Under Dr. Maul, the pathologist, an interesting laboratory is accumulating, which cannot but help in being of great advantage in the treatment of other patients.

In the afternoon of the day he was there a match game of ball was played between the employes of the institution and the Ord club, which was witnessed by nearly 1,000 of the patients, who seemed to enjoy it while occupying seats in the amphitheater.

### Inoculation Successful.

At the feeble minded institute he found 439 inmates, of whom 226 were boys and 204 girls. The cottages as this institution are in better sanitary condition than they have been for years, which is especially noticeable in the cottage for low grade boys, being almost free of offensive odors

Dr. Thomas, the superineendent, is making great effort to constantly improve condition at this institucton. It was his opinion that some of the plumbing in the two buildings most recently built at the institution would need to be overhauled. The institute has suffered from a light idenic of typhoid fever this summer, proving fatal with only a few patients the disease this year having been received or employed since the general bacteris inoculation. Seven of the inmates were still in hed in the hospital, but all of hogs which sold in the South Omaha vere convalescing.

Stock Industry Not Booming. The fact is revealed at the state fair now in progress that there has been some decline in the live stock industry in lows and that things are not booming as much as they have been in the past. The stock men say that this is because of the high price of land and the higher price of grain. If the farmers are able to sell their grain and hay at fancy prices they will neglect the live stock business. That is what is shappening in lowa just now. The number of horse and cattle entris at the state fair is not as large as in the past, but all of fifie quality.
