Operation Upon Acton-A. O. Acton. a mattress maker living at 314 North Fourteenth street, was operated upon last night by Police Surgeon T. T. Harris in the police emergency operating room. The patient stuck a needle into his right hand several months ago and blood poison developed. Last night the entire arm was swollen twice its natural size. The entire arm had to be cocanized before it could be lanced. Dr. Harris pronounced the operation successful.

Taft Sentiment is **Growing Stronger**

"Good crops, good prices and prosperity are, things that the bull moosers of Antelope county are having lots of trouble in contending with," said Frank J. Caidwell of Neligh, who was at the Paxton over Sunday.

"You hear lots about bull moosers and going over to Roosevelt, but when you get down to facts, there is not much in it. I am not a politician, but I have architect. The building is to be strictly traveled out through Antelope county nearly every day during the last month and not one in twenty of the republicans to be rushed in order to have floor space are with the bull moosers. They are lining up with Taft and the regulars to just the first of January. as great an extent as they did four years ago. There has been several efforts made to organize a wing of the bull moose party in our court. re prosperous and failure. Our paul satisfied and they willing to let well enough alone and not go chasing after strange and new polltical gods.

"There has been talk that many of the republicans would vote for Wilson, but there is nothing in this. On the other hand I know of many democrats who will cast their votes for Taft. They do not believe that the republican party is right in all things, but they are growing rich and do not want to do anything that will bring about a change. They realize that they are paying high prices for things that they buy and they attribute this to republican party domination and at the same time they know that they are receiving higher prices than ever before for their products and they do not want to be parties to anything that will result in changing the situation.

COLORADO RANGE BETTER AND HERDS COMING HERE

"The Colorado cattle range is better pess to handle the large increase in stthis summer and fail than it has been in tendance that is expected this year. It interests, many years," said J. T. La Casse of Pueblo, when in Omaha yesterday. "The dry and hot weather coming just at the right time," he said, "has cured grass any department for additional labora in an almost ideal fashion." tories.

Mr. La Casse says the Colorado range cattle are beginning to be shipped out and while most of the grass fat stock will, of course, go to Denver, he knews of several large herds that will come to the South Omaha stock yards unless the owners, change their minds shortly.

The question of the shortage of range, he says, is present in Colorado as well as elsewhere in the west. The stock men are being crowded more and more to the mountain regions. The sheep men, he says, for the last few years have been buying up range land in the edge of the mountains, as they and all the stock men are realizing that the day of the free range is over and they must either own or lease their ranges.
