Thought-Making Hunches for Owners and Buyers.

TROUBLE AND MONEY SAVED the sun; has steadled your nerves, has

Times for Action and for Delibera tion, for Care in Selection and Operation-Problems of

the Sport.

The man who aspires to become a moforest will find himself from the very beginning on a small island of possibility completely surrounded by a sea of don'ts." No other sport presents so many problems for the solution of the neophyte as does motoring. The solutions or some of these are obvious enough while others can only be arrived at through the bitter teaching of experience or the advice of those who have been through the mill.

Even before you become possessed of the first requisite of the motorist, a car. the most serious problem of all presents

Thus we come to the first don't. Don't be guiled into buying a second hand car without taking expert and unprejudiced advice in the matter. White the judicious buyer of a second-hand car can get more than his money's worth, the man who rashly buys a used machine more often than not finds himself in possession of something fit only for the serap heap. Put it down as an axiom Never buy a second-hand car without first taking it down. If you cannot perform the operation yourself, and few car pay some one whom you can trust absolutely to do it for you. You will never regret spending the money. Even after you are sure that your used machine is in good condition, he sure that you are setting something besides the bare car. Remember that while the price may seem lew, by the time you have purchased c-sential accessorles, to put the car in running order, you will have added a tidy rum to the first cost.

Don't Hurry.

On the other hand, if you eschew the second-hand car and go direct to the agents for a new machine, don't be in a

Don't, if there are only two in your family, while the man next door has a houseful of children, buy a seven-seated touring car.

Don't select a car by the color of its Don't ferget to ask questions and don't

let the salesman answer them in blank verse. Pin him down to facts. Don't be too proud to accept the advice and assistance of a well-posted friend.

On the other hand, don't allow advice to smother your own judgment. After you have purchased your car-

Don't imagine that it is possessed of a chrome steel constitution and absolute immortality. Don't forget that what castor oil is to

a baby, lubricating oil is to a car. Learn te know the noise of your motor as a mother understands the cry of her baby, also inject the remedial oil. Don't begrudge a hard-working motor

plenty of fodder-beg pardon, gas. in exact proportion to the work returned will be the consumption of gasoline. Don't despise a tiny gasoline leak.

Trace it to its source as you would folthe footprints of a man who ha stolen your last dollar.

### Danger in Familiarity.

Don't be earelessly tamillar with your gas tank. After the gasoline has been drawn out, a highly inflammable gas remains that often blows up the unwary tinkerer with a leaking tank.

bon't use the same funnel for giving your motor a drink of water and a "feed" of nasoline. Disaster lies that way. Don't use a dirty funnel. If it has ac-

cumulated a layer of soil, take a minute to clean it out thoroughly. Don't run away with the dea that the

most pientiful supply of gas can do its work without a good ignition system. Don't forget that while electricity can circle the globe in a second, it balks at

a had joint in the wiring of your ignition. Don't, unless you are a past master motorist, monkey with your ignition system. You might as well go into the hospital without training and try to operate on unfortunate patients. Don't make your car a museum for

display of antique accessories.

Don't forget that shoes will make up by far the largest item of your upkeep bill. The man who has any desire to apare his pocketbook will treat his tires with the same respect and solicitude that he bestows on himself.

Don't fall into the common error of washing tires off with kerosene. Oil of any sort bears about the same relation to rubber that strychnine does to the human stomach

Don't think that after you have washed your tires you have done your whole duty by them.

Don't fail to remember that insignificant cuts on the surface of a tire are simply the outline sketch of a set of deep gashes, which use will rapidly turn into a complete picture.

### Some Work to Do.

Don't think that filling in the little cuts in the tire surface ends the job. Unless the material is vulcanized afterward, the operation has simply been writing on water.

Don't forget that the most enjoyable part of motoring lies in the touring Don't think that the man who goes tearing around the country at thirty or forty niles an hour is touring. He is

simply risking his own life, which is a small matter, endangering other people's, which is a serious matter, and teaching outsiders to hate motorists and motoring, which is a pity. Don't assume that the rules of the road are wholly iniquitous; they were formulated for your protection as well as con-

trol. The man who is eternally berating road regulations is generally the very road hog whom they were meant to Don't think that the higher powers have decreed that you should have a divine right to the center of the road.

while the farmers must thankfully accept the gutter. Don't talk of "hard luck" if you in-

sist on driving fifty miles an hour and our machine insists on trying to climb telegraph pole. Don't take a vacation after getting

home from a muddy drive. Give the car a liath first, then take your own. touch forget in making up the balance shoet of your car's cost that there is a

## THE CARTERCAR FRICTION TRANSMISSION

IS AS OLD AS THE INVENTION OF THE RAILROAD LOCOMOTIVE

# Points of Applied Friction Power Identical

As Positive As is the Friction Pulling Power of the Locomotive, Just so Positive is the Friction Drive Transmission of the Cartercar. Mechanical Science Tells You "Friction Power" is simple, Most Durable, and Very Economical

## The Cartercar Is Indeed the Logical Car

## Whether Intended for City or Country Driving

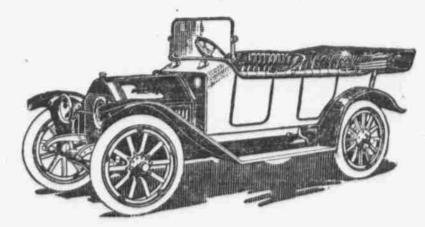

The Friction Transmission and Chain-in Oll drive are its strongest and individual features. It enables Cartercars to give reliable, economical and satisfactory service. Furthermore it gives you innumerable speeds instead of three, all of which are controlled with one lever. The simple transmission consists of only two unit parts. All complicated mechanism is omitted. Cartercars have no gears to strip or clutch to slip. Instead a friction disc runs against à fibre faced wheel which connects drive shaft with chain running in oil bath to the rear axle. This is the simplest and has the highest efficiency of any known automobile transmission. It is absolutely noiseless, and its flexibility not only permits smoother action and easy control, but saves every part of the car from sudden strains, thus prolonging the life of tires, lessening the general wear and greatly reduces the maintenance cost.

## Cartercar Accomplishment Never Been Equaled

The Friction Transmission enables the Cartervar to accomplish with ease what geared automobiles would not attempt. Its low speed ratio makes it possible for Carterears to climb any grade, go up a 50 per cent incline with a full load of passengers from a standing start, climb stairways and give other remarkable demonstrations. Its exceptional power makes them especially desirable for country roads where sticky mud and deep sand are frequently encountered. Cartercars have been known to pull loads exceeding 30,000 pounds in weight. It will pull on a dirt road easily, ten times its own weight. These demonstrations are given for the purpose to prove to the skeptical that the Friction Transmission and Chain-in-Oil Drive of the Cartercar is a positive success, that it can pull heavy loads.

## New 1913 Feature

Cartercars come to you fully equipped. New 1913 features include electric self starter, electric lights, longer wheel base and the English type body. From every angle it is a car of beauty, high efficiency and most practical for its simplicity and low up-keep cost.

## See Our Exhibit at the **Auto Show**

Prospective buyers should not fail to see the Cartercar exhibited at the Auto Show. A demonstration will be a revelation to you.
