

GRAIN AND PRODUCE MARKET

Both Sides of Wheat Trade Close Year with Beats on Top.

CORN TRADERS ARE PLEASSED They Like Uncertain Position of December Option to Be Closed—Reported Much Long Corn Could Not Be Filled.

Both sides in the wheat trade closed with a gain in the position, the bears having the best of the argument, sighting a very large exportable surplus from Argentina, which will soon be moving, and the big domestic visible supply, which has no adequate demand to move it. Bulls are pointing to the strong northwest situation and the firm cash conditions, with strong belief in better demand after the first of the year.

Conservative corn traders are pleased to have the very uncertain position of the December option closed. The final very strong turn in that month would have shown much long corn that could not be filled. The situation will be governed by the weather and clear, cold conditions will mean a large run in wheat.

Wheat was dull and little trading was indulged in. Futures sagged, but the cash values and the position of the market were strong, selling higher.

The shorts in December corn were forced to run values skyward, while the covered futures held steady. Cash corn was strong, selling higher.

Primary wheat receipts were 100,000 bushels and shipments were 100,000 bushels, against receipts last year of 100,000 bushels and shipments of 100,000 bushels.

Clearances were 20,000 bushels of corn; 500 bushels of oats, and wheat and flour total to 40,000 bushels.

Liverpool closed unchanged to 10 lower on wheat and unchanged on corn. The following are the closing prices:
