CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade. CHICAGO, July 27.-Indecision as to the chance of rust damage northwest had an unsettling effect today in wheat. The market closed nervous at prices varying from %6¼c off to ¼c advance, as compared with twenty-four hours before. Latest trading left corn %6½c down to ½c up, oats at 1-16c to 2½c lower and provisions strung out from a shade decline to 12½c increase in cost.

Canada sent denials that rust was in-Canada sent deniais that rust was inevidence and threatening the wheat crop
at various points north of the international boundary. The fact that the
plague had spread in North Dakota
seemed to be confirmed, but there was
high authority for the assertion that
three-fourths of the yield in the state
was safe and that the whole of South
Dakota and Minnesota had examed

Dakota and Minnesota had escaped harm. Caution kept the active deliveries of

Caution kept the active deliveries of wheat from fluctuating more than half a cent either way from last night's level. Export inquiry is said to be good, but the effect was offset by knowledge that the west was selling wheat freely today to arrive. September swung between 93%c and 94%c closing at 93%@93%c, a loss of 14@14c net.

Favorable weather gave the advantage to the bears in the corn pit. September ranged from 64%@64%c to 651/4@65%c, with the close steady, 14@1/4 net lower at 65%c. No. 2 yellow, 74@74%c.

Execution of a few selling orders led to a severe break in the July delivery of oats and caused other options to ease off. Outside limits for September were 32%c and 33%c, with last sales 33c, a decline of 1/4c from last night.

it ever has been in the history of the trade. Good fat cows and heifers have also been good sellers throughout the week and they are 25c higher than last week. Canning stock is slow at about steady prices, but medium kinds of killers have Texans: been rather slow and in some cases possibly they are a little lower than last week. Stock cows and helfers have been none too plentiful and they are possibly a little higher than last week's low

point.

The demand for stock cattle and feeders has been somewhat broader this week, and butchers, \$2.006.35; good heavy, \$8.20 but still it is a noteworthy fact that the country is making serious objection to SHEEP AND LAMBS—Receipts, \$00 country is making serious objection to prevailing high prices and buyers are very much inclined to hold back in hopes of securing lower figures later on. At the close of the week the best grades of stock and feeding cattle are stronger, with the less desirable kinds steady.

HOGS-Trade in hogs today was again active and about a dime higher than yesterday's seneral market. The market terday's general market. The market opened early, and as recently shippers were the biggest and strongest buyers druing the first hour of trading, packers buying sparingly as usual at the opening. Shippers paid prices fully a dime higher for anything sulting their purposes, while packers also paid the same advance for the good light and butcher kinds. Mixed and common hogs sold at prices only 5c to 10c higher. Trade continued active throughout the entire morning, a complete clearance being made by 10 o'clock.

throughout the entire morning, a com-plete clearance being made by 10 o'ciock. Bulk of the sales were around \$7.6027.75, and a load of good shipping hogs made a top at \$7.87%, 12½c higher than the highest price paid yesterday. Receipts were fairly large for a Satur-day, as about 132 loads were reported in. Quality of the offerings was considered a vertic fair for this time of the year. as pretty fair for this time of the year and very little different from yesterday Receipts for the week amount to about 45,500 head, being about 10,200 head short of last week, but almost 300 head more than for the corresponding time a year ago. Bulk of the sales a week ago was evailing at the end of last Representative sales:

The receipts came in two shipments, one of four cars and the other consisting of one load. Quality of both consignments was fairly good, but not quite as good as the best lambs on yesterday's market. Everything was sold early in the morning at steady prices. four cars with about a deck out bringing \$\frac{7}{4}\$, and the remaining load bringing the same price, with about fifty head out.

With liberal receipts of fat sheep here at the opening of the week and a weakness in the eastern mutton trade, prices fat sheep declined fully 10\$15c on nday. On about almost every day for fat Monday. Monday. On about almost every day buyers have apparently been trying to reduce values to a lower level, consequently trade was slow and dull, leaving the market at the end of the week 250,40c lower and in some cases 50c lower on wethers as compared with the close of last week. Ewes may be quoted at about 25c lower and yearlings are very nearly steady. As a matter of fact not many yearlings have been coming of late, but there has been a good sprinkling of ewes, and wethers have been marketed in fairly large numbers.

in fairly large numbers.

The supply of fat lambs has been comparatively small, quality in general displaying little improvement over last year. There were, however, some pretty good lambs among the offerings and they have shown an advance of fully 25640c over last week's close. There being less demand for lambs on the medium order the advance on them was not so great, being around 15@35c. The scarcity of choice lambs on the market has enabled sellers to get better prices for the in-between-

stuff.

The feeder trade has been of larger proporitions as about \$,500 head were shipped to the country. This is about 4,000 head more than a week ago. As yet there has not been a very big demand for feeding sheep or lambs, not many feeder buyers appearing on the market.
