

GRAIN AND PRODUCE MARKET

Conditions and Opinions Court for Little in Wheat.

CORN IS IN A DOUBTFUL STATE

There are Many Who Think the Advance Has Been Largely Discounted by Heavy Feeding and Low Resources.

OMAHA, March 8.—The ordinary trade conditions and opinions were worthless on the action of the wheat market today.

There was a waiting period in the market for the close of the week, and the advance in wheat was largely discounted by heavy feeding and low resources.

NEW YORK STOCK MARKET

Prices Harden Early, but Only Part of Rise is Held.

DEMAND FOR RAILWAY ISSUES

Speech of Taft Interpreted as Desire to Restore Confidence in Quarters Where that Feeling is Now Lacking.

NEW YORK, March 8.—Prices hardened again on the stock exchange today, with an early show of activity, but later trading fell to small proportions and only a part of the rise was held.

The local market showed some encouragement from London, where Americans were in better demand than recently, closing with a majority of net gains.

There was a waiting period in the market for the close of the week, and the advance in wheat was largely discounted by heavy feeding and low resources.
