Connell is a brother-in-law of Charles Morley, connected with the outbreak at the penitentiary last spring, and was sent up for holding up Louis Parsley at his place of business in Omaha. Parsley was forced at the point of a gun to hand over \$120 in cash and in addition an overcoat which was afterwards identified and led to the arrest of Connell. Connell had been in trouble before in

Kansas City for stealing a diamond ring, but got out of it on payment of a fine of \$100 and costs. He then came to Nebraska and in company with his brothern-law, Morley, began operations which anded them both in the penitentiary.

TAIL OF NEW SPHINX SHOWN Wonderful Discovery in the Sands of Egypt Near Memphis.

Another sphinz, weighing ninety tons, and carved from a single block of alabaster, has been unearthed at a point between the world famed Colossi, on the waterlogged plains of Memphis, in Egypt. For hundreds of years it has lain in a recumbent position burled beneath the sands on the road to Sakkareh. Today it is half exposed to view, and next year

t is to be raised to a vertical position above the water line.

This newly found sphinx was betrayed in its hiding place by its tall, which Mr. Mackay, one of the students of the British school in Egypt, discovered about a year ago. This year. when the water on the plain subsided, the complete figure was excavated, and was found to measure some fourteen feet in height and twenty-six feet in length. Alabaster being a rock foreign to the neighborhood, the new sphinx ranks as the largest that has ever been transported. The figure bears no inscription, but is considered by Prof. Flinders Petrie, the director of the British school in Egypt, to have been carved about 1300 B. C. ing to the modern floral wreath. A beautiful piece of work consists of a ribbon of beads so threaded as to form intelligible hieroglyphics. The discoverer of this relic informed our representative that quite extensive portions of beaded dress material were also discovered, and are on the way to England. Amongst the numerous minor articles that demand attention is a New Year's bottle, a small

Egyptian king. They are considered by

two-handled piece of pottery supposed, by the inscription that it bears, to be the customary type of New Year present to the head of the house. Evidence is provided of the lack of historical sentiment in the Roman occupants of Egypt by numerous examples of inscribed Egyptian tablets that have been used as hearth stones, door lintels, and millstones. There is also ample evidence of the belief that sacrilege amongst the tombs was more common in the earlier periods of Egyptian history than in later periods .- London Standard.
