

GRAIN AND PRODUCE MARKET

Rains in Northwest Will Give a Bearish Tone to Wheat Market.

CORN COVERINGS ANTICIPATED

Quantity of Oats This Year is So Great That It Will Become a Weight on the Trade Later in the Season.

OMAHA, Sept. 3, 1912.

There was a great amount of rainfall in the northwest and southwest over the holidays. This will probably prove bearish for the market this week. On the other hand the trade may have a sufficiently heavy run of wheat at Minneapolis and Kansas City to cause a renewal of the selling tactics of last week.

There is little doubt but that many members of the local corn trade who were out over the country since Saturday will return with reports that the crop is doing fine. Hot September weather, followed by an abundance of rain, will do much to push the crop along.

Clearances of wheat and flour were 51,000 bushels; corn, 100,000 bu., oats, 25,000 bushels.

At Liverpool wheat closed 3/4 cent lower; corn, 1/2 cent lower.

Primary wheat receipts were 4,182,000 bu. and shipments 1,254,000 bu., against receipts last year of 1,918,000 bu. and shipments of 47,000 bu.

Primary corn receipts were 1,143,000 bu. and shipments 41,000 bu., against receipts last year of 1,175,000 bu. and shipments of 273,000 bu.

Primary oats receipts were 2,023,000 bu. and shipments 80,000 bu., against receipts last year of 97,000 bu. and shipments of 273,000 bu.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, Sept. 3.—Heaviness ruled the wheat market all day as the natural result of huge receipts from both the spring and winter crops.

It was conceded to be inevitable that wheat prices would smash. No question arose except as to how much the break might amount to. The same report came from Minneapolis, Duluth, Kansas City and Omaha alike an extraordinary amount of loaded cars from the fields.

OMAHA, Sept. 3, 1912.

Because of nearly 1,000,000 bushels increase in the visible supply, the wheat market seemed unable to develop any power to effect a material rally. December ranged from 91c to 92c. A close at 92c Thursday night represented a fall of an even cent from the close of the previous day.

In the corn crowd cash concerns about the September delivery and took considerable interest in the latter having declined to 71c early. Fine weather for the growing crop weakened the deferred options. December closed steady at 54c, a net decline of 1/2 cent. Cash grades were heavy. No. 2 yellow, 74c; No. 3 yellow, 73c.

Provisions as a rule hardened. Changes were small in lard and ribs, but for pork there was a rise to \$12.50 in cost. The leading futures closed as follows:

NEW YORK STOCK MARKET

Resumption of Operations Marked by Further Yielding of Prices.

VARIED CAUSES RESPONSIBLE

Declines in Standard Issues Range from Two to Four Points, Canadian Pacific Sustaining Greatest Loss.

NEW YORK, Sept. 3.—Resumption of operations on the Stock exchange today after the triple holiday was marked by a further yielding of quoted values which at times verged upon acute weakness.

For this condition various recent and impending developments were accounted responsible. These included the sweeping order of the Interstate Commerce commission postponing proposed increased transcontinental freight rates until the end of the year, last Saturday's bank statement, which disclosed another large decrease in the cash reserves of the local banks, and a further hardening of call money rates, due to diminishing supply.

There were also such added factors as the government cotton report, showing further deterioration in that staple during August, and the Vermont election, which formed the basis of much conjecture. There was practically no offset to these unfavorable influences, the Pennsylvania railroad's splendid earnings for July being met by New York Central's large decrease over the entire system for the same period.

Official figures from Washington called attention to last year's large decrease in iron production, while pointing to the encouraging prospects for the current year. Declines in standard stocks ranged from two to four points, Canadian Pacific again sustaining the greatest loss, with renewed pressure against the coalers, Union Pacific and Louisville & Nashville. Steel, Smelting and Coppers were weakest of the prominent industries, although the last named opened with some show of strength. Various specialties, including the tobacco group, fell back one to four points, the lowest level being attained in the last hour, when call loans rose to 4 1/2 per cent.

Bonds were lower in sympathy with the stock market. Total sales, par value, aggregated \$1,450,000. Number of sales and yielding quotations on stocks were as follows:

Table with columns: Name, Sales, High, Low, Close. Includes Amalgamated Copper, American Agricultural, American Beet Sugar, etc.

Visible Supply of Grain. NEW YORK, Sept. 3.—The visible supply of grain in the United States Saturday, August 31, as compiled by the New York Produce exchange was as follows: Wheat, 15,588,000 bu.; increase, 925,000 bu.; in bond, 68,000 bu.; decrease, 57,000 bu. Corn, 1,930,000 bu.; increase, 247,000 bu. Oats, 4,100,200 bu.; increase, 1,009,000 bu. Rye, 441,000 bu.; increase, 133,000 bu. Barley, 500,000 bu.; increase, 485,000 bu.; in bond, 21,000 bu.; unchanged.

Which Way will your money earn the largest income safely? In the hands of a Bank at 3% OR Invested in high grade Omaha Real Estate with a guarantee of 7%? The Investment Question is a delicate one—for it involves your money and what it will safely earn for you. Experience has shown that the bank is a safe place for your funds, but you could not get even the low rate of interest paid by the banks if they in turn could not reinvest your money so as to enable them to get enough interest in addition to what they pay you to allow them a fair margin of profit. It is also true that the bank service is worth something—but a bank is not the only organization qualified to give you this service or security. Our Security is Deeds or Mortgages on New Homes or Other High Class Real Estate—Real Estate is the Best Security on Earth. The Value of Co-operation All great American Institutions, including the banks themselves are successful and great because of a combination of many brains as well as much money. Each individual member of a great corporation is there because of his particular fitness to meet certain requirements; because of his knowledge and experience in that particular line of work. This the Keypnote of Bankers Realty Investment Co. We are entering this field to accomplish certain definite results and men of experience in finding, judging and creating real estate values are at the helm—to guarantee those who invest in this corporation \$100 on money invested and a share of the profits besides. Bankers Realty Investment Company Not an Untried Experiment Is Successful in Other Cities The fortunes that have been made in real estate in our growing American cities are almost unlimited in number. Companies organized along the lines of the Bankers Realty Investment Company and only a few years old have grown into prodigious corporations. What We Are Doing in Omaha The Real Estate values in Omaha are subjects for wonder to many because there are no inflated values, and the reason is, that Omaha is a large, healthy, growing city where the values of real estate are increasing every day. The Bankers Realty Investment Company is founded for the purpose of buying, improving and selling choice pieces of real estate and the building of homes for home-seekers. A large amount of capital is necessary to successfully conduct a business of this character and it is for this purpose that any money invested with us will be used. We want you to investigate us and our methods as well as our particular investments, feeling that if you do, you will become associated with us.
