Higher Quotations.

NEW YORK, Jan. 2.—The beginning of the new year in the stock market brought confidence and strength. Builish operations were conducted with more vim than that he witnessed for some time and prices were advanced in every quarter of the list. The day's transactions rose considerably above the recent average.

One of the most important factors that operated in favor of high prices was the abnormal ease of money rates.

Resinvestment of January interest and dividend payments also contributed to the increased demand. It is estimated that the amount of money thus disbursed at the first of this year is considerably in excess of \$200.00.000.

The market rose at the outset on active bidding and maintained its advantage without faitering. Toward the close there were some slight recessions. United States Steel, Union Pacific and Reading all were advanced more than 2 points. Gains of 1 to 2 points were general and among the less active stocks the movement was wider, insome cases reaching a the

Wool Market.

BOSTON. Jan. 2—WOOL—Trading in domestic wool is more quiet, but values are holding very firm. A fairly good business is being done in fleeces, while the demand for territory stock is well maintained. Choice Ohio half-flood commands 252324c and fine territory staple is moving freely at 214c. Considerable interest is reported in pulled wool.

ST. LOUIS, Jan. 2—WOOL—Steady; fire mediums, 15217c; fine, 10215c.

Tarpentine and Roain.

10c, while weighty hogs held up in good shape throughout.

Supply consisted of about seventy loads, mostly lights, and with the demand from all quarters reasonably active it required only an hour or two of trading to make a complete clearance. Shippers and speculators bought freely, taking about thirty lands of 220 to 240-pound offerings. Closing values, especially on high mixed grades, showed the full decline noted.

Elity, the same as yesterday's high price, and bacon averages sold from \$5.95 downward. There were only a few bunches of pigs on sale, the demand for this class of stock proving erratic and uncertain.
