**POWARD AGAINST CORDEAL**  
 State Auditor Opposes Insurance Bill Now Under Fire.  
**WILL KILL HOME COMPANIES**

Division of Measure Had, Says Howard, and Offices It Creates Not Needed to Do the Work.

(From a Staff Correspondent.)  
 LINCOLN, March 12.—(Special.)—State Auditor Howard has prepared a statement regarding the bill now before the senate known as senate file No. 364, introduced by Cordeal of Red Willow county, in which he says that the insurance department of his office or himself has not been consulted regarding the bill, and that if put in force it will kill out the young home companies of the state. His statement is as follows: "The law makes me insurance commissioner of the state of Nebraska. I was elected auditor because the people wanted me to have control and supervision of the insurance business of the state. I am an experienced insurance man, having been seventeen years in the business. I am not an officer or stockholder in any insurance company. I took my office January 9 and have been continuously on duty from that day to this."

**Section 3** provides for the creating of an insurance board composed of the governor, attorney general and state auditor. They are to have general supervision and control of the insurance business and are empowered to appoint a secretary who is to look after the departmental work. This will result, in actual practice, that the secretary will be the head of the insurance department and the other three will have very little or nothing to say in the general routine of the matters coming before the insurance commission for action. It also means that the people in the state of Nebraska are going to be denied in the future the right to say who shall be the head of the Nebraska insurance department. The department is made a matter of barter and exchange.  
 "The code bill, senate file No. 364, was prepared without consulting me or any person in the auditor's office. I have never been called into counsel upon the bill or any other insurance bill by either committee. I have not had a single provision of the bill called to my attention by the revision commissioners or the committee. However, I know what is in the bill. I am unalterably opposed to it for very many particular reasons. I know that it is an assault upon the struggling young life companies and our only two bonding companies. I believe it will do for the life and bond companies what has already been done to our state fire companies. It will kill them by inches if not outright."

**Affects Existing Contracts.**  
 "The insurance companies of this state have been built up on the present laws, their contracts, policies and obligations are based upon the present statutes; the department and the companies know their position and standing based upon the courts' decision on the existing policies. To wipe out the present laws and enact a code conflicting materially from the present law means a rearrangement of company and departmental affairs and with the resultant litigation to determine debatable points.  
 "I am opposed to creating a board of insurance. It is a complicated method of conducting the business. Only one other state in the union has an insurance board. I am opposed to emasculating the auditor's office by taking this branch of its business out of the supervision of the head of the department. The principle is bad and the governor and attorney general already have more board business than they can possibly perform.  
 "An actuary by the year is not needed. Examiners by the year is reckless extravagance. The actuary has only about three months' work. The examiners do all their work practically in the early months of the year. The present fees for examiners are largely \$5 per day, payable by the companies. The bill gives them \$2,000 each as salary to be paid by the state. The bill also authorizes the employment of additional examiners, clerks, stenographers and employes without limit. This is bad.  
 "I hope the senators who have not read this bill will read it through, and study it, for it will be the worst legislation ever enacted in Nebraska. If the bill goes through without material amendment."

**TWO BOYS ACCUSED OF BURNING SCHOOL BOOKS**  
 PLATTSMOUTH, Neb., March 12.—(Special.)—Pearl Reynolds and Fred L. Louder of Wabash are accused of breaking into the school house at that village and burning the school books. They fastened the bell rope to the cover of the scuttle-hole and when the teacher, Miss Nell Hollfish, proceeded to ring the bell for the opening of school Monday the boards were released by the rope and fell upon the young woman, cutting a deep gash in her head and face, from which she is yet confined to her room.

Be sure to see them.

Nothing but the most approved styles are in evidence; the shapes, trimmings and materials are so good and the variety so large that you can find just the hat you've been thinking about. The prices, indeed, are unusual for millinery of such excellence; they range... **\$5 to \$75**
