

OPPORTUNITIES ARE OFFERED

Government Lands in Northwest Still Open to Entry.

LAND VALUES ARE REASONABLE

Improved Tracts Are Held by Big Owners, Who Are Not Able to Adequately Cultivate Such Large Areas.

The Northern Pacific states offer advantages and opportunities to the homeseeker and farmer that are not excelled. The group of states referred to embraces North Dakota, Montana, Idaho, Washington and Oregon. There still remains government lands that are open to homestead entry, and there are vast areas of rich agricultural land that are for sale at low prices, offering opportunities adapted to the means and tastes of all classes of agriculturists. The irrigable lands which are already supplied with water, and also those which are as yet unimproved, wait the farmer, orchardist and gardener. Lands that are not capable of irrigation, but which are capable of profitable cultivation by modern methods, and which have been proved capable of a very high and profitable productiveness, can be had in large or small tracts at the will of the settler, and in proportion to the capital desired to be invested. Unimproved, de-forested lands, which are possessed of a fertile soil as any on the North American continent are available to homeseekers at prices that are little more than nominal. Farm lands that have been improved to greater or less extent can be purchased at very reasonable prices and on terms to suit almost any desire of the purchaser. Improved lands are often held by parties who own large tracts and who for various reasons are not able to adequately cultivate so large areas. Many such land holders are offering their holdings on terms and in parcels to suit purchasers.

Satisfied, happy and prosperous farmers, stock raisers, orchardists and gardeners, from all parts of the United States and Northern Europe, are living in various parts of the states of Montana, Idaho, Washington and Oregon, who have been attracted by the success of other settlers whom they had known and whom they followed to the promising fields that these states offer. People from any state, or from any country in Northern Europe, can find opportunities to secure for themselves desirable homes in communities made up largely of settlers from their own state or country, and often from their own neighborhood. People desiring to settle in communities where any particular religious faith or nationality predominates, can with little inquiry generally find what they want. Persons who are ambitious to pursue any particular kind of farming or to practice any form of intensive agriculture, can be directed to localities where the climate and soil conditions are such as are required, where transportation facilities are as good as could be desired, and where markets, the best in the world, are within accessible distances for every manner of product.

The demand for all dairy and poultry products, small fruits and vegetables, has never been anywhere nearly supplied by the local production. Farm food products are every year carried to the cities and towns of these states from the central states of the Mississippi valley and eastern states, to supply the local demand.

Bee King Causes the Crowds to Wonder

Prof. Frank Odell, the King of the Bees, has proven his right to the title by entering a screened cage at the Coliseum and uncaring a swarm of bees. But he did not uncare them and then walk out of the cage. He scooped them up in his bare hands, opened his shirt front and put a handful against his bare skin, took off his hat and filled it with the buzzing insects, put them in his mouth and performed a series of feats that would have meant death from poisonous stings to anyone else.

And all the time the professor was playing with his "subjects" he talked, explaining the life of the bees and accrediting them with more intelligence than the common insect possesses. At the conclusion of his demonstrations, which were witnessed by hundreds of people, he explained it all by psychology, saying that the confusion accompanying his rough handling of the bees caused them to congregate into groups and "discuss what had happened," but the crowd, seeing that the bees were not always "confused," is still wondering.

Bee Wizard Likes Omaha Land Show.

Prof. Frank Odell, King of the Bees, thinks the Omaha Land show is "the nearest, best and most comprehensive exhibition of farm products," he has ever seen, "and I've seen a few," said the wizard reminiscently.

Prof. Odell spends his time between acts visiting the various booths discussing lands and land values and soil compositions with the exhibitors, and takes an intense delight in the artistic arrangements of the exhibits.

SUPERINTENDENT INDUSTRIAL SCHOOL DOES LAND SHOW

Superintendent C. B. Manuel of the state industrial school for boys at Kearney, has been attending the Prison congress, but Wednesday afternoon he "made" the Land show with Mrs. Manuel an interested member of the party. The superintendent was surprised at the variety and scope of exhibits. "This Land show is doing a good work," he said, looking over the Coliseum from the vantage point of the stage. "It presents the resources of states and localities in states in an impressive manner and also provides a means for probable investors securing first hand information in a reliable manner."

Woodmen Circle Banks High. The Woodmen Circle, the fraternal order for women, which is also located in the Woodmen building, at Sixteenth and Howard streets, has an important place among the similar orders of the world and ranks very high. Its business has increased greatly during the last few years, until today it has one of the largest memberships among the fraternal organizations.

Running up and down stairs, sweeping and bending over making beds will not make a woman healthy or beautiful. She must get out of doors, walk a mile or two every day and take Chamberlain's Tablets to improve her digestion and regulate her bowels. For sale by all dealers.

Wireless Messages Flash at Coliseum

Dr. Frederick Millener, the wizard of wireless transmission of sound, last night gave his first exhibition of the Union Pacific company's wireless telephone system, it proving one of the big attractions at the Land show. The Union Pacific booth is located near the center aisle, about midway of the building, and here is placed all of the mechanism of the system. Forty feet above the floor are the wires transmitting the sound. In order to convince the public of the efficiency of the wireless system, Dr. Millener provided numerous "head phones." Each was connected with the steel rod of an umbrella, another wire connected with the head 'phone, being carried in the hand of the party desiring to make the test. All evening men and women walked about the interior of the big hall, holding aloft raised umbrellas and wearing head 'phones, while 30 and 30 feet away, talking into his transmitter, and Dr. Millener was engaging in conversation with them, the sound being carried up to the overhead wires, carried along over them, and then caught by the umbrella antennae and transmitted through the head 'phones.

DEBATING SOCIETY STARTS SEASON OF ACTIVITIES

The Webster Debating society of the Omaha High school Wednesday afternoon, elected officers as follows: President, Justus Ingalls; vice president, Harry Gideon; secretary-treasurer, Carlyle Allen; sergeants-at-arms, Harold Landerson and Hilliard Holbrook. Edward Perkins was elected as a representative of the society to the Booster's club and Mr. E. E. McMillan of the faculty was unanimously chosen as head teacher. George Grimes and Edward Perkins were appointed as a program committee. Arrangements will be made to hold evening meetings at the Young Men's Christian association so that freshmen members may be enrolled. It was announced at the meeting that debating would be one of the most important of the school activities this year, and that Prof. C. E. Reed, vice-principal and athletic director, intends to secure a good debating coach for the lads who are interested in the work.

BREAD IS CLEANER THAN EVER BEFORE

There was a demonstration of canned goods at the household economics department of the Women's club Thursday morning, at which the members tasted the fruits and vegetables and passed judgment on them. Some of the women maintained that, considering the time spent in putting up, it is better to buy goods ready prepared. Others asserted that home-made goods are more satisfactory.

Mrs. Harriet MacMurphy, Nebraska pure food inspector, who has been making the rounds of the Omaha bakeries, assured the women that they can buy cleaner bread now than they could two years ago.

IS IMPORTANT TO CATER TO THE BUSINESS MAN

Miss Jeannette M. Drake of Sioux City in her paper on "The Library and the Business Man," read at this morning's session of the state library meeting said that if a business man who is seeking information on a certain subject fails to find exactly what he wants on first inquiry he is likely not to call a second time, and she emphasized the importance of catering to the needs of the business man.

Miss Anna V. Jennings, librarian of the Kearney State Normal library, has a paper on "Public Documents in the Small Library" and Miss Florence Smith of the Omaha library conducted a round table.

The Merchant Who Has the Goods is the One Who Lets the Public Know it through Advertising in The Bee.

HOFFMAN FOUND DRUNK, ASSERTS HE WAS DRUGGED

E. T. Hoffman of Wyoming reported to the police that he was drugged and robbed of \$4. Hoffman was found unconscious by the police in a coal bin at the rear of the Murray hotel, Fourteenth and Harney streets. Hoffman said he was drinking early in the evening before the saloons closed. He said he met a couple of young men who they joined forces along the bar. Hoffman could not state how he came to be in the coal bin. He said when he was drinking with the men early in the evening he had about \$4 on his person, which was not there when he was searched at the station.

HANDS WOULD BURN LIKE FIRE

Could Lay Pin in Cracks. Four Long Years of Eczema. Only Relief in Scratching. Used One Set of Cuticura Remedies. Hands Entirely Well.

"I can truthfully say Cuticura Remedies have cured me of four long years of eczema. About four years ago I noticed some little pimples coming on my little finger, and not giving it any attention, it soon became worse and spread all over my hands. If I would have them in water for a long time, they would burn like fire and large cracks would come. I could lay a pin in them. After using all the salves I could think of, I went to three different doctors, but all did me no good. The only relief I got was scratching.

"So after hearing so much about the wonderful Cuticura Remedies, I purchased one complete set, and after using them three days my hands were much better. To-day my hands are entirely well, one set being all I used." (Signed) Miss Etta Nerber, R. F. D. 2, Spring Lake, Mich., Sept. 28, 1910. No stronger evidence than this could be given of the success and economy of the Cuticura Remedies in the treatment of torturing, disfiguring humors of the skin. A single hot bath with Cuticura Soap and a gentle anointing with Cuticura Ointment are often sufficient to afford immediate relief in the most distressing cases and permit rest and sleep when all else fails. Cuticura Soap and Ointment are equally effective in preserving, purifying and beautifying the skin, scalp, hair and hands. Although Cuticura Soap (25c.) and Cuticura Ointment (50c.) are sold throughout the world, a liberal sample of each, with 32-p. book on the skin and scalp, will be mailed free on application to Potter Drug & Chem. Corp., Dept. 23, Boston, Mass.

Buffum, Wyoming Burbank, Lectures at the Land Show

When an agricultural tenderfoot invades Wyoming the first great man he hears about is Prof. B. C. Buffum, and just as likely as not he will be told that the professor has accomplished the marvelous feat of cross breeding the prairie dog with alfalfa and produced an edible muskrat. That might be so, but it isn't.

PROF. B. C. BUFFUM.

Prof. Buffum, though, has performed wonders, and he has come to be known as the Burbank of Wyoming. He is at the Land show giving lectures daily, and giving valuable information to all visitors. Prof. Buffum is not in Who's Who, but he is a plant breeder of more than ordinary distinction. In the course of his experiments Buffum got hold of winter emmer, a grain often wrongly designated as spelt. By throwing winter emmer under unusual conditions of soil and treatment, its appearance, habit and constitution were so disturbed that several mutations or "sports" were secured, and these are so far beyond the original that one would hardly recognize the new product. The new grain partakes of the nature of alfalfa and emmer. Some single heads have been grown which weigh half an ounce. Prof. Buffum is one of the most interesting persons at the Land show.

MOTHERS' SELF-CULTURE CLUB IS ORGANIZED

A Mothers' Self-Culture club was organized Wednesday afternoon at Westminster Presbyterian church following a talk by Mrs. Edwin R. Weeks, vice president of the National Congress of Mothers, on "Child Welfare." The club will meet on the second Wednesday of each month at the church to study child welfare in home and school. Mrs. McMillan Jones was chosen president, Mrs. W. P. Metzger vice president, Mrs. George M. Strain

PERSONAL PARAGRAPHS

J. M. Sowers of Ridge, Mont., is in Omaha arranging for the sale of several hundred head of cattle. John T. Beamer of Washington, Ia., is here on business connected with Texas land and immigration. Mr. and Mrs. V. A. Jack of Blair are visitors here this week. The Land show being the attracting medium. S. B. Mardis and daughter of Lewellen, Neb., are registered at the St. James hotel. Mr. Mardis brought his daughter here for treatment for appendicitis. secretary and Mrs. B. K. Beach treasurer.

FARM MACHINE MODELS SEEN

Interesting Exhibit Displayed by Beatrice Iron Works.

ONE IS IMPROVED CULTIVATOR

In This Machine Are Combined Improvements Which Eliminate the Faults of the Old Cultivators.

J. A. Smethers has installed an exhibit in Machinery hall at the Land Show, which is unlike the exhibits of any other firm of implement manufacturer and dealer. The exhibit is from the Beatrice Iron Works, Beatrice, Neb., and consists of several models of farm implements handled by the company. The exhibits are displayed in an ordinary show case. Mr. Smethers calls the attention of patrons of the Land show to one cultivator in particular which he says is made for the 1912 trade and differs from all other cultivators. It is a combination riding and walking cultivator, and its longitudinal shifting beams represent an entirely new principle as adapted to cultivators. The beams move forward and backward longitudinally with the movement of the team. Each horse pulls one gang, and half of the weight of the machine and operator. Not more than half of the load can be shifted on one horse at any time, a fault common with many cultivators. The longitudinal movement is accompanied with such ease that there is no whipping of the tongue from one side to the other and it is made easy on the horse's shoulders by eliminating all "jerky" motions. Easy to Turn. The beams are so arranged as to be easily raised at the ends for turning in the field by a shifting of the operator's weight. It is claimed that while the lateral shifting beam is not a new principle it is now as applied to a riding and walking cultivator. The beams may be shifted close together or wide apart by a lever within easy reach of the operator at all times. The majority of the cultivators manufactured are shifted near and away from the rows by the operator, who uses his feet for the purpose. Mr. Smethers not only claims the im-

provements mentioned but says that the seat is cushioned being so arranged that the weight of the operator balances the cultivator gangs and makes riding as easy as sitting in an ordinary chair. The same device which balances the gangs, gauges the shovels to any desired depth and raises both beams while the cultivator is in motion for shaling off trash. The Glad Hand removes liver inaction and bowel stoppage with Dr. King's New Life Pills, the painless regulators. 25c. For sale by Beaton Drug Co.

Crossett Shoe advertisement featuring an illustration of a shoe and text: "Crossett Shoe 'MAKES LIFE'S WALK EASY' Lace or button—you'll find both in the new Crossetts. No. 137 is a business-like style for the young man. Plenty of snap here, also in No. 2621—a winter tan and a just-right button model. See all the Crossett styles. \$4. to \$6. everywhere. Lewis A. Crossett, Inc., Maker North Abington, Mass."
