## **GRAIN AND PRODUCE MARKET**

Export Buying of Wheat Keeps Up Prices at the Close.

CORN IN NEED OF MORE RAIN

County Tributary to Chicago is Getting Dry-Bottom Prices for the Year Are Reached on Oats.

OMAHA, Aug. 3, 1912. Even with some staggering crop figures to create bearish feeling Friday, there was a half-cent good rally at the close because of export business done through Chicago amounting to nearly 1,000,000 bushels. The 3,000,000 bushels of hard wheat delivered the last week in July found buyers at once and cash sales this week have reached 3,000,000 bushels in Chicago. There is every indication that the people across the At-lantic are all attracted by the fine quality of the new crop on this side. These are all sustaining fentures. The market will have no run of soft wheat to take care of. Receipts have fallen off sharply since the July contracts expired. Against all this is the bearish effect of the favor-able northwest crop news. Many leaders in the trade think the selling side is pressed enough for the present. Cash wheat was unchanged.

There is not much rain over the western com belt, as suggested yesterday by the forecast. It is too cool for best pro-gress of the corn crop over the big states tributary to Chicago. On the whole there is a sort of anxious feeling about the weather and crop news. Safe leaders in the local trade are friendly to the buying of September corn on reduced sup-plies from the 1911 crop. The trade is in a position to follow quickly any strong leadership either way, but the weather for August will make or unmake the crop and the public will be guided accordingly in the late corn months. Cash corn was 1/2 lower to 1/2 higher.

Bottom prices for the year were made in oats futures just at the close Friday. Cash prices for the new oats had a re-markable decline for the week. Harvest returns are very bearish and a run of bad weather is the only thing that can create

buil talk.

Cash 1/2 c lower.

B. W. Snow, Bartlett-Frazier's crop expert. wires: "The returns of my local agents indicate a per acre of hay agents indicate a per top lost year and agents indicate a yield per acre of hay of 1.35 tons, against .95 ton last year and a total crop of 51,000,000 tons, against 37,000,000 tons last year. These figures do not include wild hay, which the government includes in its report. On the government basis the crop should show about 62,000,000 tons, against 46,000,000 last year, making it about a normal hay crop in spite of a small reduction in acreage."

CHICAGO GRAIN AND PROVISIONS cool throughout the corn and wheat

Features of the Trading and Closing Prices on Board of Trade. CHICAGO, Aug. 3.—Statements that the edge of foreign demand was dulled had a weakening effect today on the price of wheat. The market closed irreguiar, 1/4c lower to 1/4/61/2c up. Later trading left corn unchanged to 1/4c lower, oats 1/2c to 1/4/61/2c lower and provisions varying from 10c under to a shade higher. Although prospects were for much lighter world's shipments than a year ago, no responses came from Europe in answer to American offers to export wheat. This fact with North Dakota advices that so far rust was not hurtise from proved dishertening to builtadvices that so far rust was not hurting crops proved disheartening to buils. Dread of frost in Canada heiped bring about a show of strength in wheat at the outset, but seemed to have nothing to do with a builge which made the September option conspicuous near the close. A local short in that future was covering on a liberal scale, but at the same time was actively reselling December. September flucuated from 25%(253) to 18 sc, with last sales, 22 to up at 18 c.

An estimate that the hay crop would be 16,900,000 tons larger than a year ago, exerted a bearish influence on the corn market. September swung between 65%

market. September swung between 68% and 66% 65% c, closed firm at 66% 666% c, just the same as the night before. Cash demand was moderate. No. 2 yellow was quoted at 749744c.
Oats reached a new level for the season. September ranged between 314c and 75%c, with the close, 314c, a fall of 46%c

Provisions dragged at the close; pork and lard were be to 10c off, but bacon neid unchanged.

Closing quotations on futures were:

\*sunday. Receipts and disposition of live stock at the Union Stock Yards, South Omaha, for twenty four hours ending at 3 o'clock yesterday. RECEIPTS-CARLOADS.

Cattle. Hogs. Horses. inion Pacific. 

Rilled western (Gric; turkeys, 100 page 1 pa light receipts and prices are generally 59c higher on practically all kinds. Trade has been active every day and in a very healthy condition as viewed from a

seller's standpoint.

Stock cattle and feeders have moved somewhat more freely this week. As it becomes, apparent that there will be plenty of feed this fall the country is showing more anxiety for feeding cattle and buying orders are coming in more freely than any time thus far this seaand buying orders are coming in more freely than any time thus far this season. The fact that people generally are coming to realize that there will be a scarcity of feeding cattle this fall is naturally making would-be buyers more anxious to secure what they want and thus avoid the rush to buy that is likely to be a feature of the trade later in the season. Prices have shown strength this week under a free buying demand and

and lambs today, as none arrived on the market, consequently values remain nominally the same as on yesterday.

Offerings of fat sheep were considerably more numerous this week than any time previously this season, wethers comprising the bulk of the receipts. Quite a few wethers were of a good class, but showed too much weight to be ready sellers, packers as a rule favoring choice handy weights. At the close of the week prices on the best kinds were all of 100 life lower than a week ago. As the less desirable killers were in abundant supply trade was slow and dull, ut prices generally held up comparatively well, being anywhere from steady to 15025c below the prices prevailing at the close of last week. Notwithstanding the slowness of the general trade demand has been good for anything that would make really good lettless.

for anything that would make really good killers.

A little better trade was noted in the lamb market in comparison with the fat sheep. The situation was generally satisfactory to sellers, especially on cheice lambs, when considering the lower trend of values for nearly all other kinds of sheep and lambs. Prices for the best kinds at the end of the week were fully steady with last week's close. The common to medium grades that sold as killers might be quoted as weak to a little lower.

Gerrit Fort, passenger traffic manager off a prize as a Highland dance though he is a grandfather and the of the clan had called him "old."

W. J. Hislop was in charge of the gram, which began with a picnic and ended with a dance in the end of the week were fully steady with last week's close. The common to medium grades that sold as killers.

A little better trade was noted in the lamb market in comparison with the fat speech written by his office boy that he may deliver it tonight at the Ak-Sar-Ben den.

It is "railroad night" and all the big and ended with a dance in the end of the other members of 'he arrong of the Union Pacific, is memorizing a though he is a grandfather and the of the clan had called him "old."

# SOUTH DWELLERS PROTEST

at Picnic of Scots Creighton Addition Club Objects Ordinance.

WOULD KEEP OUT BRICK K

Allegation Made Passage of Would Permit Other Brick Kilns to Be Established Where Now Prohibited.

Protest was entered Saturday at a meeting of sixty residents of the Creighton's First Addition club against the proposed ordinance recently introduced by Commissioner Withnell altering the conditions for the operation of brick kilns in the city. It was stated at the meeting the ordinance amending conditions as they now exist will permit the operation of brick kilns in the city limits anywhere, whereas the present ordinance prohibits them. The ordinance introduced with a view of permitting the location of a kiln at Thirty-seventh and Wright streets. W. H. Hatteroth was president of the meeting and A. Binder secretary. The following resolutions were passed:

Whereas, We learn with surprise that an innocent looking ordinance has recently ben introduced in the Omana city council ostensibly to "amend" Ordinance No. 6673, being an ordinance prohibiting the erection of any brick kiln or brick oven in the city of Omaha, but which proposed ordinance in effect is designed to repeal said ordinance No. 6673; and, Whereas. The property owners of this section of the city and of every other section of the city are vitally interested in this question of permitting any more brickyards to be crected within the city limits; now, therefore, be it

Resolved, By the Creighton's First Addition Improvement club, in regular session, that it is the sense of this club that ordinance No. 6673, which prohibits that ordinance No. 6673, which prohibits the erection or construction of brick kilns and brick ovens within the city limits of the city of Omaha, should remain in place for hearing further protests from

Whereas, We learn with surprise that

all persons and property owners inter-ested in this subject and who may be affected by the proposed ordinance, and be it further
Lesolved, That all improvement dubs and citizens be urged to enter a protest against the proposed ordinance and a pear before the council next Tuesday at 10 o'clock a. m. and make a personal ap-peal against the passage of said proposed ordinance, and be it further Resolved. That a copy of these resolucity clers with request that the same be presented to the council at its next meet-

7% Cumulative Preferred Stock

Preferred as to Assets and Dividends

Dividends eayable quarterly March 1, June 1, September 1 and December 1 Transfer Agents: Backers Trust Co., New York, and Illinois Trust & Savings Bank, Chicago Registrars of Stock: Quaranty Trust Co., New York, and First Trust & Savings Bank, Chicago

Application will be made to list this issue of Stock on the New York Stock Exchange

Free of Tax in the States of Illinois and Missouri

We recommend this stock for investment for the following reasons:

Established Business For 65 years the Company and its predecessors have been manufacturing plows and other implements which are an absolute necessity in the fundamental industry of agriculture.

Management

The men in charge of the business are able and experienced. The average age of the 17 directors of the Company is 47 years and the average length of their service with Deere & Co. or its subsidiaries is 23 years. Conservative Policy

# The Company is now paying all of its relatively small funded debt as it matures out of earnings instead of paying dividends on the Common Stock. A

reserve of at least 4% on gross sales is deducted from the gross profits for possible contingencies before arriving at net earnings as reported. For the six months ended April 30, 1912, this reserve appropriation amounted to over \$600,000. Earnings The Company reports net earnings applicable to dividends as follows: Six months ended April 30, 1912. \$2,649,162 Annual average for six years ended October 31, 1911. \$3,702,344

Estimated for year ending October 31, 1913 ..... 5,000,000 Quick Assets

Net quick assets on August 1, 1912, after deducting current liabilities, at least \$34,000,000, or approximately ninety cents for every dollar of Preferred Stock outstanding.

Trade Name

The Company is the largest producer of steel plows in the world and manufactures and sells a varied line of other farming implements and vehicles. The trade names of Deere & Co. and of the John Deere plows are conspicuously well known and favorably regarded.
