These accounts show that the guards at the institution have had their salaries raised from \$10 to \$20 and that thirty-two guards are now employed. Following is the payroll:

Warden\$125
Deputy 104
Matron 50
Assistant deputy 75
Physician 75
Chaplain and usher 85
Steward 100
Chief engineer 90
Farm boss 65
Guards (thirty-two), each 50
Yardmaster 65
Night engineer 60
Bookkeeper 75
Hospital steward 20
This makes an increase in the payroll
of something over \$500 from the preceding

month and is mostly due to an increase in guards and also an increase in their pay. Minden Wants Depot.

The city of Minden has filed with the railway commission a petition asking that the Burlington railway company be enjoined from repairing and remodeling its depot in that city. The petition sets forth that Minden is a town of over 2,600 people and that its city ordinance forbids the erection of wooden buildings within a certain limit and that the proposed depot is within that prescribed area. It also sets forth that the present depot is too small to accommodate the public and

Every Member of Band Suffers Nausea as Result of Caffeine Experiments.

PHILADELPHIA, May 11.—Serious refeine, a drug lurking in chocolate as well so coffee, to the eight student members of the 'poison squad' of the Hahemann Medical College Here. All have been subject to severe headaches and serious attacks of nausea, while one member of the squad was in such a serious condition after taking the caffeine-laden water for the first twenty days that he had to be placed in a special ward in the hospital. He received constant attention, has recovered and at the college is said to have rejoined the squad.

The "poison squad" at the Hahnemann college was formed very quietly. It came into existence on March 1 and is under the direct supervision of Dr. Edmund T. Nesbit, director of the Hering laboratory of the college.

Dr. Nesbit called for volunteers from among the students. He said he wanted men who were willing to do something for the benefit of humanity at large, even though it might be to their own discomfiture. Twenty-five students voluteered. Of these fourteen of the most perfect physically were chosen, eleven as regular members of the squad and three as al-For thirty days the members of the squad were given doses of caffeine while

Dr. Nesbit and his assistants made personal observation, taking the pulse and temperature of the members of the squad and making notes on their general physical condition. It was not until within the last few days that one member of the squad weakened under the experiment to such an extent that it was necessary to send him to the hospital. Dr. Nesbit refused to reveal the name of the student who collapsed, but declared that through proper treatment immediately he soon The caffeine was administered in a so-

lution and was mixed with the water the squad drank. The students did not know when they were getting the caffeine. There were no stated times for giving it in order to keep the mind of the student free from worry in order that the physical condition might not be changed materially through the action of the brain.

Before joining the "poison squad" each student had to sign a release against any action for damages against the college.

The laboratory was organized shout fifteen months ago with Dr. Nesbit as director, and almost immediately an exhaustive study was started to ascertain the destructive qualities of caffeine as used in food stuffs.

The students continued to live at the dormitories or at boarding houses, but they were required to take their meals at the training table located in the hospital the training table located in the hospital near the diet kitchen. Before each meal the temperature was recorded, the pulse and respiration were taken and the blood pressure was tested.
