dishes. Indirectly it is the food for the entire meateating world, but aside from its food uses there are many others that many people have never heard about.

People who like to talk in millions and billions should revel in discussing the corn crop. Corn was the gift of the new world to the old. It probably originated in Mexand the average annual crop is about 4,000,-000,000 bushels. The United States furnishes two-thirds of that total.

Every year some new use is found for corn. In the old days there were only cattle and, in the shape of cornmeal, to became rancid.

From the germ, which is separated from the kernel in the milling process, the oil is extracted by chemical and mechanical AWAIT NEWS FROM MEETING processes and constitutes a product which is coming into use in the manufacture of

The vulcanized oil is used extensively in surfacing linoleum and olicloth and is applied to a number of other purposes. After the oil is extracted there is left a valuable residuum known as corn off cake, which is sold here and abroad and is used in the fattening of sheep and other animals. Nearly fifty million pounds of this material are annually shipped to Great Britain and Germany and there used by farmers, who find it cheaper than materials of a similar nature which they can grow

Claimed, Need Feel No.

Alarm.

NEW YORK, Sept. 11.-While thousands are starving in China and France is behigh cost of food, there is renewed attention in this country to the fact that sugar has reached its highest point in twelve years; that coffee is soaring, and in the field. In view of this householders are asking themselves:

"Will this winter see a recurrence of the enditions of 1909-10, when the cost of living reached its apex and decimed slowly mly after many so-called boycotts against meat and other high-priced commodities were declared throughout the land?"

To this question economic experts seen here today say no. No commodities will e higher they say, except in some intances, than those of last winter, but they add that the man who sets his table with plain everyday fare, avoiding fancy brands and near tuxuries, may await the approach of cold weather without undue anxiety. It is pointed out that, generally speaking with the exception of coffee. sugar, potatoes and a few canned vegetables, the present month for September was ushered in with conditions more favorable to the consumer than the case a

The average family steak costs about 28 cents a pound, as it did last year, though experts say that with all feeding crops short, it is not unlikely that beef will go higher as the winter progreases.

The cost of poultry will be largely determined by cold storage holdings. Indications are that the shortage of potatoes is serious, not only in this country, but in Great Britain and Germany. In the fall of last year one could buy good potatoes in the field at 55 cents a bushel; today the Canned peas, beans and tomatoes also will be higher, but rice remains cheap and, unless there is a marked advance in pork. can provie for his family without serious

WOULD-BE LAWYERS CUT DOWN Aspirants for Bar Honors Subjected

to Pierce Examination in New York.

Would-be lawyers who took the recent Isabelle S. Paul. Society's Authority on Beauty Culture, extends a cordial invitation to the women of Omaha to meet her Friday, September 15, at 2:30 p. m. in the Lyric theater. We have gone to great expense to secure for the ladies of Omaha Mrs. Paul's presence at this time. Her practical beauty talks on common sense ways of self-improvement have been enthusiastically received the country over and we count ourselves lucky in securing Mrs. Paul's service so early in the season.

This is a personal invitation for you to be present par examination in New York City were plucked by the hundreds, and the straggling 15 per cent or so who were able to survive the severest legal ordeal ever imposed are of the committee. still on tenterhooks.

Not only were the questions unusually searching scrutiny as to their moral character before they will be admitted. The young men are very busy now getting affidavits from every source that they are all right, and at the same time they are appre-It opens to you an uncommon opportunity. Arrangements have been made whereby you may have the privilege of hearing Mrs. Paul free—no admission will be charged and comfortable seats will be provided for everyone. A novel feature of Mrs. Paul's visit will be the free distribution at her lecture of ten Marinello Beauty Culture Outfits—valued and sold regularly at \$10.00 each.

These complete home treatment outfits contain every tollet article necessary to successful left beauty culture. If you will watch the columns of this paper you will learn the method by which ten lucky women will secure these outfits as an absolutely free gift. Watch for the lucky coupon, fill in your name and address—take it with you to the free lecture hensively waiting the reports of detectives and process servers who are on their trails. Eight hundred presented themselves for the examination held in Grand Central palace. and of these only 128 received sufficiently high markings to put them in the passing class. They get no certificates unless they are approved on the final returns of the investigators of character and reputation. The fact that there were seventy-two disbarments last year for frregular conduct is At the Lyric Theater largely responsible for the vigilance of a which it is co-operating.

Omaha, Friday, 2:80. Remember the value of Mrs. Paul's lecture, the value of the free outfits.

These are prepared by the Marinelle Company of Chicago-originators and sole exponents of the famous Marinelle System of beauty custure—a movement that has done more to increase and retain beauty in women than any other known method. Remember the date, Friday, September 18, and place, Lyric theater. Watch the paper every day for future announcements.

There is no obligation on your part—lecture and outfits are absolutely free. This is the gift of the Marinelle Shop to the ladies of Omaha.

NO ROMANCE IN GOLD MINING

Individual Effort Overshadowed b Mining Companies in Alaskan Diggings.

"There is no longer any romance in gold mining. While it is possible for a poor man to go to Alaska and make a fortune if he happens to strike it rich, still, the successful mining is being done by com-40 seconds. The incident serves to show C. C. Webster, just back in New York

arrived, and it has practically supplanted the old method of working the dirt by hand. This has necessitated the building of costly ditches, but it has also opened up new fields, for dirt which yields only 12 or 15 cents a cubic yard can be worked profitably, while under the old method it meant over a good portion of the route. Yet the failure to handle dirt which yielded less than \$3 or \$4 a yard.

"Then, again, the country along the oast is being settled. The towns in the equipped as the smaller cities in the eastern states. There is no more outlawry or disorder. Life is as safe in the Alaskan thing remains to make the life picturesque and exciting as it was during the rush to the Klondike in 1899. The country is bewhich have shrunk the earth to the size coming civilized, and there is nothing like civilization to dispel dismal romance. "The Nome country is the greatest pro-

ducer of gold in the world, and the most successful mining operations in the world are being carried on there. The gold-laden sands of its beach and its creeks and gulches have increased the wealth of the United States by more than \$30,000,000, and experts declare it will multiply its output 100 times before it is exhausted.

"The rich strikes of scores of prospectors

Stop

\$1.00 Everywhere.

have made the Nome district (amous, but by far the larger amount of gold has been taken out gradually in small amounts Seven men took out \$421,000 in sixty days from the Portland Beach claim, but that was an exception. Gold has been discovered in paying quantities in practically every stream in the Nome district, as well as along what is known as the third beac: line, and thousands of acres have been located for placer mining purposes. Man, of these mining claims have been worked profitably for several years by the primtive method of shovelling into sluce boxes

"This is a very expensive method, be cause labor costs \$5 a day in addition to \$2.50 a day for board. As one man can handle only three cubic yards of dirt of large share of the profits is eaten up. The dirt is shoveled into sluce boxes through which water is turned. The gold dust set ties on the floor of the box and can easily be collected. Occasionally small nuggets are found, but the greater part of the gold is found in the form of dust. When this s very fine, as it is when found along the coast, mercury is placed on the floor of the sluce boxes to carch it. Later the mercury is separated, leaving the pure gold. As long as the dirt runs above \$4 or \$5 this method is practicable, although extremely wasteful.

These conditions existed for many years but a great change has taken place. There are several lines of steamships plying between California and Nome, and two railroads run several hundred miles into the interior. A few years ago it cost 50 cents a pound to bring freight of any kind into the Nome country. Now it costs less than \$17 a ton. This has enabled capitalists to build the reservoirs, ditthes, flumes and pipe lines, which are absolutely necessary for hydraulic mining. Often this necessitates the combination of several lo cators, who unite their interests for the common good of all concerned, and the manner usually adopted is to form a company. So the largest share of the mining in the Nome country today is being done by companies, although it is possible for prospectors with a moderate amount of capital to work their own claims by buying water from the owners of the ditches. Water sells at about \$1.50 a miner's inch per day, and it is a source of great revenue to the owners of the water rights.

By this hydraulic method the dirst is forced into a huge sluice box and washed down to a dump. The particles of gold settle on the floor of the box, where they are easily collected. The stream of water is so powerful that it will cut down cliffs and move huge boulders, and, of course it forces an immense amount of dirst into the sluices. A cubic yard of dirt can be handled in this way for 6 or 7 cents. When this figure is contrasted with the \$2.50 i costs to handle it by hand, the advantage of hydraulic mining is evident.

"Several other methods are employed in mining gold in the Nome district, but the hydraulic method is far superior and less expensive than any of them. Of course, during the winter months all operations have to be suspended, but from the first of June until late in October the temperature is comparatively mild and the daylight twenty-four hours long. The gold is in the ground. It is simply a question of getting it out .- New York World

EIGH TTHOUSAND TO MISSIONS

Christian and Missionary Alliance ut Boone, Raises Big Sum in Short Time.

A CURIOUS WAGER

Mr. B. a well known local attorney. with offices in one of the large down town buildings, lost a bet of \$25 the other day under circumstances that were to say the least, unusual. Always intensely appreciative of the good things to eat. Mr. B. had, for saveral years, been in the habit of patronizing several of the large hotels for his midday luncheon. On this occasion he was lamenting the fact that an important engagement would necessitate his missing his luncheon, when his partner, and Mr. C. pulling out his watch said. "Why, Tom we've got twenty minutes. that's plenty of time where I go." "No thanks," Mr. B replied, "not any of that burry up stuff for mine. I'd

and after surveying and making a sentection from the dainty array of viands which were spread out in plain view, they were served in just a little over a minute with a repast that Mr. B was compelled to admit was better than anything that the hotels had to offer and, as the check was just a little less than half of what he had been accustomed to paying, he was compelled to hand over the \$15 to the gloating Mr. C. "Never mind Jack." Mr. B said, "this is one of the times when I win by losing I'll pay the same money anytime, to anybody that will steer me up against anything so good and so reasonable as this Quicksery."
