An Investigation of the Causes Which Lead Men and Women Into Crime

By ELLA WHEELER WILCOX. tions be learned when there is any pos-Just at this particular juncture several unfortunate men are being held prisoners

for the deliberate planning of the murder of a fellow being Other men implicated will no doubt he added to the list before this ar-

ticle appears. The meanest and most despicable motive for crime in life is at the bettom of this dreadful and appalling act-greed

for gain. Certain men desired to break the laws of the land. Certain other men were bought who

The law-breakers were caught, and they

told the tale of buying the silent co-operation of the law protectors. Then these law protectors deliberately

der the man who betrayed their secret.

It is a shock to many people to know there are professional assassins. Many good people had believed that was always, in these days, the result of some wild impulse-of drunken-

ness, or jealousy, of anger, of self-protection or insanity. It seems almost incredible that men who are not moved by any of these emotions are to be found banded to-

gether, ready to kill any one for a stated sum of money-and a paltry sum comparatively.

Now that such men have been found and are held by the law for trial, it learn something of the prenatal and early beings. childhood conditions from which those appoint a committee to go about this about the search for the criminals.

There should be, indeed, such a committee, whose work is to look up the pedigree for at least two generations of Especially should the prenatal condi

sibility of obtaining such data. If there is a bad piece of road where vehicles are broken and human beings injured, the causes which lead to such accidents are investigated, in order to

avoid future trouble. If the causes which lead men and women into crime can be traced then there is a firmer foundation for our reformers and philanthropists to stand upon while they seek to better the coming generations.

Only a few women of the most progres sive order today know, or, knowing, believe in, the laws of prenated influ-

Not one poor woman of the uneducated classes in a thousand has the least idea on this all important subject. Yet a butcher's wife, who watched the

slaughter of animals before her child was born, brought forth a human monstrosity-a child criminal-who possessed an insatiable desire to destroy life. The child of a woman whose husband

was a miser, and who compelled her to beg or steal pennies from his pockets to satisfy her hunger, was born a thief; nd went through life a kleptomaniac Innumerable cases can be cited of the immediate results of the mental influence of the mother on her unborn babe and there is no subject of greater import

for woman to study than this. The government would do well to set aside a certain sum of money to aid such investigations for the benefit of the

science of eugenics. And this present moment is a most appropriate one to begin these investiga-

Science is doing a great deal in its effort to conserve and prolong life, But it is not so much the continuance of the life of individuals on earth which would help the students of eugenics to the world needs as a better order of

Every possible investigation into heredmen came. It would be worth while to ity, prenatal influence, childhood's environment and early associations should search for the desired information with be made, and the information carefully as great care as the detectives went classified and presented to the world for consideration

The capital punishment of criminals will never reduce crime. But the proper education of men and women on what every man and woman who becomes a fatherhood and motherhood means will prevent the birth of criminals.

The Manicure Lady

"It's a mighty queer world, this world, | broke it on had a kind of tough mug that we're living in," said the Manicure himself, and I am too long in the league Lady. "A girl friend of mine was in to go picking a fight with a man that here today and told me about the kind of bounces up after you knock him down. kind of unlucky, George.

"I know what you mean," said the on a bully." Head Barber. You mean she is unlucky enough to be pretty. You don't need to tell me anything about pretty girls looking for theatrical positions," he concluded. "I knew some of them theatrical of-

fices was kind of bad," said the Manicure

Lady. "But I never knew how much luckier I am to be a manicure girl than a charming girl until my little pal told me some of the talk she had handed to her. I guess there ain't enough big, clean boys in the world, George-the kind that could walk into that kind of an office with four of the cheap fellows altting around at mahogany desks, lock the door, and come out with the key, leaving death and devastation in his track, Gee, I could love a holdup man out Westone of the chaps that is all the time facing bullets or lynching, but spare me from them, little, cheap, sneaky rats that

angrily. "Ever since the time I walloped that cheap drummer with a shaving mug tors propose to mine all coal in the form that belonged to another traveling man, of dust with a specially constructed mayou have been afraid to tell me anything. That's the trouble with girls handling it thereafter by pumping They stand for all the rough stuff, talk through pipes. At its destination it will and all, because they don't want to make be separated from the water and dried, a scene. What's a scene, anyway, after and can then be used for all, or almost it is all over? Many a man has had to all, purposes for which lump coal is air blast burns with more economy than make a scene just for the sake of teach- now employed. ing another man a lesson."

"I know you are awful brave, George," sure grand, the way you beaned that fellow with that shaving mug. And it That struck me kind of funny at the time, transporting and consuming it. because the part of the mug that landed member me.' I guess he won't ever for-

a job she had getting a position. She is I have to use my hands for shaving, kiddo. I don't want to break them up

"Brother Wilfred said the same thing the other night," remarked the Manicure Lady. "Him and me was walking home and a big stiff on the corner near the house said, 'Pipe the long-haired guy with the queen.' I thought at the time that Wilfred was going to take it up, but when we got home, and I asked him about it, he said that he didn't want to break up his hands. I guess shaving muss and other crockery is kind of handy, after all, George."

New Way to Mine Coal

The proposal to pipe a mixture of pulverized coal and water, as oil is now piped, is not new, but it has been takes any kind of advantage of a girl's limited to the coal dust produced in position in life. I get a few of them in ordinary processes of mining and often here now and then, you know, George." washed. It has never been carried out "I don't know," said the Head Barber, industrially-at least on any considerable scale. But now two New York invenchine, mixing it at once with water and

He Calls Himself a Man

as a sample of "the Lord's noblest handiwork, man." writes the following letter: "I am 25 years of age and have been stand a storm. keeping company with a girl three years

my junior for a year and a half. I had have one good trait it is hidden under been earning \$12 a week, but lately an ignorance and conceit. If they have a uncle died and left me a sum of money little success they turn that success into which I feel I ought to enjoy while it failure by letting it turn their heads. It

"But my girl friend doesn't care to enter dress as I would have her dress. She says she can't afford it, but if she wants to travel with me she has to have some Their conceit is so blinding they lose class. So I have given her up. She seems the power of recognizing the true from heart-broken, as she loved me dearly. Did I do right or w.o.sg? L. H. N. U." The men have claimed since the first terers. man was made that their rex lacks every

element of conceit. They have taken to themselves all wisdom. They are the ray it, it is because he seeks a reputation long. for gallantry. Down in his heart he

This "L. H. N. U." whom we will call the world be thinks, is finding it out.

The girl who was good enough for him when he got \$12 a week, is not good enough for him now. An oft-told tragedy, as many wives have found. She must have some class if she wants

to travel with him! I rejoice in tha level-headedness that leads her to deeide to discontinue the journey. I am born. proud of a girl who refuses to spend more on clothes than she can afford, in order to keep the so-called love of a

I am delighted to find that such a girl exists, and if she will refuse to let this Alphabet man enter her presence again. my delight will be beyond expression. He wants a girl on high heels who paints her cheeks to match his increased income, and whose "class" will match his own. And that class is of the swagger, imitation order. It is the kind that

By BEATRICE FAIRFAX.

One who undoubtedly classes himself; Those who affect that style are not the kind of people who will stand wear, any more than their tawdry attire will

They are showy and fickla. If they is a class that no sensible girl cares to

If they have a little money they become the prey of all the unscruptions. the false, and good friends in their humbler days are abandoned for flat-

This man's inherited wealth will not last long. His letter tells a story that ends in financial ruin. He wants to "entruer, the finer, the nobler, the braver joy it while it lasts." and his manner of sex, and if there exists a man who doesn't enjoyment is such that it will not last

This is not the greatest misfortune; he will spend it in such a way he can never again be content with the simple enjoy-Alphabet for short, believes that he is 4 ments he found in his \$12 income. That prize. He was sure of it when he got was earned by hard, honest labor. He \$12 a week, but the world didn't know it | could not afford any extravagant joys Now that he has inherited a few dollars with it, but a pleasure doesn't have to loves, and is with the object of one's af-

He can't go back. He thinks in his present moments of puffed-up idleness that he doesn't want to go back. But the day will come when he will curse his little inheritance, his own asinine conceit and stupidity, and the day he was

have been true when he got \$12 a week. She knows him so much better now, I am satisfied her feeling for him is largely a pitying contempt.

He is going up like a rocket that will flash across her sky, and he thinks the flash will last. He doesn't realize that no one looks for the burned-out stick that falls to the ground.

Did he do right in giving the girl up? Yes, a thousand times yes. For he has decks itself in cheap adornment, and that saved her from the terrible fate of bedelights in all that is flashy and tawdry. coming his wife,

Electric Space Waves

By EDGAR LUCIEN LARKIN.

magnetic, all electricians made use of wires to convey it from place to place. Galvanic electricity is that derived from the transformation of chemicals in common metal and acid cells or batteries of cells combined.

Magnetic is that produced by moving a wire in air, in front of the end, or pole, of a permanent steel magnet. Dynamic electricity is that developed by

moving wires in cont of the poles of temporary soft iron magnets, with the important additional point of using the tween terminals in his circuits of varyelectricity thus secured to increase the ing distances in the room and tous set magnetism in the mass of soft iron. Electricity is developed by friction and in machines for this purpose the elec-

tricity is called static. These machines have knobs of metal on the terminals, and when electricity is pent up in them beyond the capacity of the atoms to store more, a high pressure discharge occurs is seen, and a sharp report is heard.

This famous space between terminals is known as the air-gap. Hertz made one of the now historic discoveries of the world. He took a wire, put little knobs, one on each end, and bent it into almost a complete circle, leaving a gap between

the knobs. When a static machine was in action carried his circle of wire around the room until finally he came to a place to his intentions was forthcoming. where its knobs began to flash, in tune with the machine discharges, to "break down the air," and tear a passageway through it, for air, pure air, is a bad before I get drunk. I want to get full conductor. The pressure in the machine and drunk simultaneously, and believe is increased by means of condensers. de- I have the implements here." -St. Louis vices of various kinds in the circuit. Before Hertz, however, the well known high school Leyden jar had been in use for years. This is a high power condenser; note the bright sparks between knob and any applied discharger, and the arms if one gets the benefit of the

This jai had been used a long time before one of the world's great discoveries was made-oscillation. A jar highly charged makes a sharp report. as loud as that of a revolver, in large high potential specimens. But there are many hundreds of reports, all sounding

The electricity oscillates to and fro Washington Star.

For a number of years after the discov- from knob to knob, with such extreme ery of galvanic electricity, and later of rapidity that the flashes appear to the eye as one, and the separate reports to the ear as one sound.

These jars have been used in colleges for years before the professors were aware that one of the most valuable possessions of the human race, electric waves, were filling space all around the flashing terminals. Little did they know that waves,

trical disturbances, surged in space in every direction with each disruptive discharge. It was left for Hertz to cut these out of space, secure flashes bethe foundation stone for that now immense science, wireless telegraphy.

A Toper's Compromise.

Attorney Charles E. Sweet, who came down from his home in Dowagiac, Mich. to participate in the famous Kimmel case, in one of the lulis in the trial relieved his through air between, miniature lightning mind by what most of his hearers admitted was a new story.

"The hero of this true story," said Sweet, "entered the Dowagiac club and very carefully began unwrapping a bundie. He succeeded in arousing the curiosity of all who were near him. "As the wrapping paper came off it

was plain that the package contained one quart bottle of whisky and two quart bottles of beer. He placed the bottles careflashing sparks between its knobs, he fully before him on a table and looked at them intently. Of course, the question as "'Well,' he replied, 'you see, whenever

I drink whisky I always get drunk before I get full. When I drink beer I get full

The Worst Case.

"The worst case of mixed metaphor "The worst case of mixed metaphor known," said a teacher of English at the University of Pennsylvania, "was the output of Sir Ellis Ashmead Bartlett, who belonged to a Philadelphia family. Sir Ellis once wrote to the London Times:

"The concert of the powers in China more delimina screen, agreeable in

"The concert of the powers in China is a mere delusive screen, agreeable in sound, very tickling to the ignorant ear calculated to draw the cheers of the groundlings, but which really serves only as a blind to ourselves, as a cover for ministerial inaction, as a sounding beard to tell our foes of our plans, and as a lever wherewith they are enabled to checkmate our policy." 'Imagine." ended the instructor-"imagine a screen doing all that!"
