# ELECTRIC AGE IN HOUSEHOLD Demand for Special Appliatices fo Humen Marked Penture of In-

dustry.

Since the beginning of the year 1912 all of the principal manufacturers of electrical apparatus show increased ship-1 ments and increased orders. Gross busi-

ness booked by General Electric during

of the general revival of business. They also show, more important than all else,

the permistent expansion and development

of the use of electrical appliances. The forthcoming report of General Electric,

and it is typical of the reports of other manufacturing concerns, will show for

1911 an increase of between 40 and 50 per-cent in sales of "household and special appliances." Ten years ago the return

from apparatus for domentic use was so small as to be hardly worth counting.

this quarter was almost \$20,000,000 which is an increase of about 9 per cent over
