quest May Be Held Thursday by Coroner.

Coroner's Physician S. McCleneghan has completed his report of the post mortem examination of the body of Louis Wolf, the dead catteman, and at the inquest he will offer testimony which it is believed will refute all arguments for the theory of suicide.

Dr. McCleneghan says that with the assistance of Drs. Harris, Goetz and Hoffman he had made a careful study of the body. He found that the bullet, which was a steel-jacketed ball from a .28 caliber revolver, had entered Wolfs body from the left side, passing through the lower part of the left lung, causing a hemorrhage in the left side. As the bullet tore its way through the flesh !! struck the spinal column, but did not deflect in its course. The dorsal vertebras was fractured and this caused Wolf's legs to become paralyzed. The bullet came out on the right side, fracturing the eleventh rib as it found its exit. According to Dr. McCleneghan death resulted from the attending hemorrhages,

The course of the builet was downward, the point of exit being as much as three inches below the point of entrance on the opposite side of the body. This fact in itself makes the sulcide theory look in-"Speaking unofficially," said Dr. Mc-Fine improved farm of 560 acres Cleneghan, "it looks like Wolf was shot
