Kansas Estimates Raising and Much New Wheat is Being Sold.

CORN WEATHER IS FAVORABLE With the Light Supplies of Corn in

the Country the Big Decline in

Prices Sems to Have Discounted Outlook.

OMAHA, July 13. 1912.

The weather is generally favorable in all directions and the crop outlook is unquestionably fine. Kansas estimates are being raised and there is considerable selling of new wheat. It is doubted it the crop movement to Chicago is anywhere near as large as last year, but it must not be forgotten that soft wheat states instead of being shippers, will have to import large quantities this year. The cables are strong, 1½c to 2½c higher. Prices are so close to an export basis that it is believed selling has been overdone and that wheat should be sold only on bulges. The foreign market took a sudden jump upward. This rise was not due to any weather or crop conditions but a bombardment of the Dardanelles strait, which resulted in it closing. This stopped the shipmers of wheat from riussia and caused great commotion in toreign markets. Cash wheat unchanged to 1c higher. OMAHA, July 19, 1912.

The weather throughout the corn belt is very favorable as a rule. Cash demand was much better on the crop yes in the country, the big decline in price uppears to have discounted the promising crop outlook, especially as new corn within the available for live months yet.

B. W. Snow, the crop expert, says "Yesterday's rain did not reach south of the yand the crop is suffering strain some corn is beginning to tassel, not over four feet tail, while other fields with not average a foog high. The color is generally good, but the plant has stopped growing and in curings, At present Nebraska, south of the Platte, does not promise a 70 per cent crop, and unless much leas." Cash corn was %good higher.

Chicago received 10 cars outs. The crop outlook is favorable. The sales were very liberal yesterday and a little stead; there is a moderate pressure in the way of hedges against the new crop. keyed inpatient dealers to an almost unbearable tension.

A majority of active speculators found themselves in the predicament of having sold short owing to the magnificent crop prospects of late in the United States. Wild competition to even up such transactions resulted in hoisting prices 2%c. quicker than the record could be flashed out of the exchange. In the jostling, swaying crowd, no one stopped to take breath until there was an unconfirmed rumor that the closing of the straits had been revoked. Reaction from the extreme advance carried wheat values back almost to yesterday's closing figures. Erratic and frequent fluctuations were based on the varying reports and denials current. As the session progressed, big export sales were reported. Between the opening and the close, September delivery sales swung from 33%anathe to 5%c. and wound up nervous at 94%c, a rise of 1%c net.

NEW YORK, July 19.—To the accompaniment of greater activity today's stock market increased its gains of the last few days. The rise was so gradual as to be almost imperceptible and gave color to the belief that the movement was deriving its chief impulse from expert manipulation, as well as inside absorption.

The same condition that served carlier in the week—the crop outlook, increased activity in various fields of industry and easter money—were again contributing factors. United States Steel was under some pressure at times, but soon moved \$2.60@2.65.

factors. United States Steel was under some pressure at times, but soon moved forward with other speculative favorites, although in lesser degree than Union Pacific, St. Paul, Amalgamated Copper and numerous specialities. Some of the latter advanced 2 to 5 points.

Reports of general betterment in most lines of trade found confirmation in the increased bank exchanges, although this gratifying condition is somewhat nullified by poor collections in certain sections. Local banks continue to gain from the interior, this week's cash increase being estimated at less than \$6,00,000, with indications of another loan contraction.

Bonds were steady, with total sales, par value, \$1,985,000. United States government bonds were unchanged.

The bulk of the receipts has consisted of fat sheep, mostly wethers and ewes. Some pretty good sheep arrived here during the week but like lambs have as a rule been slow to sell and values to-ward the close of the week are fully 25@40c lower than the close of the pre-vious week. Wethers have shown a little more weight than for some time back and on this account have sold at a slight disadvantage. Trade in yearlings has not been very large but they showed greater declines than anything else on the market being 50c lower than last Quotations on sheep and lambs: Good
