The encroachments of the Missour iver near Honey creek last spring, which ale away the land upon which stood several miles of expensive levee that FARM & RANCH LANDS FOR SALE was built a few months previous, will EXCELLENT British Columbia farm by the embankment if the section that lands in 40-acre blocks; \$50 cash and \$15 monthly. A splendid opening. Detailed information on request. Reliable agents wanted. National Finance Company, Ltd., to the instructions of the Board of County County Surveyor Spetman, in obedience Supervisors, made resurveys and has reported to the board that the cost for the new bank and additional right of

way will be \$8,134.25. The supervisors yesterday went Logan to confer with the Harrison drainage ditch matters and made a detour for the purpose of inspecting the broken levee. They will take up the

matter today and determine its solution. In his report, the engineer advises against the reconstruction of the leves on what remains of the old right-of-way declaring that there are no assurances current might return to its destructive work this year or the channel might remain at its present location for the next ten years.

If a new right-of-way is decided upon the work of repairing the levee will be delayed for a long time and cannot be completed this season. New commissioners will have to be appointed to appraise the land to be used and it will then have to be condemned in the usual formal way, followed by a hearing of all interested and a reassessment of benefits valuable farm lands in the territory north of Crescent is causing considerable apprehension among the owners that the channel of the river is being diverted to the lows side by a bar that is forming on the Nebraska shore several miles above the point of present attacks and that the bar has been artificially produced by Douglas county farmers. The river current is manifesting a disposition to bend toward the Iowa side for a long distance in the vicinity of Crescent and Honey creek and the farmers are talking of some plans to arrest it The government may be asked to try the experiment of constructing wing dams on the lows side.

A story with a moral for the agricultural supply man

Here is a little story, many years old. A young farmer was complaining because he had so little money. Said a neighbor: "If you dig deep enough in that turnip field next your house, you will find gold." So all summer he toiled and dug; he had a wonderful crop of turnips, but found no gold. One day the neighbor met him, looking weary and sorrowful, driving a load of prize turnips to market.

"I see you found your gold," said the neighbor. "Where?" said the lad. "There," said the smiling neighbor, as he pointed to the big, round, yellow turnips.

The wonderful gold mines of South Africa, the Rand mines, yield \$175,000,000 a year. Their discovery startled and thrilled the world. The yearly output of the farms of the late of Nebraska exceeds \$400,000,000; the total farm population is a little over half a million; the state is not yet half tilled. This has not thrilled anybody yet-it's time it did.

It is time for the people of Omaha and the state to wake up and realize that Nebraska is full of gold; that all it needs is to be scientifically and thoroughly and completely cultivated and farmed.

Some things are being done in Nebraska and are well done. Fortunes are being made by those who are doing good work, using both their brains and their hands.

In order to compel our own people to do as well as the best, and to attract those who are ambitious to come to a state where so many opportunities lie open. The Bee is about to issue the

Nebraska Development Number The Omaha Bee

The Bee asks those to co-operate with it in distributing this magazine who will soonest and most directly be benefited by a greater farm output.

The creameries, the live stock commission men, the poultry supply houses, agricultural implement concerns, all depend for the growth of their business on the growth of the farms. They will do well to stock up with the Develop-

ment number, and send it out far and wide, all over the United States, to Canada, even to Europe. Nebraska needs more farmers, who will produce

more grain, more cattle, more cream-more turnips. This magazine number will appeal to farmers; first, because of its appearance-it is about 14x10, on book paper, stitched, edges trimmed, beautifully illustrated; second, because it contains just the infor-
