

IOWA BANKS HAVE CASH

Nearly Six Million Increase in Deposits in One Year.

LEGAL RESERVES STRONGER

More Students Than Ever Are in Attendance at State Institutions of Learning in Hawkeye State.

(From a Staff Correspondent.) DES MOINES, Ia., Sept. 22.—(Special Telegram.)—Deposits in the 1,000 banks under the jurisdiction of the state banking department increased \$5,777,714 in the year from September 14, 1910 to August 30, 1911. The gain in deposits between May 29 and August 30, amounted to \$2,919,047. These gains are the largest which have been recorded for similar periods in some years and show a uniform prosperity in Iowa such as has not existed in some years in this state.

While the banks have reduced the amount of their bills receivable they have at the same time strengthened their legal reserve. This is regarded by the state bank officials as a most encouraging sign.

More Students in School. Reports received at the office of the State Board of Education show that in these educational institutions is a larger enrollment of students than ever before. It was stated that the state teachers' colleges at Cedar Falls will hold the banner for the percentage of increase.

The state university at Iowa City shows an increase from 1,800 to 2,400 students over last year. The state agricultural college at Ames also shows a notable increase.

Chop Sues House Rights. Operators of a chop suey restaurant, which is located over the leading saloon of the city have gone into court to find out if they have a right to serve dinner to women the same as men. The owner of the saloon has placed an injunction on the restaurant to prevent women from going there.

ENFORCING ANTI-TRUST LAWS

Statement of Position of Government Toward Illegal Combinations. RESTRAINT OF TRADE MUST STOP Department Will Not Undertake to Act as Universal Counsel for Trusts—May Consider Reorganization Plans.

WASHINGTON, Sept. 22.—Recent reports to the effect that attorneys for large combinations of corporations and their principals also were hoping for some general understanding with the government authorities concerning the application of the anti-trust law and that some of them had gone to the attorney general to ascertain what action, if any, may be necessary to make them stand right in the eyes of the government was the subject of much discussion here today.

The Associated Press is in a position to state the following as the attitude of the Department of Justice: "The position of the attorney general is that since the decisions of the supreme court in the oil and tobacco cases, the area of uncertainty in the law has been greatly reduced and the meaning of the statute in its application of great monopolistic corporations made clear, and this makes it necessary for those combinations to resolve themselves into a number of distinct separate entities, no one of which will be in itself a combination in restraint of trade or threaten monopoly. How this shall be done is, of course, a separate problem in each case—a problem which, in the first instance, those in control of the combinations and their counsel must work out.

Not Adviser of Trusts. "The law department of the government cannot undertake to act as universal counsel for the trusts. It is preparing to bring before the court all the combinations which appear in clear violation of the law. If the courts agree with the government's view they will doubtless follow the precedents set by the supreme court in the tobacco case, and by the United States circuit court in the Third circuit in the powder case, and decree the combination to be illegal and give to it a reasonable time to reorganize in conformity with the law, under penalty of injunction or receivership if it should fail to do so.

The plan of reorganization must be such as the government may acquiesce in; or it would be compelled to oppose its approval by the court. But the final approval is for the court to make. Harvester Case Cited. "In the case of the Harvester company, that corporation voluntarily submitted to the government its plan of reorganization before suit was brought, and while not going so far as the officials of the Department of Justice considered it should go, the representatives of the Harvester company evinced a willingness to conform, if possible, to the views of the department and to make such changes as it should deem necessary to comply with the law.

One Boy Killed and Another Badly Wounded. BROKEN BOW, Neb., Sept. 22.—(Special.)—Information was just received here of a fatal accident that occurred yesterday at the home of Fred Snider, a farmer living near Milburn. Mr. Snider was coming from work when he saw some prairie chickens. He sent one of his sons to the house for a gun. As the boy, followed by two smaller children, was returning carrying it over his shoulder the weapon was accidentally discharged, killing one of the children, a boy, and seriously wounding the other. The Snider home is some distance northwest of here and details of the tragedy are meager.
