PLAN FOR HELPING THE BLIND

to Be Held Next Week.

NEBRASKA HAS MODEL SCHOOL

Practical Subjects Are Taught-Blind Men Plan to Help Out Their Less Fortunate

The Nebraska blind will not be last to organize to help their less fortunate members. A convention of the Nebraska Association of Workers for the Blind is planned for June 18-21, to be held at College View, Neb. This organization is an outgrawth of the Alumni association of the Nebraska School for the Blind, the members being the industrious blind men and women of Nebraska.

The object of the association is to consider and promote the education, employment, advancement and general welfare of the blind. While its membership is comparatively small, yet it is felt by all interested in the work that there is much good to be done for the blind of Nebraska and that a united effort cannot fall to result in permanent good.

It is questioned by those unacquainted with the needs of the blind, "What good can result from such united effort?" To the questioner we would reply-there are many problems confronting the blind

The real heart of humanity is growing larger and becoming more sensitive each his untiring efforts a number of blind year as to the needs of certain classes. Never before has there been so great a desire to assist the unfortunate. The problem is not how to bring certain conditions, but rather, what conditions are really needed. The needs being dis-

Nervous Wrecks from Sore Feet; Gives Cure

The nagging irritation from daily foot torture causes thousands of nervous break-downs. Besides there is the pain, the hasgard face and peevish disposi-tion. Don't waste an hour, here is a treatment that will cure your feet quickly. No impression was erroneous. The association therefore, endeavors to assist such persons in securing and ucceeding in some honorable and remunerative employments of calcolde in vain this treatment, formerly known only to doctors, will give prompt results. "Dissolve two tablespoonfuls of Calcolde compound in a basin of warm water. Soak the feet in this for full fifteen minutes, gently rubbing the sore parts." The effects are marvelous, pain goes instantly and the feet feel shipply delightful. Corns and callouses can be peeled right off; bunions, aching feet, sweaty smelling feet, get immediate relief. Use this a week and your feet relief when therefore, endeavors to assert when therefore, endeavors the cause any feet feel shipply delightful. Corns and callouses the cause any feet feel shipply delightful. Corns and callouses the cause any feet feel shipply delightful corns and callouses the cause any feet feel shipply delightful corns and callouses. The ship left of feel were feel when the relief when therefore, endeavoring the anony is and to see to it that the approach with the reli

100 years ago a blind person's outlook was indeed dark and disheartening, but Convention of Nebraska Association far different are such conditions today. Schools for the education of the blind have been established in almost every state of our grand nation. These schools represent the desire of the public to place the unfortunate individual on an equal footing with those who see.

State Has Model School.

Nebraska has a model school located of this school a large number of active blind persons making good. The state has been liberal in its appropriation to training and fit themselves for usefulexpressing their gratitude and appreciation to the state for the advantages found at the school for the blind. Superintendent King and his corps of teachers are to be congratulated for the good work they are doing. The school is one of the best. The following are some of the most successful: Dr. J. Ray Shike is making good as a physician at Greenfield, Ia.; Mer Parish is a successful plano tuner at Beatrice, Neb.; Miss Claire Owen of Geneva, Neb., teaches sight music in the public schools; E. C. Cook is a graduate of the Nebraska School for the Blind, and has taught mathematics in that school for a number of years; Mark Bruce is also a graduate of the same school. He has charge of the intuners are making good in the state.

dustrial department and as a result of established such institutions, and the products of such schols having become inspired to succeed, there should be even greater thought given to the subject. The student completing his course in the school for the blind, where he has been cared for and shielded from any responsibility is turned out into a big world that he has never learned to know as it actually exists. His way has probably been made to appear smooth, and even flowery, but a very brief introduction is sufficient to convince him that his early impression was erroneous. The association

Arrangements are being made for a public address to be given by Mr. Campbell in College View some time during his visit to the association. The public will be invited to come and hear Mr Campbell's story of the great work he is doing in America for the blind. Mr. Campbell has recently been chosen to act as executive agent for the Ohio commission for the blind. This commission which was first organized in 1908, has at Nebraska City. We find as a result started to develop its work for the employment of the blind. Until very recently only small appropriations for this commission had been granted and maintain this educational institution it has been difficult for the best work where the young can go and receive to be accomplished, but the last general assembly allowed the commission a sufness. The Nebraska blind are united in ficient appropriation that it has been possible to take steps toward the accom- at 2 o'clock all will assemble at Riverview plishment of constructive work along industria! lines and to further the enthusiastic campaign for the prevention of of ceremonies. Following is the program: blindness. As a first step in this direction the commission has secured the services of Mr. Campbell as their execu-

Healthy Mother's

Women who bear children and remain healthy are those who prepare their systems in advance of baby's coming. Unless the mother aids nature in its pre-natal work the crisis finds her system unequal to the demands made upon it, and she is often left with weakened health or chronic ailments. No remedy is so truly a help to nature as Mother's Friend, and no expectant mother should fail to use it. It relieves the pain and discomfort caused by the strain on the ligaments, makes pliant and elastic those fibres and muscles which nature is expanding, prevents numbness of limbs, and soothes the inflammation of breast glands. The system being thus prepared by Mother's Friend dispels the fear that the crisis may not be safely met. Mother's Friend assures a speedy and complete recovery for the mother, and she is left a healthy woman to enjoy the rearing of her
