MOOSERS ASSETS OFFICERS

Eppersonian Committee Demands Two Per Cent of Salaries.

LETTERS SENT TO THEM ALL

Makes Running for Office Costly Experience in Nebraska and Arouses Spirit of Rebellion in Breasts of Some.

(From a Staff Correspondent.) LINCOLN, Sept. 20.—(Special.)—The Eppersonian committee of the bull moose campaign is sending out letters this morning to off state house officials and appointees, calling for a 2 per cent donation from their salaries. Officials at the state house have already received from the other committee of the bull moose movement a call for sums ranging as high as \$50 for some of the officials. Should the regular republican committee issue a like call for the customary 2 per cent of salaries, it will make the campaign for state officers and their employes a decidedly expensive affair.

In some of the departments the head of the official family receives \$2,500 salary. The Corrick committee has already assessed that official \$250. Now comes a 2 per cent call from the Epperson bunch which means \$50 more. Should the Taft committee make a like assessment it will take another \$50. The deputy official in each office receives \$1,500. A 2 per cent assessment from each "branch" of the republican party and the bull moose contingent added, would make an additional \$108 from that source. A conservative estimate would make the average number of employees connected with each department about ten, drawing salaries averaging at the least calculation \$1,000. This would add to the receipts from each department nearly \$1,000.

One Official Balks. One prominent official who received a letter this morning calling for a 2 per cent of salary donation to the Eppersonian committee, said: "I shall take no notice of the letter. I do not propose to donate to any committee or any fund whereby any part of the donation might be used to elect Theodore Roosevelt to the presidency. Neither will I donate to any campaign fund which may be used to elect any candidate for office who is helping to elect Roosevelt as against the regular nominee of the republican party. What money I have to donate will be placed in such a way that republicans will be benefited and not those who are trying to defeat republican nominees."

Expectations to Report. Exceptions to the report of Referee Holcomb in the South Omaha Fire and Police commission case were filed with the supreme court this morning. It is set forth that the findings of Judge Holcomb are not supported by sufficient evidence and that the new law is invalid. It is also set forth that in the case of the state of Nebraska against Thomas Hector and August Miller to compel the calling and holding of an election in South Omaha in April, 1912, the district court of Douglas county held the law to be unconstitutional.

Scourge in Missouri. Notice has been received at the office of Dr. Bostrom of the veterinary board that Governor Hadley of Missouri has called a meeting of the State Board of Agriculture to take ways to stop the spread of the horse epidemic which seems to have invaded that state.

Memorial for Calkins. The supreme court this morning appointed a committee to draft resolutions on the death of Judge E. C. Calkins of Kearney, who was a former commissioner of the court. The committee consists of Warren Pratt of Kearney, Jessie L. Root of Lincoln, Norris Brown of Omaha, Thomas F. Hamer of Kearney, Frank M. Hall of Lincoln. The committee will report October 23.

Mattley Outlines Position. W. S. Mattley, candidate for senator in the Twenty-third senatorial district, residing at Ansley in Custer county, sent notice to the secretary of state this morning that he would vote for the candidate for the United States senate who received the endorsement of the voters at the primary.

Transfer Switch Case. Railway Commissioner Henry T. Clark returned yesterday from O'Neill, where he listened to the application of the people of that city for a transfer switch between the Northwestern and Burlington tracks. It is claimed that a great deal of business will be done over the transfer, if it is put in and that it is needed badly.

Udall to Waverly. Dr. G. W. Udall, head of the veterinary department of the New York State Veterinary college at Cornell university, arrived in Nebraska last night for the purpose of making an examination into the horse epidemic in this state. He went at once to the agricultural college, and immediately answered a call from Waverly. From here he will go to Manhattan, Kan., to make investigation in that state. He will, however, return to Nebraska later and make a more thorough study of the disease. As he is one of the leading experts of the country his report will be looked forward to with much interest.

BLOW ON HEAD CAUSES THE DEATH OF ARCHIE M'GEE

KEARNEY, Neb., Sept. 20.—(Special Telegram.)—Archie McGee, 18 years of age, died this morning after being struck in the back of the head by a companion in a pool hall Tuesday evening. He showed no apparent ill effects on leaving the hall. Late in the evening he was found in an alley supposedly intoxicated, although he never drank. The boys who found him walked him around for an hour and left him on the steps of the Bryant school, where he was found in the morning by a teacher. The police took him to the city jail thinking he was intoxicated, but discovered late in the afternoon that he had not showed any signs of becoming rational and he was taken home, where medical aid was called. He was taken to the hospital last night but never regained consciousness. Blame for the death will be fixed at the coroner's inquest yet to be held.

St. Edwards Votes Sewer Bonds. ST. EDWARD, Neb., Sept. 20.—(Special.)—At a special election for the purpose of voting city bonds for \$4,000 to establish a sewer system, the bonds carried by thirty-six votes.

HORSE DISEASE NEW ONE TO EXPERT FROM NEW YORK

LINCOLN, Sept. 20.—"In an experience of many years, including the United States and Europe, I have never run across a disease of this nature. It is entirely new to me."

This was the statement made by Dr. C. H. Udall, head of the veterinary and bacteriological departments of the New York State Veterinary college, after examining some diseased horses near Lincoln. He said he was not prepared to make any statement until after further investigation. Dr. Udall left today for Manhattan, Kan., where he will confer with experts of that state. Later he will return to Nebraska to pursue his inquiry.

ROYSE REPORTS ON LOANS

Building Associations of State Found in Good Condition.

VAST SUM IN THEIR CARE

Interests of Wage Earner and Home Builder Safe Guarded So Far as Human Ingenuity Can Provide.

(From a Staff Correspondent.) LINCOLN, Sept. 20.—(Special.)—Secretary Royse of the State Banking board, who also has charge of the building and loan associations of the state, which have something like \$30,000,000 of the money belonging to Nebraska people, has made a report of the associations and in connection with it says:

"In submitting this, the twentieth annual report of the condition of the building and loan associations of Nebraska, with summaries and detailed information, it is with pleasure that I call your attention to the fact that these institutions still continue to show growth and prosperity, and seem to be keeping pace in the fulfillment of their purposes with other financial institutions that go to build up the wealth and resources of the state as a whole. There can no longer be any question as to the need of such institutions, as they are demonstrating by their steady growth that the people need their services."

"No material suggestions are thought to be necessary at this time as to the supervision. Time and experience will doubtless bring such changes and improvements as may be necessary to safeguard the vast sum of the people's money (now approximately \$30,000,000) entrusted to their care. With the increasing wealth of the state as the years go on and the sum entrusted to them becomes larger the responsibility of supervision will grow to be a no inconsiderable burden. The resources in their care, drawn from the people who can ill afford to have their earnings jeopardized, will require increasing care and watchfulness."

"No longer is there any doubt that these associations have a permanent place among the financial institutions of the state in a field practically their own and which they are peculiarly adapted to occupy."

"It is to be hoped that when periods of depression come, as doubtless they will, that the interests of the wage-earner and home builder will have been safeguarded

OMAHA'S ONLY MODERN CLOTHING STORE

King-Swanson Co. 16th & HOWARD STS. F. S. KING, PRES. THE HOME OF QUALITY CLOTHES A. S. PECK, SEC. TREAS.

Our Entire Sales Force at Your Service Between 12 and 1 O'clock

One of our closest studies is to assist our customers as much as possible and make buying here convenient. A great many of our patrons are employed men who must do their clothes buying on their noon hour. The usual store method is to be 50% short-handed during that hour. As a consequence many noontime customers are subjected to annoying waits—often they must go away unserved. This store has adopted an original plan. Our salesmen take luncheon before or after the noon hour. This plan was not an arbitrary ruling by us, but was concurred in by the salesmen themselves, who are always willing to inconvenience themselves in order that our customers may be better served. We invite those men who must make the most of their noon times to trade here, where a full sales force is always in attendance at the noon hour.

Fall Suits Are Simply Fine—

You can read volumes about fall suits but, until you've seen ours, you cannot know what really constitutes clothes elegance. Here you can find any thing any man could possibly want. Every garment priced as low as good clothing can be honestly sold for—

\$10 up to \$40

Overcoats Par Excellence—

We make bold the claim that no store hereabouts offers such a range of overcoat prices or so many overcoats at any single price. Not only Overcoats—but Rain Coats, Slip-Ons, Top Coats, etc., are found here in great variety.

\$10 up to \$75

After Much Research—

It has been decided that the boy who is most proficient in his studies is the one who is most tidily appareled. Good, neat appearing clothes seem to bring contentment of mind to the wearer and he is thus enabled to study un-annoyed. Our school suits certainly will assist your boy to make a good, well appearing scholar and they won't work any hard ship on you.

\$2 to \$10

We close Saturdays 9 p. m.

so far as human integrity and care can provide.

"In presenting this report it is gratifying indeed to this department to state that the management of the various institutions operating under the building and loan law of the state are following closely its provisions and infractions and violations thereof are exceptions. It is with pleasure that I commend them to your honorable body."

A Bachelor's Reflections.

his own to start the chorus.—New York Press.

THIS IS WORTH REMEMBERING

The Country Producing Several More Substantial Than Political Hot Air.

Amid the turmoil of politics, and regardless of the claims of this or that party as to its particular theories being necessary to the nation's material advancement, it may be well to bear in mind the following facts:

- 1. The country is now producing pig iron at the rate of about 29,000,000 tons a year, with consumption exceeding production. This is at the rate of about 4,000,000 tons higher than the boom year of 1906, and at the rate of about 2,000,000 tons higher than the production of 1910, the record year of iron output.
2. The cotton manufacturing interests

of the country, which for several years suffered from a period of depression greater than this industry had had for very many years, are now enjoying great prosperity. Cotton mills in all parts of the country are crowded with work and making money.

3. To the amazement of the cotton trade of the world, a crop of 16,500,000 bales has been rapidly absorbed at steadily advancing prices.

4. Crop prospects indicate that once more the American farmers will before the end of this year have produced \$3,000,000,000 to \$3,000,000,000 of value.

5. The 250,000 miles of railroad in this country are, with few exceptions, taxed almost to the limit of their ability to handle existing traffic, which will rapidly increase as the crop moving season approaches.

6. The 93,000,000 people who dwell beneath the stars and stripes in continental United States, the most active,

vital, energetic people on earth, are steadily increasing the wealth of the country, are doing business at the same old stands in the same old energetic way, are developing the resources of all sections, are building more costly hotels and office buildings, more good roads, making more municipal improvements and doing other things that express the boundless energy of such a people at work in such a country.—Manufacturers' Record.

Shickley to Have Electric Lights.

SHICKLEY, Neb., Sept. 20.—(Special.)—At a regular meeting of the village trustees Tuesday evening a twenty-five year franchise was granted to John F. Montgomery for the establishing and construction of an electric light plant. Mr. Montgomery and his associates will construct a central generating plant at Edgar and run feed wires to the various towns contiguous to that point.

LIGHTNING KILLS HORSE, MAN IS BADLY INJURED

MILFORD, Neb., Sept. 20.—(Special.)—As William Rediger, working for Jacob Errisman on his farm southwest of Milford, was leading a horse into the barn about 8 o'clock last evening, a bolt of lightning struck the horse, killing him instantly, and severely injuring young Rediger. He is reported as improving this morning and in a fair way of recovering.

A Horrible Death. Cured coughs and weak, sore lungs with Dr. King's New Discovery. 50c and \$1.00. For sale by Beaton Drug Co.
