Hurd's Salary Safe. E. C. Hurd, engineer of the State Railway commission, and State Auditor Barton, both object to the statement that the auditor has or intends to hold up the pay of Engineer Hurd on the ground that the engineer is drawing a salary from the Omaha, Lincoln & Beatrice Interurban railway company. Mr. Hurd says that he was at one time employed by the company, but that he resigned all connection with it when he entered the employ of the state, and has not since that time had any other employment than engineer for the state. Auditor Barton says that several months ago someone made a verbal charge of this kind to him and that he investigated it at the time and ascertained there was nothing to it and dropped the matter, and it had not since entered his mind. So far as the salary is concerned the ruling on the case of Architect Miller would be a bar to holding up the pay unless it was shown that Hurd was neglecting his duties to the state. If he was in reality an employe of the interurban road it would tend to render him an improper person to value the interurban property for the state, but Mr. Hurd insists that his connection with that property ceased before he entered the employ of the state.

BERTRAND MAN CHARGED WITH STEALING HORSE

HOLDREGE, Neb., Jan. 30.—(Special.)—Glen Childs, a young man from the village of Bertrand, in this county, was arraigned before County Judge L. C. Barr on Monday, charged with the theft of a horse. Waiving both the reading of the complaint and the preliminary hearing the young man pleaded not guilty and was at once bound over to the district court. Bond was fixed in the sum of \$500 and Childs was sure he could secure bondsmen for this amount, but was unable to do so on Monday. John Anders, a resident of Bertrand, is the complaining witness and he charges that young Childs took the animal from his barn one night in November and after driving it to Lexington, sold it to a horse buyer. Clues were soon obtained and the horse was traced to Illinois and eventually reclaimed by Mr. Anders.

NEBRASKA CITY, Jan. 30.—(Special.)—Some time ago the administrator of Jacob Mueller's estate put up and sold the Staats Zeitung, a German weekly paper, which has been published in this city for the last forty-four years. George Maurer, a tailor, conceived the idea he wanted the plant and to become a newspaper man. He purchased the same, and operated it for a little over a month. Yesterday he sold the plant to Val J. Peters of the Omaha Tribune, who will move the plant at once to Omaha, where he will consolidate it with the Tribune. This paper is the oldest German paper in the west and was established by Dr. Fred Renner. This leaves this county without a German publication.

not in the insurance laws of the state. Some years ago the Commonwealth Life Insurance company of Omaha sought to transact an accident and sick benefit business in connection with a life business and the attorney general's office held that it could not be done under the Nebraska law under which it was incorporated. The question now is whether the same restriction applies to foreign companies whose charters permit them to write all these kinds of insurance. There are three such companies which are and for several years have been writing such insurance in Nebraska, viz: The Travelers, the Aetna of Connecticut and the Pacific Mutual Life of San Francisco.

Who Will Come to Omaha?

There has been considerable speculation about the state house as to who would represent the attorney general's office in case some one was designated at the request of the governor, to take a hand in the investigations of the Douglas county grand jury. One guess is that Mr. Martin or one of his deputies, Messrs Edgerton or Ayres, would go and another that an outsider would be designated. If an outsider, the name most frequently mentioned is Arthur Mullen, who prosecuted the case against Chief of Police Donahue of Omaha. Talk has it that Mullen is the favored one with the attorney general, but that the suggestion does not strike a responsive chord in the governor's office.

Are your folks warm enough?

What kind of a home do you serve up to your folks? Is it as "stun-cold" as a frozen pudding and seasoned with ashes, dust, soot, or other unwholesome things, from some old-fashioned gas-leaking, ash-spouting "tin monster in the cellar?" Or is it still worse from fuel-greedy stoves upstairs and down? If so, put these enemies to health and happiness out of the house! Put in an outfit of our

AMERICAN & IDEAL RADIATORS & BOILERS

and have every room cozy and warm from kitchen to attic. Then you will serve up to your loved ones a home free from chill, dust, dirt and odors—a domicile of delight, thoroughly protected against wind and weather. Cleaning work reduced one-half, and the damage done to furnishings prevented—our outfits do much to free the women from house-drudgery.

AMERICAN Radiators are placed along the outside walls and under windows, where prompt heating is insured in severe weather, or where a low fire with little coal burned will take off the chill in mild weather. You get just the degree of heat wanted, where most needed, and no needless burning of coal.

Our IDEAL Boilers are built to burn all kinds of fuel—hard, soft, lignite, pea, wood or gas. They are self-regulated and require no running up and down stairs to change the dampers. City water connection not required. The work and fuel required by one stove-fire will in many cases warm the whole house. No parts to wear out, warp or crack—outlast the building.

If you want to serve up genuine ideal comfort to your dear ones, and season it with health, cleanness and least caretaking, send for catalog, "Ideal Heating" (mailed free). Prices are now most attractive.

We have also brought out the first genuinely practical, automatic, durable Vacuum Cleaner. The machine sets in the cellar, and all the dirt it so thoroughly and perfectly gathers is drawn from the rooms through small iron suction pipes leading to big, sealed dust-bucket in cellar. All the housekeeper or janitor has to do is to attach hose to iron suction pipe opening in baseboard of any room, turn on electric button to start the machine in cellar, and with a few gentle strokes of the dainty, magical Arco Wand, you instantly and thoroughly clean carpets, rugs, floors, walls, ceilings, draperies, frames, moldings, fixtures, mattresses, drawers, corners, crevices, etc. The fuel germ-laden air, after the dust is removed, is exhausted through pipes to the outside—free. Put with utmost simplicity into any kind of old or new dwelling or building. The sole running cost adds but a few dimes to your monthly electricity bill. Ask for catalog of ARCO WAND Vacuum Cleaner.
