Wheat Not Damaged in Nebraska Fields

In South Platte country, where it was feared that the winter wheat had been damaged by the heavy crust that formed on the ground after the snow went off, conditions are found to be in splendid shape. In the western part of the state the wheat is far advanced owing to a warm spell that visited that section. The acreage is larger than ever, too. Everywhere the pastures are coming out rapidly and cattle are picking a living on the range.

Tired? Nervous? Go To Your Doctor

All run down, easily tired, thin, pale, nervous? And do not know what to take? Then go direct to your doctor. Ask his opinion of Ayer's non-alcoholic Sarsaparilla. No alcohol, no stimulation. A blood purifier, a nerve tonic, a strong alternative, an aid to digestion. Let your doctor decide.
