Inviting Brick Homes of Omaha

The homes shown above are a few of the finer and more elaborate which have been faced with the high quality product of the Hydraulic Press Brick company.

The face brick for some of these houses was manufactured in Omaha by the above company, which speaks for the high quality of one of the Omaha made products.

The beauty and attractiveness of a city is enhanced by the style and beauty

of its homes to a much greater degree than by the style of its business blocks and store buildings.

Omaha is one of the foremost cities in the United States from the standpoint of improvement by modern construction, but the general impression prevails that only the higher priced homes can be built of brick. This impression is erroneous, as the modern methods of construction have brought about a complete change in the building world.

Hollow block construction, with brick veneer facing has placed the substantial brick house within the reach of all.

Taking into consideration the cost of painting, upkeep and depreciation, the brick house of today is practically as cheap as frame.

Literature covering the points of advantage as well as giving comparative costs of brick and frame construction may be had at the office of the Hydraulic Press Brick company, 330 Bee building.

Brick is becoming most popular for use in fireplaces, since it gives tone to the decorative scheme of the room. The life of a room rallies about the fireplace, which, in consequence, is usually the center of its decorative scheme. If it is harmonious and artistic, a fireplace adds the crowning touch of charm. All brick fireplaces and mantels, or brick surmounted by a heavy wood shelf, are in expensive; they fit well with most decorative schemes

and are equally well adapted to the very small house as to its more pretentious neighbor. The designs, however, may be widely different.

Whether a new fireplace is being installed or an old one put into commission, a damper in the throat should never be omitted. If the flue is large it will admit a surprisingly large volume of air in cold weather, much more, at times than will be necessary for adequate ven-

tilation. Then, too, there is a down draft in many fireplaces; so that when a fire is not burning, a high wind will scatter the ashes and dust all over the room, unless there is a damper that can be closed.

It is customary to have an ash pit built under the modern fireplaces, into which, when a slide is drawn, the ashes may be pushed through a hole in the bottom of the fire place.

IDEAL HOUSE the Kranich & Bach Player Piano Has Been Placed.

To add to the finishing touch of all that is meant in the word Home; to impart a charm and refinement that can only be obtained by the highest grade Player-Piano in the world.

WITHOUT any previous musical education or special training the owner of a Kranich & Bach Player-Piano can play and enjoy the compositions of the world's greatest masters, as they really should be rendered.

THE Tri-Melodeme and other exclusive devices—all perfectly simple and easy to operate—endow the owner with a "technique" quite impossible of accomplishment with human hands—not excelled even by the most famous Concert Pianists.

Call and let us play this excellent instrument for you.

This is the Best Time to Install Electric Light

Right now, before you start your fall house-cleaning, is the best time to have your house wired for electricity. Have the wiring job completed before the decorators arrive.

Nothing looks so spic and span as a newly wired, newly decorated home. The sunlike brilliance of Electric Light brightens all the formerly dark corners of the home—makes it many times more pleasant and attractive.

And then too, by having your house decorated *after* it is wired, you can prove by actual test how valuable Electric Light is in keeping walls and ceilings clean.

If you own your own home you cannot feel that it is a modern home unless it is wired for electricity. It is not a modern home, either, and you must—in order to enjoy the hundreds of present day electric comforts and conveniences—electric irons, stoves, washers, etc.—you must have electricity in your house.

Take occasion now, when the beautiful fall is here, and have your home put in shape for the long winter months, when brilliant electric lights glow and radiate warm comfort.

If you are building a home now, or if you have one in prospect, be sure that plans are made for the safe wiring of it for electricity. No man who really loves homelife will have a residence without electricity.

Your Dollars in the Foundation of a Co-operative Real Estate Organization

How Do Your Dollars Work For You?

Do you realize that this is the sort of investments where small investors usually make their money grow faster than in any other way?

The reason is this: A large number of small investors, by merging their earnings, create a large amount of capital to work with. This capital invested in Omaha property that is picked out only after the most careful consideration as to its possibility for increase in value and its serviceable location, means a steady growth in value of your investment.

Your money invested here will earn you 7 per cent at least, and you also share in the net profits.
