

Nebraska's Leading Crop

Advance information concerning grain crop statistics which has been compiled for the year 1911, has been given by Deputy Labor Commissioner Gure. In his report he points out that the corn crop this season was less in bushels than it was a year ago, but the price is higher. What was lost in production was gained on price, making the value of the corn crop the same.

The bulletin of the labor commissioner will show that the production of winter wheat was greater this year than it was a year ago, and that the value of the 1911 crop exceeded that of the previous year by \$4,000,000. The total value of all crops, according to the labor commissioner, will show a slight increase over that of last year.

Because of the rapid strides made in fruit growing, a separate bulletin is to be issued. Just what increase this year will show over a year ago will not be known until the bulletin is published. Mr. Gure says: "The 1911 report, while being slightly below the general average yield seems to be gained through the advanced price and our enormous gain in fruit crops, hence the total value of our 1911 crop will be slightly in advance of the 1910 crop."

"The rapid strides made in fruit growing have necessitated the getting out of a separate bulletin on this subject and the total result of the fruit crop for 1911 will not, therefore, be known until this bulletin is completed."

"Upon the five principal crops, namely, corn, wheat, oats, rye and barley, we find the following as compared with the crops of 1910:

Year	Acres	Average Yield	Product's Bu.	Value
1911	6,718,085	21.45	143,990,303	\$67,310,190
1910	6,588,088	22.4	147,522,138	\$7,877,546
WHEAT				
1911	2,951,108	13.57	40,036,573	40,938,573
1910	2,751,094	17.05	46,877,525	56,556,751
RYE				
1911	134,467	11.03	1,477,941	5,676,941
1910	135,972	12.44	1,691,517	4,079,968
OATS				
1911	2,312,610	13.55	31,306,568	12,514,343
1910	2,543,828	16.41	41,742,877	17,989,096
BARLEY				
1911	86,887	19.31	1,678,211	697,731
1910	71,529	16.42	1,172,648	490,539
HAY				
1911	85,015	18.50	1,572,773	595,999
1910	118,937	19.30	2,303,199	1,072,384

"It will be noted that the estimate on valuation for corn, wheat, oats, rye and barley for 1911 and 1910 was based upon the current market value of crops at date of compilation, which for 1910 was 50 cents, 90 cents, 25 cents, 60 cents and 40 cents, respectively. For 1911, 65 cents, 40 cents, 75 cents and 50 cents, respectively."

UNCLE SAM'S LOAD OF COIN

What He Could Do with His Golden Hoard if He Felt that Way.

Some very interesting figures regarding the gigantic hoards of gold in the strong boxes of the United States government have been given out by officials of the Treasury department at Washington. It is not exactly the vast amount of this gold, but the possibilities of what we could do with it—if we had it—that makes it all so interesting.

In round numbers there is something like \$1,500,000,000 in gold in Uncle Sam's strong box. If, for instance, he so desired he could build for himself a golden pathway from the Atlantic to the Pacific coast of 45 gold pieces placed end to end, and when he reached "Frisco" he would have a few left over to "sit in" at a "friendly game."

More than one billion dollars of this great mass of gold is in coin, the remainder in bullion. Russia comes second with a gold reserve of \$600,000,000, and France comes trailing along in third place with about \$200,000,000. And at the rate that Uncle Sam is piling up his gold eagles he will soon have twice as much as either Russia or France.

If all the gold in the United States treasury was in 25 gold pieces and if these were placed in a straight line, end to end, they would reach a distance of 2,319 miles. If in 20 gold coins placed end to end they would reach from New York City to a point a hundred miles or so west of the Mississippi river.

The gold reserve in 25 gold coins placed so as to cover a square area would make a golden field two miles square, or four square miles, or a mere trifle of 2,500 golden acres. If the 25 gold coins were stacked banker fashion they would make a pile 175 miles high—New York World.
