

Final "Wind-Up" of the Culp-Langworthy Bankrupt Stock

The "finish" is here—the unique but too high a grade "clothes shop" that has graced the corner of the City National Bank Building, will soon be a memory. Eager purchasers are grasping the extraordinary values that usually drift down to the last, and lines are sadly depleted, but four out of five men may still be suited, sized and satisfied. Prices for the next day or so have been reduced to "next to nothing."

Pant Sale Saturday

Every pair of Culp-Langworthy Trousers to be offered at make-em move prices

Even the celebrated "Nufangl" brand of trousers is included in this final bankrupt clearance; this trousers stock, even today, is the very classiest in Omaha.

Trousers that Culp-Langworthy sold for as much as \$5.00, are here for quick Saturday buyers, at **\$2.98**

Culp-Langworthy's up to \$8 trousers—trousers admitted to be the classiest in Omaha, are offered to quick buyers Saturday, at **\$3.98**

TO ENLIST SCHOOL CHILDREN

Expert Says They Can Help in Pure Seed Campaign.

BIG MEETING HELD TONIGHT

Grain Men, Bankers, Live Stock Men and Others to Attend Seed Corn Meeting at the Commercial Club.

"The children of Nebraska can add \$500,000 to the annual crop production in each county by testing seed corn," said Bert Ball, secretary of the crop improvement committee of the Council of North American Grain exchanges, who will address a mass meeting of business men at the Commercial club tonight, called to discuss the inauguration of a crop improvement campaign.

"Our chief problem is to break the shell on the farmer, who doesn't believe in book farming, the man who believes the school teachers and university professors and business men can't tell him anything about farming. Our next important problem is to break up the 'year-to-year' lease system, putting in place of this soil robbery lease a five-year rotation lease." Mr. Ball carries with him a "rag baby," which he will use in illustrating his address tonight, and which he suggests as a means of getting the children to take up corn testing. It is a long piece of cloth, marked off in numbered squares. The corn to be tested is laid in the squares and the cloth rolled up and put in a warm place, such as an incubator. It has the advantage of being simpler than the box tester.

Child Takes Partner.
"Each child in a given school selects his father, grandfather or uncle for a partner," said Mr. Ball. "The teacher has charge of the tests. The rag babies are rolled up on Monday and opened on Friday, when a score card is made for each contestant. The boy takes his score card home and says, 'See, dad, some of our ears didn't grow at all and others are only half good. Willie Jones' seed corn was just twice as good as mine.' Then the shell on the old man is broken and he admits that perhaps somebody can tell him something about farming."

"The idea of the council of grain exchanges," said Mr. Ball, "is to interest the business men of the cities and towns, and through them to organize model counties for crop improvement. This is to supplement the work of the state university. Prof. Pugsley of the agricultural extension department of the university knows all about corn testing and crop improvement that we know, but he is handicapped for lack of funds. The business men of Omaha and other cities should make it possible for Mr. Pugsley to so interest the children of the schools of the state that they in turn will interest their fathers."

Chancellor Avery to Speak.
Tonight's meeting is called by the Omaha Grain exchange. Chancellor Avery of the state university, Dean Burdett of the university agricultural school, Prof. Pugsley of the agricultural extension department, and F. C. Odell will speak. Mr. Odell will speak on the inadequacy of the pure seed law passed by the last legislature.

South Omaha live stock interests, headed by E. Buckingham, general manager of the Union Stock yards, will attend the meeting. Bankers, grain men, creamery men and implement men will be there. Every one interested in crop improvement is invited to be present.

Arrest Saloonist for Violating Law

On complaint of Mrs. Patech of South Omaha, Patrick Ford, a South Omaha saloon keeper, was arrested and arraigned in county court on a charge of violating the 8 o'clock closing law yesterday. Ford pleaded not guilty and was released on bail to appear for hearing January 26.

NEW CONCERN MAKES CAPS IN BENSON & THORNE WINDOW

The activity of the Commercial club in bringing Omaha manufactured products to the attention of Omaha people is receiving a friendly boost by the firm of Benson & Thorne, who have given over their west shop window to a local cap factory. Men's and boys' caps are being made up right in the window, from the cloth in the bolt to the finished cap all ready to wear. Every stage of cap-making is plainly shown, and the nimble fingered experts fashion a cap in a surprisingly short time.

DRUNK "JIMS" PLUMBING. FLOODS JABEZ'S SALOON

Mike Sullivan is in jail, charged with being drunk and disorderly. He walked into a saloon at the seventh and Douglas streets this afternoon, demolished some valuable furnishings, dismantled the plumbing, broke the water pipes and flooded the house. The police arrived in time to throttle his rebellion while it was still in its zenith.

ICE HOUSES ARE ALL FILLED TO CAPACITY

The Omaha ice harvest has been completed. The Omaha Ice and Cold Storage company was the last concern to finish, but now it has completed work and the Omaha and South Omaha houses of all companies are full to their capacity.

HYMENEAL

Johnson-Clark.
Miss Jennie Clark, daughter of James Clark of Benson, and Mr. Chris Johnson were married by Rev. Charles W. Savidge Thursday morning at 5 p. m. at the groom's residence, 1415 Vinton street. Only immediate relatives were present. The groom's brother, the Samuel C. Johnson, and the bride's sister, Miss Lottie Clark, were the attendants.

Saturday—A sale of fine Panama dresses for girls, 6 to 14 years; these dresses come in red, blue, black, brown and white—\$5.00 to \$6.50—qualities—\$2.75. Benson & Thorne Co., 132-29 Farnam St.

Births and Deaths.

Births—Robert and Gene Schlowe, 2614 North Eighteenth, girl; L. P. and Bertha Johnson, 408 Charles, boy; L. and Lou Jones, 202 Miami, boy; John and Jude Jonak, 188 South Fifteenth, girl; Ed and Alma Greeley, 312 South Fifty-sixth, girl; Sebastian and Maria Stefaus, 311 Woodworth, girl; Richard and Maude Wilson, 317 North Thirty-seventh, boy; Lester and Florence Harmon, 321 North Nineteenth, girl; Henry and Ingeborg Madson, 220 Myrtle avenue, girl; Cecil and Amelia George, 223 Davenport, boy.

Deaths—John D. Walter, 64 years, Wise Memorial hospital, John Hoye, 75 years, 102 Elm; Mike Piskach, 46 years, 1114 South Second; Miss Jennie Barrett, 81 years, 124 North Twenty-first; James O'Rourke, 38 years, Denver; Hattie Koenig, 29 years, 129 South Tenth.

To Speak at Luncheon to Be Given by the Omaha Club Women

There will be a number of speakers at the luncheon which the Women's club of the Railway Mail service will give at the Loyal hotel Monday noon for the visiting women at the annual convention of the Second district of the Nebraska Federation of Women's clubs. Jan. 23-26.

Miss Julia Lathrop of Chicago, who is on the advisory committee of the general federation of women's clubs will talk, as will Mrs. Gertrude Howe Britton of Chicago, head of the Hull House Women's club; Mrs. H. L. Keegle, Walthill, Neb., a member of the general federation directory; Mrs. T. J. Gist, Falls City, Neb., president of the Nebraska Federation of Women's clubs and W. G. Whitmore, Valley, president of the second district. Members of the Omaha Women's club, other than delegates who wish to attend the luncheon, are asked to give their names to Mrs. N. H. Nelson, Benson Women's club; Mrs. William Zimmerman, M. G. Signa club; Mrs. Frank Boyd, Mrs. D. C. Dodds in taking reservations for other members of federated clubs.

NATURE'S WEATHER PROPHECY

Simple and Interesting Devices for Telling Weather Conditions.

One of the oldest and simplest ways of telling whether the air is dry or moist is to suspend a piece of seaweed out of doors, or even in an apartment where there is no artificial heat. The weed is crisp and dry at the approach of fine weather, while it is flabby and moist when rain is likely.

A common toy, the Swiss weather house, is really quite trustworthy in its forecasts. The woman, of course, emerges from the little house in fine weather, while the man comes out when wet conditions are to be expected.

In a medium state of the atmosphere both figures stand just inside the house. The movements are due to the twisting of a cord of catgut, a substance which is highly sensitive to changes in the humidity of the air.

Two very singular weather devices are those in which a frog and a leech are employed. In the former case a glass jar is filled to about two-thirds of its capacity with water. A little wooden ladder is constructed, and this is placed inside the jar.

A frog will live quite happily in such a position for a few weeks and it will be found that in fine weather the creature will climb up to the top of the ladder. In stormy weather, however, the frog prefers to remain under the water.

Even more reliable as weather prophets are leeches. A single leech is placed in a broad glass bottle with a piece of perforated bladder or leather over the mouth. On the approach of fine or frosty weather the leech remains almost motionless, curled up at the bottom. When rain or wind is coming the creature rises to the surface, while a coming thunderstorm will cause it to be much agitated; at times the leech will even leave the water altogether, so sensitive is the animal to an electrical disturbance.

The chameleon barometer is a curiosity which has puzzled many people, but its construction is really very simple. The animal changes color according to the weather, being pink in damp conditions, purple in a variable state and bright blue when the air is dry.

A cardboard mount is prepared and this may be lettered in sections—fair, storm and change. The chameleon is stretched out on blotting paper and then immersed in a solution of chloride of cobalt, to which are added chloride of sodium and gum arabic. Any element will make up the mixture.—Strand Magazine.

Lifelong Soudage to dyspepsia, liver complaints and kidney troubles is needless. Electric Bitters is the guaranteed remedy. Only 25c. For sale by Boston Drug Co.

DEVELOPMENT IN BIG SHIPS

Thousand-foot Ocean Liner Compared with Some Back Numbers.

The latest Transatlantic leviathan whose construction is announced is to be 1,000 feet in length—long enough to have a golf course of a sort, a tennis court, a cricket ground, as well as the ordinary adjuncts of a gymnasium. What a sea-change is this from the cramped and ill-ventilated ship on which Charles Dickens, for example, came to America! Four thousand passengers can be not merely carried, but accommodated on the new vessel. The displacement will be 70,000 tons, the ship will actually be a skyscraper of a dozen stories or more, and the cost will be \$10,000,000. The appellation, "The Gigantic," already bestowed upon it by the White Star line, seems deserved—but how long will the monster hold the supremacy in this day of imposing dimensions in everything and frantic competition?

The Persia, pride of the Cunard fleet in 1856, was 300 feet long and made thirteen knots. The Olympic is 800 feet in length and makes twenty-one knots. In the decades that have intervened, each new "greyhound" or "leviathan" or "dreadnought," or whatever it was called, has been acclaimed as the last word in naval architecture. Yet another of the old William Henry White hesitates to predict that the size limit has been reached in war vessels or merchant ships. He told the Society of Naval Architects and Marine Engineers the other day, however, that the increased dimensions of the future will be chiefly significant as conducive to the comfort of the traveler, and "further increase . . . will have little or no effect upon regularity of performance of service between terminal ports." The modern sea-rover is a spoiled child. He expects everything at sea that he has on land except, perhaps, his racing automobile. He thinks nothing of keeping in communication with the land for the whole of the journey. He is even entertained with theatrical attractions. He enjoys the whole calendar of athletic sports with the exception of intercollegiate football and polo. Things that go down to the sea are no longer to be

commemorated as in the days when Dr. Johnson declared that he would rather go to jail than go to sea.—Philadelphia Ledger.

CHILD CURED OF PARALYSIS

Mechanical Stimulation of Nerve Center is Remedy of Chicago Doctor.

Infantile paralysis, long classified among the deadly diseases against which science was powerless, has been cured, it is asserted.

Agnes Riley, 2½ years old, has been given health and the ability to romp about like other children through a discovery by Dr. Roy D. Bernard of Chicago. For four months she was paralyzed, a condition from which no child ever before is known to have recovered.

Dr. Bernard says he has discovered the lair of the dreaded germ in the human body. To exterminate the germ he has discovered a mechanical stimulation treatment by which every vestige of the disease can be eradicated in from twelve to fifteen days.

"Our little girl was the seventh child in the neighborhood to be stricken with the disease," Mrs. Riley said. "She had been playing one afternoon on a cold stone walk. She felt well when we put her to bed, but next morning she was paralyzed."

"Finally Dr. Bernard began giving her treatments and within two weeks she was up and cured."

"Infantile paralysis," Dr. Bernard said, "is an inflammation of the anterior horns of the gray matter of the brain. It is a germ, just the same as pneumonia or typhoid fever. It is deadly in its work and causes the victim to lose all power of motion."

"I have been experimenting sixteen years with the disease. I found by dissection that the infantile paralysis germ centered in the spinal cord and destroyed

the nerve cells which control the power of motion.

"By applying a mechanical stimulation to the single nerve center I found that an equalization of the blood which goes to the gray horns could be obtained. This is the sole secret of the cure."—Chicago Post.

Favorite Fiction.

"De-lighted!" "Inimitable style." "It's perfectly splendid, Mrs. Goff, but I don't dare to eat plum pudding." "If I had known you were going to call on me to speak, Mr. Toastmaster I should not have come." "Dear Madam: Your poem is a gem, but lack of space compels us to return it." "I'll never forget your services in this campaign, Higginthorn." "Don't scold him, Mrs. McGinnis; I like to put money in little boys' banks."—Chicago Tribune.

Rheumatism

Try Sloan's Liniment for your rheumatism—don't rub—just lay it on lightly. It goes straight to the sore spot, quickens the blood, limbers up the muscles and joints and stops the pain.

SLOAN'S LINIMENT

is fine for lame muscles. A. W. Lutz, of Lafayette, Ala., writes: "I had rheumatism for five years. I tried dozens and several different remedies but they did not help me. I obtained a bottle of Sloan's Liniment which did me so much good that I would not be without it for anything."—Chicago Tribune.

All dealers. Price 50c, \$1.00. Dr. Earl S. Sloan - Boston, Mass.
