For the Woman That's Fat.

A Detroit physician says that the cheapest and safest mixture a fat woman who wants to get thin can use is 1/2 ounce Marmola (get it in the original 1/2-ounce package), 1/2 ounce Fluid Extract Canada Aromatic and 1/2 ounce Peppermint Water. The proper amount to take is a teaspoonful after meals and at bedtime. These ingredients may be obtained from any druggist at small cost, and make a combination that is not only excellent as a fat reducer, being able, it is claimed, to take off a pound a day without causing wrinkles, but is also a splendid help to the system as a whole, regulating the stomach and bowels (where the fat person's troubles begin), and clearing the skin of pimples and blotches. No exercise is required to help the remedy in its work and, best of all, no dieting is necessary while taking it—you can eat what you like.

turn Mrs. Eddy presented Mrs. Wilcox, past president for five years, with an elegant silver salad dish.

So far, between \$50,000 and \$60,000 has been subscribed by the members of the order. The project is being carried on by subscriptions of the members.

Ice Boating is Now Quite the Fad on Nearby Lakes

Ice boating promises to be one of the sports at Carter lake this winter and many enthusiasts have rigged up boats and commenced the winter's fun. The ice is now in excellent condition and the speedy sailing boats can jump over a strip of water ten or twelve feet wide. Four Omaha young men, comprising the Ripple club, all of them old hands at ice boating, brought out their cutter early last week, the first one of the season to make its appearance on the lake. Henry Howes, Ralph Shields, Fred Johnson and Harry Croston are the four pioneer ice skippers. Their ice boat has been christened the "Ripple" and is the largest and speediest on the lake. It has ample room for ten persons, but so far this season its crew has been unable to persuade any outsiders to make the trip across the lake.

There are many smaller boats on Carter lake, some of them having room for but one person. The smaller boats are much harder to control and considerably more dangerous in skipping over open places in the ice than with the larger ones.

On Lake Manawa several ice boat enthusiasts have taken up the sport and have rigged up ice boats and are practicing the art of steering them.

Omaha Boy Shines in College Affairs

Isaac W. Carpenter, Jr. is an Omaha boy who is showing up prominently at Dartmouth college as a freshman this school year and has already entered into the student activities there with the same dash and spirit that made him such a popular member of the graduating class of the Omaha High school last year.

He made the college Mandolin club, which is composed of forty members, and was one of the two lucky freshmen at the school who were able to gain a place on this musical organization. The day before Thanksgiving the Dartmouth and the Harvard Mandolin clubs gave a joint concert at Boston, which made a decided musical hit, as well as being a popular social affair.

Mr. Carpenter made the Delta Kappa Epsilon fraternity early in the school year and was chosen as spokesman for the incoming freshmen members at the annual October banquet, when all the members of this fraternity gathered.

Auto is Driven from Kansas City Here in Spite of Weather

How would you like to ride in an open touring car from Kansas City to Omaha with the thermometer hovering around the fifteen below mark? That is just what two men did Saturday morning in one of the cars that composed the famous Maxwell team that won the Glidden tour last fall. The car is now on exhibition in the United Motors Omaha company show room at 215 Farnam street. It will remain there all week. "The Glidden tour as you know, is the test supreme of motor cars. Every year the tour is conducted through different parts of the country and each time the worst and most impassable sections are picked out," said Mr. Doty, local manager of the United Motors company. "This year the route covered 1,651 miles through the south. There were sixty-four cars started in the contest and the Maxwell was the only car that covered the entire distance without a single point scored against it. There were all sorts of cars entered, ranging from \$5,000 down. The car we are showing here this week is one of those 100 per cent efficient cars that went through the Glidden tour grind. Since

its victory some two or three months back it has traveled overland to various parts of the country, visiting Maxwell of 2,200 miles since the Glidden contest and up to this time it is still without points scored against it. It is still traveling under Glidden tour rulings. From Omaha it will probably be driven to Denver or to Minneapolis. When its time is up at each branch the car is started out no matter what the weather conditions may be.
