Constitution Making.

The method (of counting straight parts ments) devised by the legislature and sanctioned by the courts is, baldly, a scheme concorted to make possible the emberstement of votes needed to adopt the amendment. When the initiative and referendum are in working order this fault will be cured.-World-Herald.

We do not so understand it. Under the initiative and referendum in Nebraska only votes cast for or against measure popularly initiated or referred are to be counted, but there is nothing to interfere with the continued "embezzlement of votes" for constitutional amendments submitted by the legislature. That the power to initiate and refer shall be in addition to the existing methods of conatitutional amendment is expressly Bert Sampson, Pat McNamars, Grant provided as follows:

The method of submitting and adopting amendments to the constitution provided this section shall be supplementary to he method prescribed in the article of this committation entitled "amendments," and the latter shall in no case be construed to conflict herewith.

If that means anything, it means this, that failure to secure a majority streets, running the wires through the vote for any constitutional amend- alleys. CLOSE GLIMPSES OF AMBASSADOR BRYCE

By Victor Rosewater, Editor of The Bee

In the forthcoming retirement of Brit- | first national convention and he got into Th Ambassador Bryce, the diplomatic orps at Washington loses its most distinguished member, a man distinguished even more in the realm of letters than in

the field of politics and diplomacy. It has been my good fortune to have enjoyed an acquaintance with Mr. Bryce extending over more than twenty-five years, and to come in contact with him at repeated intervals, affording opportunity to gain impressions of him at different

I first saw Mr. Bryce in Londin in the ummer of 1891, while abroad with my father, who had, I believe, met him prior to that time while traveling in America. Mr. Bryce had already become famous as a historian and author through his book, "The Holy Roman Empire," and his later work, "The American Commonwealth," offering a critical analysis of the government of the United States. He was particularly courteous to us for his personal attentions and in procuring admission for sessions of the House of Commons, of which he was then a member. I recall distinctly his alert appearance and brisk movement. Even then his head was already bald, but his beard was a tawny yellow instead of its present perfectly white. We heard him speak upon one of the measures under discussion-an educational bill-his areument and delivery striking us as particularly pointed and impressive. My father took breakfast with Mr. and Mrs. Bryce at their London house, on invitation, to discuss American political problems, the railroad question, the farmers' alliance, negro disfranchisement in the south and similar subjects then uppermost in the United States. This visit in London seems to have at least left an impression upon Mr. Bryce, for I have never him since that he has not referred to it.

During the Chicago convention four years ago, opportunity presented for me to reciprocate some of the favors enjoyed through the attendance of the British ago I went down to the station to meet little back of the platform, evincing the as it was then developing in the premost intense interest in everything that was transpiring. I procured for him copies of the committee reports, and other documents as they were placed before the convention, which he needed in order to have a real understanding of the debates in progress, for which he manifested his appreciation. He showed himself really democratic in accepting the fortunes of Zealand," he explained, "where I have a convention spectator-one of 15.000-and accommodating himself to the exigencles, or rather discomfort of the occasion. On the day of the nominations the doors were closed against overcrowding, and the idea of getting back. A lunch room, a bit of a botanist, and I am still very of the railroad station variety, was located in the basement, and we all estimated it a stroke of luck to be able to turned the same way he went he would reach it. While I was putting away a stop over in Omaha, but he came back sandwich, right beside me stood the British ambassador and his wife, each with a he now goes back to London the condipiece of pie in one hand and a glass of tional acceptance of the invitation will

the spirit of it with a vim-

bassador Bryce, I was one of the guests of honor at a banquet given by the Hamilton club, where his impromptu afterdinner speech revealed a fund of wit and humor not previously suspected. He explained that although he had written a book on American government and politics, he had never until then w.t-

nessed the nomination of a president.

"It recalls," he said, "the story of a famous artist who painted a beautiful was one you bought me when you were trying to get my vote.—Puck nessed the nomination of a president. natural scenery, and then after his friends had admired and praised it, took a trip to the place to see if the spot were really like what he had pictured. "And so, after giving to my book a detailed account of how your great conventions are assembled and perform their work, I am here to find out how the convention fits my description.

Again, referring to a prolonged outburst by which the Roosevelt people had tried to stampede the convention the day be-

fore, he perpetrated this satire: "I was struck by the extraordinary stillness and unanimity which prevailed at the convention. In the course of the afternoon there was an occasion when several gentlemen took the same moment for giving expression to their feelings; even then the expression of their feelings took on the form of all agreeing with one another. And all agreed with the speaker who had been addressing them-addressing them. I may say, in a singularly eloquent and striking speech-striking for the oratorical skill with which it expressed the simple idea in a few and effective words. The meeting agreed with the speaker so much that they found three-quarters of an hour necessary to express their agreement.

When Ambassador and Mrs. Bryce passed through Omaha a few months ambassador and his wife, along with a and greet them. They were then on their large delegation of members of the Wash- way to Australia. Mr. Bryce evinced ington diplomat corps. Mr. Bryce sat a much interest in the political situation, liminary campaign for nominations, and expressed regret about being unable to accept again the courtesy of the forthcoming convention which I offered him As it was raining, he was prevented from "making a quick turn up into the city to see something of it," as he expressed ft.

"I am on my way to Australia and New never yet visited, and may halt at some of the islands of the Pacific, which I am told are very interesting. I have heard so much of Australia I want to visit it, and I hope to have a look at some of its no one dared to leave the building with wonderful flora. You know, I used to be much interested in botany."

Mr. Bryce assured me that if he re by the northern route, and I fear that if milk in the other. It was Mr. Bryce's be indefinitely postponed.

IMPROVED STANDARD OF LIVING

Modern Conveniences and Methods Boost the Cost.

We may call it luxury, or we may call crackers in an ornamental lined box cost getting away from the conviction that the thing itself-to-wit, the modern method of doing retail business-is an essential from a tub and dropped into the crock and considerable factor in the increased which the housewife sent or took to the cost of living. It is not the only factor, shop for it. So with a hundred other It is notorious that in some important articles.
