Rock Island Plans to Cut Distance in Southern Trip.

CAPITALIST TO BUILD MARKET

Offer Made to Mayor Hanna of Des Moines that May Prove Solution of Big Problem Affecting City's Interests.

(From a Staff Correspondent.)
DES MOINES, Feb. 2.—(Special Telegram.)—Construction of the new Rock Island line from Des Moines to Albia is to be followed by the extension of that line south through Jefferson City, Mo., thence to connect with the St. Louis-Kansas City line of the same road, and then on south to reach the gulf.
This will give the Rock Island the shortest line from the twin cities to the gulf when the Panama canal is opened. Des Moines will be the most important intermediate city. This is the plan of the Rock Island system according to reports in local railroad circles.

May Build Market House.
By offering to advance at least \$50,000 for the construction of a market house on the site of the old city hall, provided the city pays the first \$10,000 of the total amount involved from the general fund in 1922, a Des Moines capitalist may provide the solution of the market house problem for the city. The proposition was made to Mayor James R. Hanna and reported by him to the council.

Dolliver's Exemption.
The soldiers' tax exemption of \$1.50 provided for by the last legislature must be taken pro rata from all classes of property owned by him and cannot be deducted entirely from any one class of property, according to a ruling made this morning by Special Counsel Lee of the state department of justice. Mr. Lee holds that the pro rata shall be on the basis of the percentage which the amount of the exemption bears to the total value of his property subject to taxation.

To prevent serious illness no home should be without a bottle of good Rock and Rye. Taken judiciously, it is the very best home remedy, and is far better for the curing of colds than all patent cough medicines. This theory has been endorsed by many of Omaha's leading physicians.
