stages of Malaria the complexion becomes pale and sallow, the appetite is affected, the system grows bilious, and there is a general feeling of weak-

ness. As the circulation becomes more thoroughly saturated with the ma-larial infection, the digestion is deranged, chills and fever come and go, skin diseases, boils, sores and ulcers break out. Malaria can only be cured by removing the germs from the blood. S. S. S. destroys every particle of malarial infection and builds up the blood to a strong, nourishing condition. Then the system receives its proper amount of nutriment, sallow complexions grow ruddy and healthful, the liver and digestion are righted and every symptom of Malaria passes away. S. S. S. cures in every case because it purifies the

blood. S. S. S. is a safe and pleasant remedy as well as an efficient one. Book on the blood and any medical advice free to all who write.
