Hotels Have All Made Extra Preparations to Handle the Crowds—Special Trains to Run on All the Roads.

Omaha hotels filled up rapidly with AK-Sar-Ben visitors yesterday, the majority of them coming from out in the state but still there was a goodly number from Iowa, some from Missouri and a few from South Dakota. All of them bring word that there are more coming and by Tuesday it is expected that most of the inside houses will be filled. This year most of the hotels have made extensive preparations for handling crowds. Cots in large numbers have been secured and when the real rush sets in the middle of the week these will be placed in the halls, so that the capacity of every house will be almost doubled. In addition to this, a number of the hotels have leased outside rooms and fitted them up with beds and cots, thus adding still more to the capacity.

A SPLENDID FOOD TOO SELDOM SERVED

In the average American household Macaroni is far too seldom served. It is such a splendid food and one that is so well liked that it should be served at one meal every day. Let it take the place of potatoes. Macaroni has as great a food value as potatoes and is ever so much more easily digested. Faust Macaroni is made from richly glutinous, American-grown Durum wheat. It is every bit as finely flavored and tenderly succulent as the imported varieties and you can be positive it is clean and pure—made by Americans in spotless, sunshiny kitchens.

Why do Brewers of Germany and England use only Brown Bottles? Sunlight grows the hops, but spoils the brew. Light starts decay even in pure beer. Dark glass gives best protection against light. In England and Germany the brewers won't use light glass bottles. "Beer should not be exposed to the light, especially direct sunlight, as it will thereby be detrimentally affected, the light having an influence upon the albuminoids in the beer, causing the latter to become hazy," says no less a person than Philip Dreesbach, the eminent German expert and scientist in the Wahl-Henius Institute of Fermentology. We have adopted every idea, every invention that could make for the purity of Schlitz beer. Our beer was first brewed in a hut. Now our agencies dot the earth. Our output exceeds a million barrels a year. Schlitz The Beer That Made Milwaukee Famous.
