DEMOS FORGING HARMONY

Number of Unterrified Talk Hard, but Battle Little.

EYES UPON THE FLESH POTS

A. V. Johnson, President of Wilson and Marshall Club, Supposed to Have Eye on Postmaster-ship at Lincoln.

(From a Staff Correspondent.) LINCOLN, Aug. 10.—(Special.)—The expected blowup did not take place at the meeting of the Wilson and Marshall democratic club in Lincoln last night. It had been given out that because Mr. Bryan had opposed the formation of the present club because its promoters were opposed to Wilson for the nomination for the presidency, and had issued a statement that upon his return home there would be another club formed, composed of "sure enough" Wilson democrats, that there would be a display of oratorical fireworks from some of the faithful who are not fully in accord with Mr. Bryan in all his political doings and especially because of what they term his "betrayal" of Champ Clark at the national convention.

That harmony may possibly prevail among the democrats of the capital, may be a fact, but one thing is sure and that is that a political volcano underlines the democratic stronghold which may turn loose at any slight provocation. Colonel John G. Maher, who takes great delight in repeating over and over again that he is for the national ticket and urges other democrats to get on the bandwagon, has always made the statement with his hands in his pockets, so that bystanders could not see if his fingers were crossed. Colonel Maher is some fighter and when he takes a stand for a thing he generally fights that way, and inasmuch as he has published a signed statement condemning Mr. Bryan in no uncertain terms for his "betrayal" of Champ Clark at Baltimore, it is hard to understand his attitude at this time.

Pie Counter the Mala Thing.

A number of democrats do not relish the attitude of Mr. Bryan against the new club and do not like a little bit the intimation of Mr. Bryan that the members of the Wilson and Marshall club are not "sure enough" democrats. The former anti-Wilson men would probably like to tell Mr. Bryan just a few things, but hesitate whenever they think how close he is to Mr. Wilson and how much his "O. K." will mean to the man who wants a whack at the democratic pie in the event that Mr. Wilson should be chosen.

It is already hinted that A. V. Johnson, president of the Wilson and Marshall club, has his eye on the postoffice job at Lincoln and that Congressman McGuire, should he be elected, will not turn a deaf ear to the application of the friends of Mr. Johnson to have him appointed postmaster.

That a great many Nebraska democrats will vote for President Taft, if an opportunity is given, is quite evident. J. A. Reichenbach, a prominent democrat of several years ago, but who has been voting independent since 1896, says that in his travels over the state he finds quite a Taft sentiment existing among democrats who do not like the attitude of Governor Wilson. He thinks that the Teddy sentiment will die down to a great extent and that when republicans go to the polls to vote they will think twice before they cast a vote against the party that has made the country the greatest and most prosperous the world has ever known.

Notes from Pawnee City.

PAWNEE CITY, Neb., Aug. 10.—(Special.)—The Fourth of July committee reported a balance in the treasury of \$141.84, which it proposes to turn over to the Commercial club to assist in securing new street lights. The county commissioners will erect lamp posts, with a cluster of three lights on each post, at each corner of the square and at the entrances of it, and the street lights will be the same as these.

The chautauqua started yesterday evening with only a fair crowd present, owing to threatening weather, but the attendance promises to be as large as ever for the remaining days. Among the attractions are Governor Hadley on Monday evening and the Royal Italian Guards' band on Thursday evening.

A new and up-to-date heating plant will soon be installed in the academy building, which will be used as a high school building. The schools will open Monday, September 3.

Work is progressing rapidly on the new vinegar and pickle factory. The Rock Island switch track that will run out by it has been laid and the Burlington spur will soon be completed.

SUMMER COLDS

Are Considered by Doctors More Dangerous Than Winter Colds.

A person is quite as apt to catch cold in the summer as in the winter, but it is harder to cure a cold in the summer than in the winter. In winter the bracing air assists the remedy to overcome the cold, but the sultry, depressing weather of summer retards the cure of colds.

The public is much interested in knowing a remedy that will successfully cope with summer colds. A remedy that covers just such cases is Peruna. Experience has taught that it is the one remedy that promptly expels summer colds of every character and description.

Miss Ivy Gray, Fairview, Ky., says: "I have taken Peruna, and would say that it is the best medicine for coughs and colds I ever saw. I find that it always cures a cold in a short while. It also strengthens and builds up the system."

SPECIAL NOTICE—Many persons are making inquiries for the old-time Peruna. To such would say, this formula is now put out under the name of KA-TAR-NO, manufactured by KA-TAR-NO COMPANY, Columbus, Ohio. Write them and they will be pleased to send you a free booklet.

MOOREFIELD'S PATENT SULPHUR STEAM BATHS A wonderful treatment for Rheumatism, Lumbago, Gout, Kidney Trouble, Dropsy, Stomach Trouble, Catarrh, etc.

SOLOMON KOSAK, Prop. 507 North 24th Street, South Omaha.

Nebraska.

Odd Fellows Are to Dedicate New Court House in Central City

CENTRAL CITY, Neb., Aug. 10.—(Special.)—An invitation to dedicate the Merick county court house at Central City upon its completion on or about the first day of January, 1913, has been extended to the Grand Lodge of Nebraska of the Independent Order of Odd Fellows through the lodge at Central City, by the county board of supervisors. The exercises will be held in charge of the uniform rank of Patriarchs Militant. In addition to the local canton, there will be visitors from numerous towns in the state, numbering about one hundred men in all. Either Mr. Bryan or Mr. Norris will be secured as the orator for the occasion, as these men are both members of the order.

The fifteenth annual reunion of the Grand Army of the Republic, closed this evening, and is regarded as the most successful one ever held in the history of the institution. Large crowds were present at both afternoon and evening programs, and many veterans and their families encamped on the grounds. The total registration of old soldiers ran close to the 200 mark.

Alexander Herbert of Philadelphia has made all arrangements for opening a cigar factory here.

SAUNDERS COUNTY BALKS AT HELPING REPAIR BRIDGE

WAHOO, Neb., Aug. 10.—(Special.)—The county commissioners of Douglas county came to Wahoo today and met with the county commissioners of Saunders county relative to the bridge at Valley over the Platte river. The Douglas county members are trying to reach an agreement concerning the expense of repairing the bridge at that point. This county has always paid a third of the repair expense, under an agreement, but at this time are not inclined to help Douglas rebuild the bridge, owing to the fact that Saunders and Dodge counties are at present building two bridges across the Platte, one between Morse Bluffs and North Bend and one between Cedar Bluffs and Fremont. An agreement may be reached later.

At a meeting of the insanity commissioners of Saunders county yesterday Mrs. Nancy Hayes, wife of J. G. Hayes, living near Swedeburg, was adjudged insane and ordered committed to the asylum at Lincoln. Mrs. Hayes was taken to the asylum last night.

About twenty automobiles of Mead people were here today boosting the twenty-seventh annual old settlers' picnic, which will be held there August 15. Dr. A. L. Bixby of Lincoln will deliver the principal address.

NOTES FROM BEATRICE AND GAGE COUNTY

BEATRICE, Neb., Aug. 10.—(Special.)—Miss Augusta Epp, the young woman who was so seriously burned at her home in west Beatrice, was reported slightly improved yesterday.

The juries in the cases of Dr. F. W. Wildman of Blue Springs, and Harry W. Williams of Wynore, both of whom were charged with practicing veterinary medicine without a license, were unable to agree upon a verdict yesterday and were discharged. This will necessitate the cases being tried over again.

Ralph Jackson, an old resident of Wynore, and for years employed on the Burlington as an engineer, died Thursday of typhoid fever. The remains were taken to Edgar for interment.

The German Lutheran synod of the district of Nebraska will be held five days, beginning August 21, at the church four miles east of Cortland.

Mrs. Henry O'Donnell of West Beatrice died last evening after a prolonged illness of tuberculosis.

BRADFORD APPOINTED TO AGRICULTURAL SCHOOL

KEARNEY, Neb., Aug. 10.—(Special Telegram.)—Superintendent E. Bradford, head of the city schools the last three years, today sent his resignation to the local board of education, giving as his reason the appointment he had received at the hands of Chancellor Samuel Avery, of the University of Nebraska, to the principalship of the state agricultural school at Lincoln.

The school board will meet in special session Monday morning to consider the resignation. The professor was engaged in teachers institute work in Loup City last week to which place the appointment was sent him and from where he went to Lincoln.

The new position pays a salary of \$2,800, which is an increase over that paid in Kearney and carries the rank of professor in the University of Nebraska faculty.

FUNERAL OF TWO VICTIMS OF DROWNING AT HARVARD

HARVARD, Neb., Aug. 10.—(Special.)—The burial of Leon Stone, aged 17 years, who met his death by drowning Wednesday at Dewese, where his Sunday school class had gone for a day's outing, took place this afternoon at the Congregational church, of which he was a member, and was conducted by the pastor, Rev. B. A. Warren.

The funeral of Robert Richards, aged 19 years, who met his death at the same time and in the same manner, will take place Sunday at the home of his parents five miles northwest of this city, with interment in Harvard cemetery.

News Notes of Edgar. EDGAR, Neb., Aug. 10.—(Special.)—The following changes have just taken place in the business houses in Edgar: R. Stover, proprietor of the Stover hotel, and who has been keeper of that hostelry for the last twenty-five years or more, has rented it to D. W. Chambers of Axtell, Kan., and possession given, and is now under the management of the new proprietor.

E. P. King, a prominent groceryman of Edgar for the last twenty-six years, has sold his stock to C. A. Storrs of Sutton and he will take possession as soon as the stock can be inventoried.

The Commercial hotel will also change hands next Tuesday. Mrs. J. L. Vauvain and daughter, Miss Jennie, who have kept it for the last three years, have retired from the business and the owner has rented the building to T. J. Smith of Omaha, who has been engaged in the hotel business as night clerk in the Merchants hotel of Omaha.

Nebraska.

Notes from West Point and Cuming County

WEST POINT, Neb., Aug. 10.—(Special.)—The thirty-first annual session of the Cuming County Teachers' institute will convene at West Point on August 13 and continue its labors for five days. A special examination will be held August 15 and 16 by the state superintendent, James E. Deitzel. The instructors will be: Superintendent O. R. Bowen, West Point; Miss Caroline Marriott, Wakefield, primary department; Miss Lillian Koch, music. Lectures will be delivered during the institute by Mrs. Gilbert, Fremont Normal school; Prof. U. S. Conn, Wayne Normal school; Superintendent Moss, Wisper High school; Dr. H. C. House, Peru State Normal school, and Prof. James E. Deitzel, state superintendent of public instruction.

Marriage licenses have been issued during the week to the following: Walter F. Ott and Miss Anna Morderow of Beecher and Herman Stigge and Miss Augusta Beune of Aloys.

Crops show great disparity in yield in various portions of this county. Wheat and oats in the eastern portion are very light, wheat averaging fifteen bushels and oats thirty bushels, while in the western and central sections this yield is almost doubled. This is supposed to be due to the very uneven distribution of rainfall throughout this section of the state.

Sheriff Milt Keintz returned Thursday from Fairmont, Minn., bringing with him Max Becker, wanted here on a charge of forgery. Becker was employed last fall by Otto Prodoehl, a farmer, and upon leaving that employment he went to Bankport, signed Prodoehl's name to a check for \$30 and obtained the cash upon it at a local saloon. He was finally located and his arrest and extradition followed.

ASHLAND BULLDOG DRIVES BURGLAR AWAY

ASHLAND, Neb., Aug. 10.—(Special.)—Between 4 and 5 o'clock Saturday morning Louis Johnson, acting nightwatch, heard a noise in the alley back of Silver street, and called Dr. Earl Worley, who lives near. Worley's bulldog had been barking fiercely in the rear of the grocery store of W. C. Scott & Sons. On investigation the officer found the coat and vest, hat and shoes of the burglar, who had sawed off one of the iron bars to the window and was driven away by the dog before he could pick up his clothes and secure any plunder. The rear window was raised, but nothing appeared disturbed.

Notes from Auburn.

AUBURN, Neb., Aug. 10.—(Special.)—The Auburn chautauqua is now in progress and is being well attended and the program seems to please every one attending same. The talent is up to the expectation of the management and the patrons. Rev. Salsbury is platform manager and has demonstrated his fitness for the place. It will continue until Sunday evening.

The teachers' annual institute of the county will begin on the 19th of this month. A good program has been arranged.

Word reached here yesterday of the death of Mrs. Jacob Good of Peru, while visiting her daughter at Grand Island. She and her husband, Jacob Good, were pioneers of Nebraska. Mr. Good is a retired farmer and banker. Mrs. Good is the mother of Hon. Ellis E. Good of the Citizens' State Bank of Peru.

Notes from Aurora.

AURORA, Neb., Aug. 10.—(Special.)—Miss Violet, daughter of A. G. Sims of this city, will spend a year with Mr. and Mrs. Guy Bever Williams in Berlin, Germany, studying music. Miss Sims is a graduate of the Aurora public schools and has spent three years at the University School of Music at Lincoln. She will take voice and piano work in Berlin. Mrs. Sims will accompany them as far as Philadelphia.

Pioneers Will Meet in Wynot.

HARTINGTON, Neb., Aug. 10.—(Special.)—The annual picnic of the Cedar County Old Settlers' association will be held in Wynot this year on the 22d of this month. Wynot is making extensive preparations for the event and a splendid program is being planned. Ex-Governor Shallenberger and other prominent men are expected to be present and participate.

HINTS FOR WOMEN RATHERS

Things Fair Sex Ought to Remember When They Go to the Seashore. Always rest upon the beach at least two hours before entering the water. By that time you will have a ring of admirers large enough to give you a wide choice in the matter of a bathing companion. Select the brownest, handsomest, and most athletic of the men, making sure that his bathing suit harmonizes well with your own. Walk slowly with him to the water's edge, giving all the observers enough time for admiring comment. On first wetting your feet, gasp slightly or emit a melodious scream, at the same time clutching your partner's hands tightly. He will assume a protecting air, mingled with frank adoration. Cling to him more and more as the water grows deeper. By this time he will be your willing slave. At the first really high breaker, throw both arms around his neck and half strangle him in your embrace. Helplessness creates a multitude of sins. The more you maul him, the greater will be his ecstasy.

If he succeeds in getting you into the quieter water beyond the breakers, at once suggest to him that you would like to learn to float. He will teach you fully by alacrity. Sink slowly and gracefully into his arms, reclining in a graceful position. He will hold you safely and tenderly, never realizing that his support is quite unnecessary. After about fifteen minutes of this you will be ready for a continuation of the more violent embraces of the breaker-jumping. On coming out of the water, hurry home as quickly as possible. It is unhealthy to stand around in a wet bathing suit. Moreover, the woman has not yet been created who can make a good impression when she looks like a drowned rat. Your period of exhilaration is over for the day.—Lippincott's Magazine.

Obscured Identity. Judge Locke, presiding judge of the federal court, first district of Florida, was annoyed at seeing one of his attorneys, attendant upon a sitting of the court, put his feet upon the desk in front of the one at which he was seated. "Marshall!" roared his honor. "You will oblige me by identifying the legs to which those feet belong!"—Judge.

RESTORING DEAD TO LIFE

Efficiency of Artificial Respiration Increased Tenfold.

SUCCESS OF ANIMAL TESTS

Professor of Rockefeller Institute Says Process Should Be Used "In Each and Every Instance of Death."

Dr. Samuel J. Meltzer of the Rockefeller Institute for Medical Research, New York, in the course of recent experiments to discover a successful method of artificial respiration, restored to life two animals which he had caused to be put to death and which were dead in the common acceptance of the term. Both recovered entirely. He believes the method to be equally applicable to man and urges that it be tried in all cases of death; for it is quite possible, he asserts, that in cases of death from acute illness, the actual cause of death might be only of a temporary nature.

This laboratory worker, whose reputation is international, is known to scientists as an extremely conservative man. His positive statements, therefore, regarding the results of his latest discovery, have created a stir in scientific circles. It is certain that Dr. Meltzer has devised a method of artificial respiration tenfold more efficient than the older ones; and it is expected that it will be the means of saving countless lives. It is called pharyngeal insufflation, and is described in a preliminary note issued from the department of physiology and pharmacology of the Rockefeller Institute for Medical Research and printed in the Journal of the American Medical Association.

Briefly, the method consists of the introduction of a catheter into the pharynx, pulling out of the tongue, forcing the back part of the tongue against the roof of the mouth by pressure applied far back under the chin, putting the weight on the abdomen to keep air from being forced into the stomach, connecting the catheter with a bellows, and pumping air into the lungs. With very little instruction the layman can learn these methods as readily as the physician. Dr. Meltzer gives this explanation of his reasons for beginning the experiments which already have given such promising results.

"Serving on the commission on resuscitation from electric shock, appointed by the American Medical association, I became interested in this problem and began to study its solution experimentally. I now have reason to believe that I have already attained very promising results. Without discussing the question whether the method which I have developed should and would be recommended by the commission as the one which promises the best results, it seemed to me advisable to present it early to the medical profession.

"The method was studied and found efficient on four species of animals. But its real usefulness will be established only after standing the test in its application on human beings, and the final judgment will have to come from the physician and not from the experimenter in the laboratory."

Searching for the Remedy. The commission referred to by Dr. Meltzer was appointed to find a better means of saving life in factories and other industrial plants when artificial respiration was the required procedure. Its purposes were described fully when its organization was perfected early in the present year.

The majority of Dr. Meltzer's experiments were carried on with animals in which respiration had been paralyzed by means of a poison named curare. Here are some of his general remarks concerning the experiments, omitting, however, the details:

"The methods have been developed, and sufficiently tested by experimentation on four species of animals—dogs, cats, rabbits, and two monkeys. The most extensive series of experiments were carried out on dogs and cats. Since the chief object of this study was to find a method of providing efficient artificial respiration, it was best to study the efficiency of the methods on animals in which the normal respiration was completely abolished, while other functions were but little impaired.

"The experiments were therefore carried out chiefly on curarized animals, all of which received morphine and some receiving also ether. Without entering on details, I may state here, briefly, that in all animals, without exception, either of the two methods was all sufficient to keep up the lives of completely curarized animals for many hours in a perfectly normal manner.

"In a good many experiments the thorax was widely opened transversely and the heart freely exposed. No shock was observed in any case. In several instances the artificial respiration was discontinued as long as from six to seven minutes, until the pulse disappeared completely, the ventricles showing only a faint, inefficient beat. Nevertheless, restoring the connections for artificial respiration, heart and circulation were restored to normal within from one and a half to two minutes.

Back to Life in a Minute. "Several animals were kept under the influence of curare for several hours, but were otherwise not operated on; they were permitted to recover from the influence of curare and remained perfectly well. These methods proved to be sufficient to keep up the respiration in cases also in which the mediulla oblongata was completely destroyed or after complete abolition of respiration by intramuscular injection of large doses of magnesium sulphate.

A Smaller Six Cylinder Packard The New "38"

Left drive and control. Electric self starter; electric lighting. Starting, ignition, lighting and carburetor controls on steering column

that by means of these methods of pharyngeal insufflation artificial respiration can be kept up efficiently, and animals will be surely resuscitated from a purely respiratory death.

Causes of Death Temporary.

"Seeing no reason whatsoever why these methods should fail to accomplish similar results in human beings, I submit to physicians and surgeons my request to test the pharyngeal methods, as described here, on human beings wherever there is any need of artificial respiration; the opportunities will not be lacking.

"There are cases in surgery on the brain the thorax, or on other parts of the body, in which the respiration gives out, while the heart is still beating.

"There are cases of respiration insufficient also in internal medicine for instance in postdiphtheritic paralysis, in poliomyelitis, or in some cases of claspmania or coma. And there are the poisonings by morphine, illuminating gas, etc., or the shocks in accidents. The pharyngeal insufflation, when carried out with care, can certainly do no harm; its execution is very simple, and it ought to be tested in any of these cases.

"Furthermore, I can see no objection to its being tested immediately after death from any cause whatever. There is always the possibility that the actual cause of death might be, in one case or another, especially in acute cases, only of a temporary nature, so that efficient artificial respiration might assist in temporarily and thus prove occasionally lifesaving indeed.

"Such possibilities, though they may be realized only once in a thousand times, justify the making of such an attempt in each and every instance of death. It is thus that the efficiency of pharyngeal insufflation in human beings, could be tested early and reliably. It is hardly necessary to point out that it would not be a fair test of the method to try it after rigor mortis had set in."

MAKES LIVING FROM POPCORN

Clever Washington Woman's Notable Success with Her Corn Kitchen.

A Washington, D. C., woman who has built up a popcorn business tells in the Housekeeper how she did it. She says she had to do something that would bring quick returns and would require very little capital at the start.

"I didn't say anything; but the next time I went to the city market I looked up a wholesale dealer and got a price on the best corn on the cob. By taking a barrel or more at a time I found that I could get it at a little more than half the retail price.

"When I went home I worked all one day in a little basement room, into which a side door opened from the street. I scrubbed that little room, used a little paint, put some matting on the floor and white curtains at the window, which could be seen from the street.

"Then I had an artistic friend paint me a white placard, lettered with black, that announced to passersby that in my little 'corn kitchen' could be had 'Hot buttered popcorn while you wait.'"

The Persistent and Judicious Use of Newspaper Advertising Is the Road to Business Success.

popcorn and a gross of white paper bags. I ordered also a rubber hand stamp, to convey the information that at Mrs. —'s corn kitchen, giving address, the most delicious buttered popcorn was always to be had. Every bag was stamped, and one Saturday morning I opened shop.

"A little old brass kettle, which had been in the family for nobody knew how long I polished until it shone inside and out, and for a start filled this with the popped corn generously buttered, keeping it over a jet of gas, turned low, so it would be hot. That very night I sent a rush order for more bags.

"I sold each bagful for 5 cents, and I didn't shrimp on butter as to quantity or quality; but when you think how little waste there is in popping good corn and how little butter it takes to flavor a big lot of it you will understand that I wasn't losing money.

"From the first day the corn kitchen flourished wonderfully. Now it has a place by itself and not in a basement. Corn balls, corn crisp and corn bars—all flavors—have been added, and other novelties are being planned. Every one who buys once goes out of his or her way to buy again. And I believe it is because my goods are always dependable. The fact that the quality of my wares never varies not only keeps customers, but brings more.

"My way of earning money may not be one that can be adopted by every woman—doubtless it isn't; but that there is a way for all who will look for it. I am convinced. Never be ashamed of the fact that you need to earn money. Study the situation intelligently, and when an idea comes to you follow it."
