The question of a true religion is so very vital to mankind that every one should give it the most searching and intelligent analysis. A true religion is essentially a religion of truth.

Truth properly defined is the actual state of being, which state is known only to that creative intelligence that brought it forth. This creative intelligence being the absolute and infinite wisdom of the Creator, truth becomes impossible to the comparative and finite wisdom of man. I. therefore, contend that Roman Catholiciam is not the world's true religion, and is not even a true religion. The world does not possess such a phenomenon. Every church dedicated to the worship of God has in its religious teachings comparative truth in proportion to the intelligence of its worshipers to conceive God. ## **Column Finders and Paragraphers on Typewriters**

The Smith Premier machine is equipped with a column finding, column skipping and paragraphing device suitable for instantly setting the carriage at any one of several predetermined column positions.

Four keys at the right of the key-board, numbered 1, 2, 3 and 4, work in connection with four adjustable stops on a graduated rack at the rear of the machine.

This device is valuable for quickly setting the carriage at any one of the several fixed indentations, or paragraphs, as in addressing envelopes or paragraphing in correspondence, tabulating or doing work in columns.

The rack bar is reversible, so that two sets of stops may be set up for various forms covering eight column positions.
