# Radiation vs. refrigeration

Did it ever strike you how "way behind the times" your family must appear to be to your friends who have modernly heated homes when they call and find your folks gathered closely around a stove in one room, while the other rooms are shut off from use—avoided because they are as cold and damp as a refrigerator?

offer the only way of reliably and genially warming every nook, hallway and room of the house-change it into a home. The deep, large fuel chamber of an IDEAL Boiler is one of the

strong features for producing its great superiority in fuel saving.

A deep fire is easily proven best as compared with the shallow fire-pots of oldfashioned heating methods-just as a big, full cake of ice to fill the refrigerator box will give far longer, steadier results than would the frequent throwing in of a handful of cracked ice.

IDEAL Boiler fuel-pots have air grooves or channels in which the air and coal-gases thoroughly mix, as in a modern gas or oil burner, thus extracting every bit of the heat from the fuel. None of the heat is wasted up the chimney. IDEAL Boilers and AMERICAN Radiators require less attention than a stove;

a child can run them. They reduce house-cleaning one-half, and save wear and tear on carpets, draperies, and furnishings. The pure, warm air protects the family health.

Better at first to omit the useless inner doors, extra chimneys, mantels, fancy lamps that are never lighted, books which are never read, vases which contain no flowers, etc. The savings brought about by these outfits will assist to pay for fine furnishings. You will need our book (free), "Ideal Heating"—it contains the most valuable heating information, which every owner should have at hand.

We also sell the Arco Wand Vacuum Cleaner—to set in cellar—with its iron suction pipes leading to all floors. It is the new way, the ideally correct method—because all the dirt, dast, lint, throuds, insect eggs, etc., are drawn through the iron suction pipes to the big sealed dust-bucket in cellar. Exhausts the foul, germ-laden air (after the dust and tress have been removed) into the chimney-flue or out doors. The Arco Wand is a powerful, permanent machine that needs no attention, and becomes part of the building, libe the heating or plumbing. Running cost adds but a few dimes to your monthly electricity bill. Ask for catalog, giving complete data. With utmost simplicity the suction pipes are put into old or new houses, flats, stores, schools, churches, banks, theaters, haspitals, barber shops, court houses, libraries, garages, etc., etc. Ask for catalog of ARCO WAND Vacuum Cleaners.
