NOTE THE GUSSET

It Fits the Figure Like a Glove Without Alteration

Klosfit Petticoats have the famous Jersey-cloth elastic-top gusset that effectively removes all petticoat troubles—there is no bunching, wrinkling or sagging to spoil the effect and appearance of your gown.

The simple snapping of a glove fastener at the back of the petticoat adjusts it to your figure—not a wrinkle at the waist line, no bunching at the back, no sagging, just smooth and snug around the hips. We have selected the materials with extreme care and offer some good values. None but reliable, dependable materials are used in "Klosfit" Petticoats.
