gamaied. Steel. St. Paul. Erie, Atchison, the Hill stocks and a long list of less important issues.

Activity on the short side was confined principally to the first hour of trading. Selling of inactive stocks continued, the losses running up to 5 points.

The one new factor of genuine interest was the decision of the California Rallway commission that where the Southern acific granted to the Central Pacific use of tracks and terminal facilities the same privileges should be extended to other competing lines. In the opinion of the heads of the Harriman lines this ruing. If sostained, would interfere seriously with the proposed dissolution plan and might even cause its failure. There was some selling of linigh Pacific when the significance of this action became known and the price fell under 152. The most effect, however, was upon Southern Pacific, which was bought on the theory that the company would be benefited by upsetting of the dissolution plan. Southern Pacific became the strongest of the leading issues, rising more than a point above last night's close.

Weakness of the copper group reflected a further decline in the metal market. Leadon quoted lower prices and in the domestic market sales of refined metal for require delivery were reported under 15c.

days, the bulk of what were here moving around \$7.5507.85.

Steady to strong prices were paid for ewes, wethers and yearlings. Notwithstanding a slight increase in the supply the demand was broad throughout and sellers found a good outlet for the majority of their offerings. The general quality of the offerings was very good and much better than in the case of ambs, buyers taking hold of the stuff in good season and practically everything being cleared at a comparatively early hour. As much as \$6.25 was reached by Moxican ewes and \$6.50 was paid for a shipment of fed western wethers. There was a sale of some fed western yearlings at \$7.25.
