Successful Complexion Renewing Treatment

(Journal of Hygiene.) A treatment for sallow, muddy or blotchy complexions that is always successful is the nightly application of plain mercolized wax for from one to two weeks.

The mercolized wax, which can be had at any drug store, is applied the same as cold cream, but not rubbed in, and washed off in the morning.

Suppose You Were a Miller, Madam— And you bought choice wheat— Then washed and brushed and scoured it— Then ground it 20 times, through 20 rolls— Then sifted the flour 10 times through silk, so that none but the cream came through— All this without added price. Suppose you did that. Would you consider a housewife fair to herself if she failed to get that flour? That's what we do with Gold Medal—and more. We even run a test kitchen, where we bake up samples of each day's run. Just to be certain—all the time—that every sack of Gold Medal equals the best ever milled. You can get that flour from any grocer if you'll only remember. Don't merely say "flour." Say— WASHBURN-CROSBY'S GOLD MEDAL FLOUR

You may have an idea that wiring your home for electric light means tearing up the premises and will cost a great deal. This impression is wrong. Local electric contractors and our company are pulling together in the effort to make this city one of the best lighted in the state. The merit of Electric Light is strong enough to make its own way, if you give it half a chance. Co-operate with us to the extent of looking into the subject—that's all we ask.
