made a new low price record for the sea-son. Belief that through fear of war spreading European countries had over-bought and would, therefore, soon liminish imports, had much to do reaking the market. The close was un-stiled, ranging from last night's level hable down. Corn fisished a shade to off, oats at a decline of webte to ac and provisions less expensive by

Predictions were current that not only would export demand for wheat fall away, but that foreigners would become extensive resellers. Bearish feeling was increased by the fact that the outlook for the winter crop could hardly be better and that sufficient moisture was avail-able to meet needs for a long time. It was pointed out that the Argentine yield is probably a record and is now being shipped on a scale never before equalled. General liquidation on the part of holders prevented the wheat market from developing any material rally. This w partly due to primary receipts for t week, being nearly double the total the corresponding time a year ago. Be-sides, Minneapolis reported three flour

Seaboard clearance of wheat and flour equalled 25.000 bushels. Primary receipts of wheat for the day were 710,000 bushels as against 426,000 bushels a year ago. Bear leaders in corn ignored the fact that the largest holdings of the cereal are in powerful hands. Selling was en-couraged by big reserves, liberal receipts, creasing stocks and above all by killing discount on cash deliveries. Oats weakened through dread that supplies carried over into the new crop season could prove the largest ever known. Provisions suffered because of larger receipts of hogs. Prices were also af-fected by weakness in grain.

For the week receipts foot up 19,560 head, being a gain of close to 1,400 head, as compared with last week, but a failing off as compared with most recent weeks On the other hand, receipts this week are just about on a par with the corre-sponding week last year. The demand for beef steers has been

fair throughout the week, but prices have fluctuated somewhat, the general ten-dency being downward owing to a less active consuming demand, incidental to the Lenten season. At the close of the week beef steers are around 16215c lower than one week ago, the light cattle hav ing shown the least decline, and heavy weights the most. What has been said regarding steers

would apply equally well to cows and heifers, as they, too, have had a down-ward tendency during the latter part of the week and are now 15 12 25 lower than last week's close. Good feeding cattle were free sellers throughout the week and commanded prices that were generally steady. On the other hand, light stockers showed more or less weakness and are a little
