Day Brings Forth Uncertainties in

CORN SHOWS EXCELLENT TONE

Leaders Expect Run to Be Over Soon and Are Supporting the Market--Prices Are Now Advancing.

OMAHA, June 4, 1911. The wheat stuation was an uncertain affair today. No rain was reported, but the weather map showed cool and fair the weather map showed cool and fair conditions, offsetting the absence of much needed moisture in Nebraska and

builish and shorts covered advancing values. The trend of the markets will depend utterly on the advices of crop experts and clinastic conditions. corn market showed excellent tone and prices advanced regardless of the heavier receipts. Leaders in the trade

expect the run to be soon over and are supporting the market. Under favorable conditions the later months should sell conditions the later months should send conditions the later months should solver.

Wheat had a further upturn early on adverse cropi reports on lack of rain. Later longs took profits and the market based off. Cash wheat was 1/2 higher.

Corn was well supported by leaders in the trade and values worked higher.

Thinary wheat receipts were 234,000 bushels and shipments were 641,000 bushels against receipts last year of 475,000 bushels.

Primary corn receipts were 1,227,000 bushels.

Hastings, Neb. 78
Holdrege, Neb. 78
Lincoln, Neb. 79
Lincoln, Neb. 79 chicago, June 4.—Sprinkies of rain today at scattered points in Nebraska and Kansas disturbed to some extent the confidence of wheat bulls who have been acting on reports of severe crop damage, the result of heat and drought.

damage, the result of heat and drought. In consequence, the market although closing with a net gain of % to %6% had a rather weak tone. Corn wound up at an advance of % to 160% and oats dearer by % to 1%c. Provisions were 7% to 12½ down.

News of moisture in the west came after prices had advanced nearly a cent on statements that throughout western Nebraska and parts of Kansas, the crop was doomed. On the arrival of news of showers, the larger interests that had bought freely concluded to take profits. Accordingly the market secured a reaction. September, in which the bulk of trading was done, ranged from \$1.06% to \$1.06% al.07, with last sales, %4% up at \$1.06%.

Corn scored a good advance on improved calls, lighter offerings and because the largest short in the pit was the most persistent buyer. Illinois reports mentioned much replanting due to poor germination and to cut worms. July fluctuated from 72% 6% c to 74c, closing firm, 161% c net higher at 74c. Cash grades were stronger. Number 2 yellow,

754476c. Sales of more than 1,500,000 bushels from the stock here acted as a stimulus for holders of oats. July ranged between 49447504c with the close at 50%c, a net

gain of 1½c.

Free selling by packers depressed the profisions market. Most of the unloading was in lard and ribs, but the resulting decline of 7½c to 12½c included pork as Cash quotations were as follows:
