Belated Movement in Congress Protect Insectivorous Birds-Surprising Facts Revealed by Report.

FRUITS OF TOIL DESTROYED

If all the 600 colleges and all the college endowments in the United States should be destroyed tomorrow, the insect tax of one year not only would replace them, but would leave a balance sufficient to endow thirty-two new universities in the sum of \$10,000,000 each.

It costs more by many millions each year to feed our insects than to educate our 20,000,000 children.

It is clear to those who know most about the subject that unless radical and immediate measures are adopted to restore a sure safe and natural equilibrium between insectivorous birds and their foods, the time will soon come when the annual loss caused by insects to the agriculture in this country alone will be counted in billions instead of millions of dollars. The estimated annual loss to farmers through insects is now about \$\$00,000,000 a year.

These are some of the striking facts and figures with which the senate committee on forest reservations and the in the United States. To see a bill like this pass has been the ambition of true sportsmen and economists for many years. The destruction of game and song birds and their eggs by pot-hunters and thoughtless boys has gone on almost unchecked, except by sporadic state legislation for so long that regions that once abounded with the feathered creatures are now destitute. No people ever were more blessed with a plentiful supply of useful and beautiful birds than the people of the United States; and in no country have the little creatures been slaughtered more recklessly. Many persons are now living who remember when all the matkets of the east were glutted with partridge, quall, prairie chicken and wild water fowl. An official report of 1854 states that one dealer in New York is mown to have received twenty tons of prairie chickens in one season, and that some of the larger poultry dealers were estimated to have sold from 150,000 to 200,000 game birds in six months.

Provisions of the Bird Bill. The bill reported by the committee is all the protective bills introduced by conress, including notably those of Reprentative John W. Weeks of Massachutts and Daniel R. Anthony, jr., of Kans, to say nothing of Senator McLean's It does not stop at the proction of migratory game or song birds, includes every kind of bird that in arded as useful in consuming destruce insects. The bill specifies wild geese, swans, brant, wild ducks, anine, er, woodcock, rail and wild pigeons it includes within the scope of its ill other migratory game and

TRIBUTE LEVIED BY BUGS suitable regulations to give effect to the previous section by prescribing and fix-ing closed seasons, having due regard to the zones of temperature, breeding hab-its, and times and line of migratory that insect perturbations the denartiment that insect perturbations to give affect to the previous section by prescribing and fix-ing closed seasons, having due regard to the zones of temperature, breeding hab-its, and times and line of migratory that insect perturbations the denartiment that insect perturbations that perturbations the perturbation that perturbations that perturb its, and times and line of migratory flight, thereby enabling the department to select and designate suitable districts for different portions of the country within which said closed season it shall not be lawful to shoot or by any device kill or seize and capture migratory birds within the protection of this law, and by declaring penalties by fine of not more than \$100 or imprisonment for ninety days, or both, for violations of such regulations. Section 3. That the Department of products to the value of \$800,000,000 a year.

> final adoption, permitting, when deemed proper, public hearings thereon, and after final adoption to cause same to be enrossed and submitted to the president of he United States for approval; provided, the United States for approval; provided, however, that nothing herein contained shall be deemed to affect or interfere with the local laws of the states and ter-ritories for the protection of non-migra-tory game or other birds resident and breeding within their borders, nor to pre-vent the states and territories from en-cetting laws and apprications to promote

acting laws and regulations to promote and render efficient the regulations of the Department of Agriculture provided Section 4. That there is hereby appro-priated, out of any moneys in the trasury not otherwise appropriated, for the pur-pose of carrying out the provisions of this act, the sum of \$10,000.

Disposing of State's Rights. In every attempt to secure legislation of this character its advocates have been

would infringe the rights of the states. The committee disposes of this contention briefly, but pointedly. They show that crease their size at birth 10,000 times in protection of game accompanies a bill, for many years European countries have thirty days. No less than 176 specimens reported to congress by Senator George protected bird life by treaties, regula- of insects attack the apple, plum, peach \$7,500,000, and of this amount about \$7,000. B. McLean of Connecticut, to protect tions and international decrees, and they and cherry trees; 400 species are found 000 has been expended in the construcmigratory game and insectivorous birds add that the fact that several states of upon the oak. the union have exercised the right to regulate the taking of both migratory and non-migratory birds where no discrimination or distinction has been suggested or desired does not preclude the in staying the inroads of insect devastanation from asserting its right of protecting migratory birds whenever conditions make such protection necessary. "The power of the federal government to regulate by treaty the taking of migratory seals and fish cannot be questioned," says the report, "and your committee can see no distinction between the right to regulate by law and treaty the taking of seals and fish that today may be in the waters of one state or nation and tomorrow in the waters of

WEST POINT IN NEW GARB garding the different positions he had "Jim" was telling of a period of his

early newspaper days when he had held National Military Academy Undermany places and none for long. "Then where did you go?" thundered the lawyer after Evans had told of

working a few days in the southwest. "To Dallas, Tex. Worked two weeks," replied Evans.

"Why did you change?" asked the lawyer.

the question of national policy," was the answer. "Then where did you go?"

"To New Orleans. Left there in a week.'

"And what was the reason this time?" from the attorney.

"Same, thing," answered Evans with a smile. "The proprietor and I found that we did not agree upon a political

hold something vastly different from the The same answer was given as Evans West Point of his own days, insofar as told of numerous other places he had equipment and magnificence of buildings taken and given up. The attorney finally gave up his attempt to break down Evans with the remark: "You must be a hard man to get along with if you the ancient chapel, which has been moved have such set political ideas."

A few days after the case had been decided Judge Brentano met Evans on the street.

"Say, Jim." he asked. "what was that question of national importance that cost you so many jobs? What did you and your bosses disagree over?"

"Prohibition," answered Evans with smile .- Chicago Tribune.

Women who bear children and remain healthy are those who prepare their systems in advance of baby's coming. Unless the mother aids nature in its pre-natal work the crisis finds her system unequal to the demands made upon it, and she is often left with weakened health or chronic ailments. No remedy is so truly a help to nature as Mother's Friend, and no expectant mother should fail to use it. It relieves the pain and discomfort caused by the strain on the ligaments, makes pliant and elastic those fibres and muscles which nature is expanding, prevents numbthe plans of the architects have been ness of limbs, and soothes the inflam-

> may not be safely met. Mother's Friend assures a speedy and complete recovery for the mother, and she is left a healthy woman to enjoy the

rearing of her child. Mother's Mother's Friend is sold at drug stores. Friend Write for our free book for expect-

ant mothers which contains much valuable information, and many suggestions of a helpful nature.

It a woman is strong and healthy in a womanly way, moth-erhood means to her but little suffering. The trouble lies in the fact that the many women suffer from weakness and iscase of the distinctly feminine organism and are unfitted or motherhood. This can be remedied.

Dr. Pierce's Favorite Prescription

Cures the weaknesses and disorders of women. It sots directly on the delisate and important ortens concerned in motherhood, making them healthy, strong, vigorous, virile and elastic.

"Favorite Prescription" banishes the indispositions of the period of expectancy and makes baby's advent easy and almost pauless. It quickens and vitalizes the feminine

organs, and insures a healthy and robust baby. Thousands of testified to its marvelous merits.

It Makes Weak Women Strong. It Makes Sick Women Well. Honest druggists do not offer substitutes, and urge them upon you as "just Accept no secret nostrum in place of this non-secret remedy. It as good." contains not a drop of alcohol and not a grain of habit-forming or injurious sruge Is a pure giveeric extract of healing, native American mots.

Omaha Electric Light & Power Company

Girls Pretty School Gowns

It is now a pleasure for the economical mother to plan the spring and summer dress needs of the young school girl because Serpentine Crêpe is not only the most beautiful, longest wearing and most graceful draping cotton

crèpe made, but because of its peculiar crinkly weave it does not require ironing and costs but little.

When the garment becomes soiled, simply wash in the usual way, shake out and hang up to dry and the garment is ready to wear again.

Mothers of many girls will appreciate this particular feature, for you can always send your daughter to school with a clean frock without the labor of ironing.

Serpentine Crepe commands the largest sale of any printed crinkly fabric in the world, because no other fabric gives so much beauty, wear and style for so little money.

A large assortment of patterns and colors to suit the most fastidious, at very reasonable prices.

Look for the words "Serpentine Crêpe" on selvage of every yard when buying. It will protect you from selecting crepe that will not satisfy you.

Sold in Omaha by leading department stores

last word in equipment so far as instruction in horsemanship is concerned. Next, on the Hudson side of the picture, but not yet completed, is the secend of the new academic buildings. It is at present one-fourth finished and will be ready for use early next fail. The officers' club, a classic structure built by officers who are graduates of West Point and not by the government, is the building that stands just to the north of the riding hall. Then comes another splendid structure, Cullum hall, a gift to the academy in memory of its greatest superinendents. In Cullum hall are held the West

Point graduation exercises and other important functions. From its rafters and along its walls are suspended scores of flags, tattered and sacred relics of great battles in which West Pointers have won glory for their alma mater. Another beautiful structure is the ho

of the bachelor officers who are detailed for duty at the academy.

Magnificent New Chapel. These are the new buildings that stand out prominently in the picture of the new West Point as viewed from the Hudson side of the reservation. Back of them and on a great hill that overlooks the plain below and which can be seen for miles is the magnificent new chapel, with its great memorial window, which emphasizes, by scenes and characters taken from biblical and ecclesiastical history, "duty, honor and country," and which is a memorial to West Pointers who served their country well.

"To the Glory of the God of Battles and in Faithful Memory of the Departed Graduates of the United States Military Academy at West Point. Erected by the Living Alumni, MCMX," is the inscription that tells the story of that window, the most beautiful and costly of any in any church in this land.

On the plain proper, the new buildings that stand out most prominent are the gymnasium, the new north cadet bartacks, the finished academic building and the new one in process of construction, the new homes of the married officers, the new north battalion guardhouse, and, just beyond the reservation in the direction of Highland Falls, the splendid group of buildings for the cavalry and artillery on duty at West Point.

In the cemetery on the hill West Point there is also a new and at the same time a very old building-the ancient chapel in which Grant, Lee, Jackson, Shermah, Sheridan, Thomas and all the other great West Pointers worshiped as cadets. It was taken down stone by stone to make way for the second of the new academic buildings, and re-erected in the famous old cemetery. It is to be used in future as a mortuary chapel New York Times.

QUESTION OF NATION'S POLICY Disagreed with Managing Editors.

the Reporter Moved from Town to Town.

At the meeting of the Illinois Bar association in the Hotel La Salle, Judge Theodore Brentano of the superior court told of a case tried before him several years ago at which the late "Jim" Evans, a widely known and universally liked newspaper writer, was a witness. Evans had given important evidence and the opposing attorney was doing his sest to shake his testimony. He had made Evans go back over his nest life and was questioning
